SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Table 1). Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity

growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.

World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geoeconomic fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.

These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance.

For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area.

- In the United States, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the euro area is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy
- Prices subside and inflation falls, supporting real income growth, is expected to drive the recovery. Compared with the October 2023 WEO forecast, however, growth is revised downward by 0.3 percentage point for 2024, largely on account of carryover from the weaker-than-expected outcome for 2023.
- Among other advanced economies, growth in the United Kingdom is projected to rise modestly, from an estimated 0.5 percent in 2023 to 0.6 percent in 2024, as the lagged negative effects of high energy prices wane, then to 1.6 percent in 2025, as disinflation allows an easing in financial conditions and permits real incomes to recover. The markdown to growth in 2025 of 0.4 percentage point reflects reduced scope for growth to catch up in light of recent upward statistical revisions to the level of output through the pandemic period. Output in Japan is projected to remain above potential as growth decelerates from an estimated 1.9 percent in 2023 to 0.9 percent in 2024 and 0.8 percent in 2025, reflecting the fading of one-off factors that supported activity in 2023, including a depreciated yen, pent-up demand, and a recovery in business investment following earlier delays in implementing projects.
- In emerging market and developing economies, growth is expected to remain at 4.1 percent in 2024 and to rise to 4.2 percent in 2025. An upward revision of 0.1 percentage point for 2024 since October 2023 reflects upgrades for several regions.
- Growth in emerging and developing Asia is expected to decline from an estimated 5.4 percent in 2023 to 5.2 percent in 2024 and 4.8 percent in 2025, with an upgrade of 0.4 percentage point for 2024 over the October 2023 projections, attributable to China's economy. Growth in China is projected at 4.6 percent in 2024 and 4.1 percent in 2025, with an upward revision of 0.4 percentage point for 2024 since the October 2023 WEO. The upgrade reflects carryover from stronger-than-expected growth in 2023 and increased government spending on capacity building against natural disasters. Growth in India is projected to remain strong at 6.5 percent in both 2024 and 2025, with an upgrade from October of 0.2 percentage point for both years, reflecting resilience in domestic demand.
- Growth in emerging and developing Europe is projected to pick up from an estimated 2.7 percent in 2023 to 2.8 percent in 2024, before declining to 2.5 percent in 2025. The forecast upgrade for 2024 of 0.6 percentage point over October 2023 projections is attributable to Russia's economy. Growth in Russia is projected at 2.6 percent in 2024 and 1.1 percent in 2025, with an upward revision of 1.5 percentage points over the October 2023 figure for 2024, reflecting carryover from stronger-than-expected growth in 2023 on account of high military spending and private consumption, supported by wage growth in a tight labor market.
- In Latin America and the Caribbean, growth is projected to decline from an estimated 2.5 percent in 2023 to 1.9 percent in 2024 before rising to 2.5 percent in 2025, with a downward revision for 2024 of 0.4 percentage point compared with the October 2023 WEO projection. The forecast revision for 2024 reflects negative growth in Argentina in the context of a significant policy adjustment to restore macroeconomic stability. Among other major economies in the region,

there are upgrades of 0.2 percentage point for Brazil and 0.6 percentage point for Mexico, largely due to carryover effects from stronger-than-expected domestic demand and higher-than-expected growth in large trading-partner economies in 2023.

- Growth in the Middle East and Central Asia is projected to rise from an estimated 2.0 percent in 2023 to 2.9 percent in 2024 and 4.2 percent in 2025, with a downward revision of 0.5 percentage point for 2024 and an upward revision of 0.3 percentage point for 2025 from the October 2023 projections. The revisions are mainly attributable to Saudi Arabia and reflect temporarily lower oil production in 2024, including from unilateral cuts and cuts in line with an agreement through OPEC+ (the Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), whereas non-oil growth is expected to remain robust.

In sub-Saharan Africa, growth is projected to rise from an estimated 3.3 percent in 2023 to 3.8 percent in 2024 and 4.1 percent in 2025, as the negative effects of earlier weather shocks subside and supply issues gradually improve. The downward revision for 2024 of 0.2 percentage point from October 2023 mainly reflects a weaker projection for South Africa on account of increasing logistical constraints, including those in the transportation sector, on economic activity.

INDIAN ECONOMY

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 296.58 trillion (US\$ 3.56 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q2 of 2023-24 was Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in 2022-23, estimating a growth of 9.1%. As of 03rd October 2023, India is home to 111 unicorns with a total valuation of US\$ 349.67 Billion. Out of the total number of unicorns, 45 unicorns with a total valuation of US\$ 102.30 Billion were born in 2021 and 22 unicorns with a total valuation of \$ 29.20 Billion were born in 2022. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. The current account deficit stood at US\$ 8.3 billion, or 1% of GDP, in the second quarter of fiscal 2023-24 as compared to US\$ 9.2 billion or 1.1% of GDP in the preceding quarter.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

SECTION III - RISK FACTOR

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Prospectus, particularly the “Restated Financial Information of the Company” and the related notes, “Business Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 148, 99 and 151 respectively of this Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors whose potential effects are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved. You should not invest in this Offer unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 27 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 151 of this Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

INTERNAL RISK FACTORS

1. Our Registered Office and Corporate Office from where we operate are not owned by us.

Our Registered Office premise situated at Office No-4, 2nd/Floor, Master Space, Plot No-27, Kh/Mustatil No.-154, Killa No-19/2, Uggarsain Park, Dichaon Road, Najafgarh Street No- 2, Najafgarh, New Delhi- 110043, India, is not owned by us, it is taken on lease by way of co-working space basis, for a period of 11 months commencing from March 05, 2024 to February 04, 2025 from Kirpa Kumari on contracting value of ₹ 17,550/- plus GST.

Further, Our Corporate Office premise which is situated at C-127 2nd Floor, Sector 2, Gautam Buddha Nagar, Noida, Uttar Pradesh, India, 201301 is also not owned by us. It is taken on lease rental basis, for a period of 5 years with effect from August 01, 2022 from Sarvagna Exim LLP on monthly rental of ₹ 2,35,000/- per month. However, all the Books of Account maintenance and Execution work takes place from our corporate office only.

We cannot assure that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and it cannot be assured that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period,

we may suffer a disruption in our operations or must pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition. Additionally, any termination of the lease agreements in connection with the property or our failure to renew the same could adversely affect our operations.

2. *In order to avail benefit of Input Tax Credit on Place of Supply we have locational presence by way of co-working space in various states and union territories where we do not have any operational presence.*

Our Company has locational presence in more than 18 states including union territories such as Delhi, Maharashtra, Kolkata, Assam, Tamil Nadu, Jammu & Kashmir, Himachal Pradesh, Goa, Rajasthan, etc for the purpose of availing the benefit of Input Tax Credit on Place of Supply. We operate from these states and union territories by way of taking business offices from co-working space only where we do not have any operational presence. However, all the execution work and maintenance of books of accounts takes place from our corporate office only, which was taken on lease rental basis for a period of 5 years with effect from August 01, 2022 from Sarvagna Exim LLP on monthly rental of ₹ 2,35,000/- per month.

3. *The outbreak of pandemic or any other disease leading to the implementation of restrictions such as lockdowns, quarantines, travel bans or limit on public gatherings, which is unpredictable and highly uncertain, could negatively impact our business operations.*

The occurrence of pandemic like COVID or other diseases triggering restrictions like lockdowns, quarantines, travel bans or limit on public gatherings creates an unpredictable and uncertain environment that could severely harm our business and operations. These restrictions disrupt normal business activities, leading to decreased consumer demand, supply chain disruptions, and logistical challenges. Reduced consumer spending due to economic uncertainty could further intensify the situation, resulting in decreased revenue and profitability. Additionally, restrictions on travel and movement hinder our ability to conduct business activities, including meetings, exhibitions, conferences and events, thereby affecting our operational efficiency and growth prospects. The increased costs associated with implementing safety measures and adapting to remote work arrangements add financial strain to our operations. Furthermore, prolonged restrictions may lead to contractual disputes, project delays, and cancellations, impacting our relationships with clients and partners. Overall, the unpredictable and uncertain nature of pandemics and disease outbreaks poses significant risks to our business continuity, financial stability, and long-term viability.

4. *We have certain outstanding litigation against our Company, an adverse outcome of which may adversely affect our business, reputation and results of operations.*

A summary of outstanding matters set out below includes details of civil proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving us, Subsidiary, Directors, Promoter and Group Company, as at the date of this Prospectus.

The amounts claimed in these proceedings have been disclosed to the extent. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “Outstanding Litigations and Material Developments” beginning on page 163 of this Prospectus.

5. *Our Company has negative cash flows from its operating activities in the past 3 years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Our Company had negative cash flows from its operating activities in the previous three years as per the Restated Financial Statements and the same are summarized as under:

Particulars	Amount (Rs. In lakhs)		
	For the year ended		
	March-24	March-23	March-22
Cash Flow from / (used in) Operating activities	1772.13	(330.49)	(661.56)

The cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

6. *We are exposed to casualty that may occur during Events.*

An unfortunate aspect within our industry is the occurrence of casualties during events. Accidents, medical emergencies, or unforeseen circumstances can have grave consequences for both attendees and organizers. Not only do they present immediate threats to human safety and well-being, but they also carry significant financial and reputational risks. Preventing casualties necessitates careful planning, robust safety measures, and swift emergency responses. Despite best efforts, the risk of such occurrences remains a sobering reality for event organizers and participants alike. Fortunately, as of now, we have not faced any such casualties, despite the potential risk of them occurring during events.

7. *Any offensive Comments by the Artist during the live shows or concert may put company in legal controversy which in turn affect our business & financial growth.*

One of the parts of the business of the Company is to organise the live shows or concerts, where the artist like singers, actors or dancers perform in public. There is a possibility that during events any artist may comment or speak out some words while performing in the live shows which may be offensive to class of society or section or group of community. Such acts on the part of any artist can put our Company under legal action from the concerned stakeholders which may entails reputational loss to our Company and ultimately affect our financial growth. However, we have been fortunate enough to have not encountered this challenge this far.

8. *Our Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.*

Top ten customers of our company for FY2023-24, FY2022-23 and FY 2021-22 contributed for 91.80%, 88.06% and 92.13%, respectively of our sales. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently our business. While we typically have long term relationships with our customers, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing

competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

9. Our Company requires significant amounts of working capital for continued growth. Our inability to meet our working capital requirements may have an adverse effect on the results of operations.

Our business is working capital intensive. A significant portion of our working capital is utilized towards inventories, trade receivables and trade payables. A brief summary of our working capital position based on our Restated Standalone Financials is given below:-

All these factors may result in an increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and the result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Offer” beginning on page 69 of this Prospectus.

10. We have total indebtedness of ₹ 1233.08 lakhs. If we are unable to service our debt obligations in a timely manner or to comply with various financial and other covenants and other terms and conditions of our financing agreements, it may adversely affect our business, credit rating, reputation, prospects, results of operations, cash flows and financial condition.

Our indebtedness comprises, inter alia, overdraft facilities, term loan and loan against property. Our total indebtedness could have several adverse consequences, including but not limited to the following a portion of our cash flows may be used towards repayment of our existing debt, which will reduce the availability of our cash flows to fund working capital, capital expenditures, acquisitions and other general corporate requirements; our ability to obtain additional financing in the future at reasonable terms may be restricted. The table below sets forth our total borrowings as at the dates indicates:

Total Borrowings (in Rs. Lakh)	1233.08	988.53	509.69

Our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our

financing documents relate to obtaining prior consent of the lender for, among others, change in the constitution of the Bank, availing additional borrowings etc. and a failure to observe the restrictive covenants under our financing agreements or to obtain necessary consents required thereunder may trigger an event of default which may lead to inter alia the imposition of penalties, termination of our credit facilities, acceleration of all amounts due under such facilities and/or the enforcement of any security provided. While we have obtained the consents, as required and intimated the relevant lenders for the purposes of the Offer, our future borrowings may also contain similar or additional restrictive covenants.

For further details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 151 of this Prospectus.

12. Certain delays and discrepancies have been detected in our statutory records, as well as in records related to the submission of returns and statutory expenses to the concerned Registrar of Companies.

In the past, there were instances of non-filings, incorrect filings, or delays in filing statutory forms with the RoC. These delays not only disrupted regulatory compliance but also raised questions about the company's efficiency and reliability in meeting legal obligations, potentially tarnishing its reputation and credibility in the business environment. These were later rectified, accompanied by additional fees. Any monetary penalties or punitive actions from authorities against the company, its directors, or officers could adversely impact its business, financial condition, and operational results.

13. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject to, and this may have a material adverse effect on our business. It mainly cater to cars, with no coverage provided for risks such as earthquakes, fires, business losses, damages, or other associated consequences.

Our company's insurance coverage primarily emphasizes car insurance, which leads to significant gaps in protection against major risks such as earthquakes, fires, business loss or damage, health insurance, travel insurance, etc. This restricted focus raises concerns about our ability to adequately protect the interests of our stakeholders in potential catastrophic situations. Insufficient coverage exposes our stakeholders to significant financial risks, undermining trust in our ability to provide dependable insurance solutions.

If our facilities suffer damage, whether fully or partially, leading to prolonged disruptions in operations, there is uncertainty about whether our insurance would cover the resulting losses or the costs of repairing or replacing the facilities. If we experience a major loss that isn't covered by insurance, or if our insurance doesn't fully cover a significant loss, it could have a serious negative impact on our business, finances, and operations.

14. Our Company has not entered any long-term contracts with any of our customers and we typically operate based on Contracts/ orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.

Our Company has had long standing business relationships with various customers, and we have been serving our clients since many years. However, we have not entered any specific contracts with these clients, and we cater to them on an order-by-order basis. As a result, our client can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be

subject to variability because of fluctuations in demand for our services. Our Company's clients have no obligation to avail our service and may either cancel, reduce, or delay service orders. The service orders placed by our Company's clients are dependent on factors such as the customer satisfaction with the level of consistency of the services that our Company supplies. Although we emphasize on quality, timely delivery of services, in the absence of long-term contracts, any change in the service orders could adversely affect the business and the profitability of our Company.

15. *Any disturbance in foreign countries could significantly disrupt our business operations, as our major revenue is generated from international tours.*

Any disruption in foreign countries poses a serious threat to our business operations as the major revenue of the company is generated from international tours. Whether it's political instability, natural disasters, or public health crises, such events can have far-reaching implications, affecting our ability to conduct tours, secure bookings, and maintain customer satisfaction. Additionally, disruptions may lead to travel restrictions, flight cancellations, or safety concerns, all of which can hinder our operations and financial performance. To mitigate these risks, we prioritize staying informed about global events, maintaining flexible booking policies, and implementing contingency plans to swiftly address any challenges that arise. By remaining proactive and adaptable, we aim to safeguard our business against the impacts of external disturbances and ensure continuity in serving our customers effectively.

16. *Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change*

The Government of India may implement new laws or other regulations that could affect the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

17. *Our business is operating under various laws which require us to obtain approvals from the concerned statutory/regulatory authorities in the ordinary course of business and our inability to obtain, maintain or renew requisite statutory and regulatory permits and approvals for our business operations could materially and adversely affect our business, prospects, results of operations and financial condition.*

Our business requires us to obtain and renew from time to time certain approvals, licenses, registrations and permits, some of which have expired and for which we have either made or are in the process of making an application for obtaining the approval or its renewal. In particular, the Company has applied for registration under Shops & Establishments Acts of various states, PTEC and PTRC and registration under Inter-State Migrant Workmen Act. Moreover, the Company is yet to apply for PTEC and PTRC for the States of Kerala, Sikkim and Goa. Further, these approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by various authorities for operating our business activities may contain conditions, some of which could be onerous. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, it will have an adverse impact on our business operations.

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Further, we cannot assure that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations. For further details, see ***“Government and Other Statutory Approvals”*** on page 167 of this Prospectus. In the event that we are unable to obtain such approvals in a timely manner or at all, our business operations may be adversely affected. We may be involved in any environmental legal proceedings in the course of our business due to non-compliance with terms and conditions of regulatory approvals or authorizations.

18. *Our Company has availed unsecured loans which are repayable on demand. Any demand for a loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

Based on Restated Financial Statement, our Company has unsecured loans as at March 31, 2024, amounting to Rs. 325.19 lakhs from Directors and their relatives that are repayable on demand to the relevant lenders as per restated financial statements. Further, some of these loans are not repayable in accordance with any agreed repayment schedule

and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company and its subsidiary company, please refer the chapter titled “*Restated Financial Statements*” beginning on page 148 of this Prospectus.

19. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.*

Our services require skilled and creative manpower, and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to us requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

20. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions, and cause serious harm to our reputation and the goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

21. *Our Company’s failure to maintain the quality standards of the Service could adversely impact our business, results of operations and financial condition.*

Quality of services is a vital element for our sector. We provide distinguished services to a variety of customers which provide us a safeguard against the change of trend with any type of customer as our operational cash influges get balanced with other type of our customer base. Any rapid change in our customers’ expectation on account of changes in technology or introduction of new kind of services or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. Any failure on our part to successfully meet customer demand or preference may negatively affect our business, results of operation and financial condition.

22. *Our company operates in a highly competitive environment. Any failure to compete effectively could harm our business, future prospects and financial stability.*

We operate in a highly competitive industry where aggressive pricing for project acquisition is common. Consequently, we may need to bid more aggressively and accept unfavourable terms. Without securing new projects, our business growth and revenues may suffer, especially when competing against larger and more resourceful firms.

New entrants willing to accept lower margins further strain industry profitability. This may intensify existing challenges, put pressure on pricing and profit margins for all. Continuous intense competition in these markets presents significant challenges, affecting our capacity to sustain growth and uphold satisfactory profit margins. Businesses must adapt to this fierce competition, where newcomers sacrifice profits for market share, impacting overall industry financial health. Failure to address these challenges effectively heightens the risk of losing market share to competitors and facing an overall decline in profits.

23. *Our company will not receive any proceeds realised from the Offer for Sale. The amount realised thereon will be received directly by the Promoter Selling Shareholders.*

A substantial portion of our offering comprises shares for sale. Any proceeds from this sale will be received directly by the promoter selling shareholders and not by the company itself. It's important for investors to recognize that the company will not directly gain any funds from the shares offered for sale. Instead, the funds raised through this part of the offering will go to the Promoter Selling Shareholders. This distinction is crucial for investors to understand as they assess the allocation of funds within the IPO. It underscores the fact that the company's financial position will not be directly impacted by the sale of these shares. Rather, it is the selling shareholders who stand to benefit financially from the sale. This transparency in the allocation of proceeds ensures clarity and accountability in the IPO process, providing investors with the necessary information to make informed decisions regarding their investments.

24. *We are susceptible to claims resulting from insufficient performance and defects that might impact the events we oversee, potentially causing adverse effects on our business, financial well-being, and operational outcomes.*

Our company's business is dependent on third party service providers. Any deficiency of services on their part may adversely impact the quality of service provided by our company. Any failure to meet customer expectations may result in payment deductions or future restriction or debarment. Additionally, we may face claims due to inadequate performance or defects in procurement and/or management services we provide. Each event involves multiple activities, some of which are executed by third parties appointed by us. Any defects in services provided by these third parties may lead to liability on our part. Actual or alleged defects in service quality may result in claims, liabilities, and expenses related to loss of life, personal injury, reputation or property damage, adversely affecting our operational results.

- 25. *In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities. Our Company in future may enter in related party transactions subject to necessary compliances.***

Our Promoter – Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoter and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity. All transactions with related parties entered into by the company in past were at arm's length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions. Our company, promoter and group companies may enter into such related party transaction in future as well which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If such future transactions are not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. For details of transactions already executed by our Company with our Promoter, Directors and Group Companies/Entities during last three years, please refer to the “*Annexure – V.33 - Related Party Disclosure under AS 18*” under the chapter titled “Restated Financial Information” beginning from page no. 148 of this Prospectus.

- 26. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Offer which will allow them to determine the outcome of matters submitted to shareholders for approval.***

Post this Offer, our Promoters and Promoter Group will collectively own 69.93% of our post offer equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 27. *Our success depends heavily upon our Promoters, Directors, Key Managerial Personnel and Senior Management Personnel for their continuing services, strategic guidance and financial support. Our success depends heavily upon the continuing services of Promoters, Directors, Key Managerial Personnel and Senior Management Personnel who are the natural person in control of our Company.***

Our Promoters, Directors, Key Managerial Personnel and Senior Management Personnel have a vast experience in the business undertaken by our company. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe, our Promoters, Directors, Key Managerial Personnel and Senior Management Personnel, who have rich experience in this industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability.

We benefit from our relationship with our Promoters, Director, Key Managerial Personnel and Senior Management Personnel and our success depends upon their continuing services. We also depend significantly on our Directors, Key Managerial Persons and Senior Management Personnel for executing our day-to-day activities. The loss of any of our Promoters, Directors, Key Management Personnel and Senior Management Personnel, or failure to retain, recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors, Key Managerial Personnel and Senior Management Personnel, please refer to the chapter titled “*Our Management*” on page 128 of this Prospectus.

28. *We are exposed to the risk of delays or non-payment by our clients and other counter parties, which may also result in cash flow mismatches.*

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or fulfil their other contractual obligations. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business, which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect all or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of operations and cash flows.

29. *Currency transaction losses may occur due to fluctuations in foreign exchange rates.*

We facilitate currency exchange for our clients' convenience. As a provider of currency exchange services, our operations are intricately linked to the dynamics of foreign exchange markets. Any adverse fluctuations in exchange rates and movements in unhedged exchange rates could impact our profitability and financial condition. Unhedged exchange rate movements, in particular, pose a risk to our profitability, as they can directly affect the value of our transactions. Consequently, it is imperative for us to monitor exchange rate movements diligently and implement appropriate risk management strategies to mitigate potential losses. By staying proactive and responsive to changes in exchange rates, we strive to safeguard our profitability and financial stability while continuing to deliver reliable currency exchange services to our clients.

For further details, please refer to the chapter titled "Restated Financial Information of our Company" section on page 148 of this Prospectus.

30. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and the results of operations.

31. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Offer price.*

Our promoter's average cost of acquisition of Equity Shares in our Company could be lower than the Offer Price as decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title "Capital Structure" beginning on page 57 of this Prospectus.

32. *Our Promoter and Directors have provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters/ Directors and thereby, impact our business and operations.*

Our Promoters and Directors have extended personal guarantees towards loan facilities taken by our Company. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters/Directors of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer to "Business Overview - Statement of Financial Indebtedness" on page 99 of this Prospectus.

33. *Within the parameters as mentioned in the chapter titled 'Objects of this Offer' beginning on page 69 of this Prospectus, our Company's management will have flexibility in applying the proceeds of this Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.*

We intend to use Offer Proceeds towards financing the Working capital requirements of the Company, General Corporate Purpose and to meet the offer expenses. We intend to deploy the Net Offer Proceeds in FY 2024-25. The deployment of the fund is based on certain assumptions and strategy which our Company believes to implement in

future. The funds raised from the Offer may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. For further details on the use of the Offer Proceeds, please refer chapter titled “*Objects of the Offer*” beginning on page 69 of this Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘*Objects of the Offer*’ beginning on page 69 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Offer. Our Audit Committee will monitor the proceeds of this Offer.

However, Audit Committee will monitor the utilization of the proceeds of this Offer and prepare the statement for utilization of the proceeds of this Offer. However, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Offer without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholder shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

34. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising or meeting the same could adversely affect our growth plans, operations, and financial performance.*

As on date of this Prospectus, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our bank finance, owned funds, and internal accruals. Any shortfall in our net owned funds, internal accruals, and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Offer*” beginning on page 69 of this Prospectus.

35. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

36. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate, and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution network and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition, and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of the market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

37. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders’ investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate. For details of our dividend history, see “*Dividend Policy*” on page 147 of this Prospectus.

38. *Industry information included in this Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial, and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third parties for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in

nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

39. *The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for Equity Shares will develop, or if developed, the liquidity of such market for Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

The Offer Price of our Equity Shares has been determined by book-built method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Offer Price” beginning on page 76 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and Domestic and international economic, legal and regulatory factors unrelated to our performance.

40. *The sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

41. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Following the Offer, we will be subject to a daily “circuit breaker” imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares.

42. *We may need additional capital and we may not be able to obtain it, which could adversely affect our liquidity and financial position.*

We may require additional cash resources due to changed business conditions or other future developments. Our ability to obtain additional capital is subject to a variety of uncertainties, including our future financial condition, results of

operations and cash flows, conditions in the capital markets in which we may seek to raise funds and general economic, political and other conditions in India and elsewhere. We may be unable to obtain additional capital in a timely manner or on acceptable terms or at all. The terms and amount of any additional capital raised through issuances of equity securities may result in significant dilution to our shareholders. Any incurrence of debt would result in the incurrence of interest expense and could require us to agree to operating and financial covenants that could restrict our operational flexibility and materially and adversely affect our business. Any termination of such membership could adversely affect our operations.

43. *The deployment of funds raised through this Offer shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Offer size above ₹10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Offer proceeds and the audit committee of our Board will monitor the utilization of Offer proceeds as per the Board Resolution passed in the meeting held on June 21, 2024. There may be some deviations in the utilization of Offer proceeds. Though our Company undertakes to inform these deviations to the BSE and shall also simultaneously make the deviations / adverse comments of the audit committee public, there is no assurance that no bias will ever be exercised against the interest of the public shareholders.

44. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that in future no deficiency will be incurred. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

45. *Certain data mentioned in this Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

1. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession, or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

2. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Offer, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed Spread X Securities Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Offer due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

3. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Offer until the Offer receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

4. *There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME Platform of BSE Limited in a timely manner, or at all.*

Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

5. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition, and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

6. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition, and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary

basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Tax Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

Further, our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

7. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and exhibitions, conferences and events industry contained in this Prospectus.*

While facts and other statistics in this Prospectus relating to India, the Indian economy and the exhibitions, conferences and events industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “Industry Overview” beginning on page 87 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

8. *The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.*

India’s physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

9. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

10. *A slowdown in economic growth in India and globally could cause our business to suffer.*

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- variations in exchange rates;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income could adversely affect our business and financial performance and the price of our Equity Shares.

11. Our business and results of operations could be adversely affected by disruptions in global economic and geopolitical conditions.

As substantially all our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geopolitical conditions. The Indian economy could be adversely impacted by inflationary pressures, currency depreciation, and the poor performance of its large agricultural and manufacturing sectors, trade deficits, and recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

12. Global economic, political, and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

13. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

14. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

In recent years, India has faced natural disasters like earthquakes, tsunamis, and floods. The extent and severity of these natural disasters determine their impact on the Indian economy. Extended periods of such disasters could potentially harm the Indian economy, consequently impacting our business, prospects, financial health, operational performance, and the value of Equity Shares.

15. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries may have negative impact on the financial markets, financial condition, our business and the price of our Equity Shares.

Any major conflicts involving India or instances of violence, including civil unrest or similar events beyond our control, could significantly affect India's economy and our business operations. Events such as terrorist attacks in India, as well as incidents in countries like the US, Indonesia, Madrid, and London, along with other acts of violence, may have adverse impacts on the Indian stock markets where our Equity Shares are traded. Such events have the potential to diminish business confidence and disrupt international trade, potentially harming our company's business performance and profitability. Additionally, these occurrences could have a substantial adverse effect on the market for securities of Indian companies, including our Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offeror at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The highest price at which the Offeror is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL OUTLOOK

Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Table 1). Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.

World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geoeconomic fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.

These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance.

For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area.

- In the United States, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the euro area is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy
- Prices subside and inflation falls, supporting real income growth, is expected to drive the recovery. Compared with the October 2023 WEO forecast, however, growth is revised downward by 0.3 percentage point for 2024, largely on account of carryover from the weaker-than-expected outcome for 2023.
- Among other advanced economies, growth in the United Kingdom is projected to rise modestly, from an estimated 0.5 percent in 2023 to 0.6 percent in 2024, as the lagged negative effects of high energy prices wane, then to 1.6 percent in 2025, as disinflation allows an easing in financial conditions and permits real incomes to recover. The markdown to growth in 2025 of 0.4 percentage point reflects reduced scope for growth to catch up in light of recent upward statistical revisions to the level of output through the pandemic period. Output in Japan is projected to remain above potential as growth decelerates from an estimated 1.9 percent in 2023 to 0.9 percent in 2024 and 0.8 percent in 2025, reflecting the fading of one-off factors that supported activity in 2023, including a depreciated yen, pent-up demand, and a recovery in business investment following earlier delays in implementing projects.
- In emerging market and developing economies, growth is expected to remain at 4.1 percent in 2024 and to rise to 4.2 percent in 2025. An upward revision of 0.1 percentage point for 2024 since October 2023 reflects upgrades for several regions.

-
- Growth in emerging and developing Asia is expected to decline from an estimated 5.4 percent in 2023 to 5.2 percent in 2024 and 4.8 percent in 2025, with an upgrade of 0.4 percentage point for 2024 over the October 2023 projections, attributable to China's economy. Growth in China is projected at 4.6 percent in 2024 and 4.1 percent in 2025, with an upward revision of 0.4 percentage point for 2024 since the October 2023 WEO. The upgrade reflects carryover from stronger-than-expected growth in 2023 and increased government spending on capacity building against natural disasters. Growth in India is projected to remain strong at 6.5 percent in both 2024 and 2025, with an upgrade from October of 0.2 percentage point for both years, reflecting resilience in domestic demand.
 - Growth in emerging and developing Europe is projected to pick up from an estimated 2.7 percent in 2023 to 2.8 percent in 2024, before declining to 2.5 percent in 2025. The forecast upgrade for 2024 of 0.6 percentage point over October 2023 projections is attributable to Russia's economy. Growth in Russia is projected at 2.6 percent in 2024 and 1.1 percent in 2025, with an upward revision of 1.5 percentage points over the October 2023 figure for 2024, reflecting carryover from stronger-than-expected growth in 2023 on account of high military spending and private consumption, supported by wage growth in a tight labor market.
 - In Latin America and the Caribbean, growth is projected to decline from an estimated 2.5 percent in 2023 to 1.9 percent in 2024 before rising to 2.5 percent in 2025, with a downward revision for 2024 of 0.4 percentage point compared with the October 2023 WEO projection. The forecast revision for 2024 reflects negative growth in Argentina in the context of a significant policy adjustment to restore macroeconomic stability. Among other major economies in the region, there are upgrades of 0.2 percentage point for Brazil and 0.6 percentage point for Mexico, largely due to carryover effects from stronger-than-expected domestic demand and higher-than-expected growth in large trading-partner economies in 2023.
 - Growth in the Middle East and Central Asia is projected to rise from an estimated 2.0 percent in 2023 to 2.9 percent in 2024 and 4.2 percent in 2025, with a downward revision of 0.5 percentage point for 2024 and an upward revision of 0.3 percentage point for 2025 from the October 2023 projections. The revisions are mainly attributable to Saudi Arabia and reflect temporarily lower oil production in 2024, including from unilateral cuts and cuts in line with an agreement through OPEC+ (the Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), whereas non-oil growth is expected to remain robust.
 - In sub-Saharan Africa, growth is projected to rise from an estimated 3.3 percent in 2023 to 3.8 percent in 2024 and 4.1 percent in 2025, as the negative effects of earlier weather shocks subside and supply issues gradually improve. The downward revision for 2024 of 0.2 percentage point from October 2023 mainly reflects a weaker projection for South Africa on account of increasing logistical constraints, including those in the transportation sector, on economic activity.

Inflation Outlook: Steady Decline to Target

Global headline inflation is expected to fall from an estimated 6.8 percent in 2023 (annual average) to 5.8 percent in 2024 and 4.4 percent in 2025. The global forecast is unrevised for 2024 compared with October 2023 projections and revised down by 0.2 percentage point for 2025. Advanced economies are expected to see faster disinflation, with inflation falling by 2.0 percentage points in 2024 to 2.6 percent, than are emerging market and developing economies, where inflation is projected to decline by just 0.3 percentage point to 8.1 percent. The forecast is revised down for both 2024 and 2025 for advanced economies, while it is revised up for 2024 for emerging market and developing economies, mainly on account of Argentina where the realignment of relative prices and elimination of legacy price controls, past currency depreciation, and the related pass-through into prices is expected to increase inflation in the near term. The drivers of declining inflation differ by country but generally reflect lower core inflation as a result of still-tight monetary policies, a related softening in labor markets, and pass-through effects from earlier and ongoing declines in relative energy prices.

Overall, about 80 percent of the world's economies are expected to see lower annual average headline and core inflation in 2024. Among economies with an inflation target, headline inflation is projected to be 0.6 percentage point above target for the median economy by the fourth quarter of 2024, down from an estimated gap of 1.7 percentage points at the end of 2023. Most of these economies are expected to reach their targets (or target range midpoints) by 2025. In several major economies, the downward revision to the projected path of inflation, combined with a modest upgrade to economic activity, implies a softer-than-expected landing.

Note: The figure plots the median of a sample of 57 economies that accounts for 78 percent of World Economic Outlook world GDP (in weighted purchase power-parity terms) in 2023. Vertical axes are cut off at -4 percent and 16 percent. The bands depict the 10th to 90th percentiles of inflation across economies. “Core inflation” is the percent change in the consumer price index for goods and services, excluding food and energy (or the closest available measure). AEs = advanced economies; EMDEs = emerging market and developing economies.

Risks to the Outlook

With the likelihood of a hard landing receding as adverse supply shocks unwind, risks to the global outlook are broadly balanced. There is scope for further upside surprises to global growth, although other potential factors pull the distribution of risks in the opposite direction.

Upside risks. Stronger global growth than expected could arise from several sources:

- **Faster disinflation:** In the near term, the risk that inflation will fall faster than expected could again become a reality, with stronger-than-expected pass-through from lower fuel prices, further downward shifts in the ratio of vacancies to unemployed persons, and a compression of profit margins to absorb past cost increases. Combined with a decline in inflation expectations, such developments could allow central banks to move forward with their policy-easing plans and could also contribute to improving business, consumer, and financial market sentiment, as well as raising growth.
- **Slower-than-assumed withdrawal of fiscal support:** Governments in major economies might withdraw fiscal policy support more slowly than necessary and than assumed during 2024–25, implying higher-than-projected global growth in the near term. However, such delays could in some cases exacerbate inflation and, with elevated public debt, result in higher borrowing costs and a more disruptive policy adjustment, with a negative impact on global growth later on.
- **Faster economic recovery in China:** Additional property sector–related reforms—including faster restructuring of insolvent property developers while protecting home buyers’ interests—or larger-than-expected fiscal support could boost consumer confidence, bolster private demand, and generate positive cross-border growth spillovers.
- **Artificial intelligence and supply-side reforms:** Over the medium term, artificial intelligence could boost workers’ productivity and incomes, although this would depend on countries’ harnessing the potential of artificial intelligence. Advanced economies may experience benefits from artificial intelligence sooner than emerging market and developing economies, largely because their employment structures are more focused on cognitive-intensive roles.² For emerging market and developing economies with constrained policy environments, faster progress on implementing supply-enhancing reforms could result in greater-than-expected domestic and foreign investment and productivity and faster convergence to higher income levels.

Downside risks. Several adverse risks to global growth remain plausible:

- **Commodity price spikes amid geopolitical and weather shocks:** The conflict in Gaza and Israel could escalate further into the wider region, which produces about 35 percent of the world’s oil exports and 14 percent of its gas exports. Continued attacks in the Red Sea—through which 11 percent of global trade flows—and the ongoing war in Ukraine risk generating fresh adverse supply shocks to the global recovery, with spikes in food, energy, and transportation costs. Container shipping costs have already sharply increased, and the situation in the Middle East remains volatile. Further geoeconomic fragmentation could also constrain the cross-border flow of commodities, causing additional price volatility. More extreme weather shocks, including floods and drought, could, together with the El Niño phenomenon, also cause food price spikes, exacerbate food insecurity, and jeopardize the global disinflation process.
- **Persistence of core inflation, requiring a tighter monetary policy stance:** A slower-than-expected decline in core inflation in major economies due, for example, to persistent labor market tightness and renewed tensions in supply chains could trigger a rise in interest rate expectations and a fall in asset prices, as in early 2023. Such developments

could increase financial stability risks, tighten global financial conditions, trigger flight-to-safety capital flows, and strengthen the US dollar, with adverse consequences for trade and growth.

- **Faltering of growth in China:** Absent a comprehensive restructuring policy package for the troubled property sector, real estate investment could drop more than expected, and for longer, with negative implications for domestic growth and trading partners. Unintended fiscal tightening in response to local government financing constraints is also possible, as is reduced household consumption in a context of subdued confidence.
- **Disruptive turn to fiscal consolidation:** Fiscal consolidation is necessary in many economies to deal with rising debt ratios. But an excessively sharp shift to tax hikes and spending cuts, beyond what is envisaged, could result in slower-than-expected growth in the near term. Adverse market reactions could pressure some countries that lack a credible medium-term consolidation plan or face a risk of debt distress to undertake harsh adjustments. In low-income countries and emerging market economies, the risk of debt distress remains elevated, constraining scope for necessary growth-enhancing investments.

INDIAN ECONOMY

Introduction:

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023-24 is estimated to be Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023-24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 296.58 trillion (US\$ 3.56 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q2 of 2023-24 was Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in 2022-23, estimating a growth of 9.1%. As of 03rd October 2023, India is home to 111 unicorns with a total valuation of US\$ 349.67 Billion. Out of the total number of unicorns, 45 unicorns with a total valuation of US\$ 102.30 Billion were born in 2021 and 22 unicorns with a total valuation of \$ 29.20 Billion were born in 2022. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. The current account deficit stood at US\$ 8.3 billion, or 1% of GDP, in the second quarter of fiscal 2023-24 as compared to US\$ 9.2 billion or 1.1% of GDP in the preceding quarter.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer

Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- Between April 2000 – March 2023, cumulative FDI equity inflows to India stood at US\$ 9919.63 billion.
- In May 2023, the overall IIP (Index of Industrial Production) stood at 145. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 128.1, 142.3 and 201.6, respectively, in May 2023.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 4.81% in June 2023.
- In FY23, the Foreign Portfolio Investment (FPI) outflows stood at US\$ 14.81 billion (Rs. 1.21 trillion). As per depository data, Foreign Portfolio Investors (FPIs) invested Rs. 22,000 crore (US\$ 2.67 billion) in India during the first week of July 2023.

Moreover, in the budget 2022-23, direct payment of (Maximum Selling Price) MSP was launched that estimated to be US\$ 31.74 billion (Rs. 2.37 trillion) in order to boost farmers' income.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of the average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. ROAD AHEAD

In the second quarter of FY23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In June 2023 (Provisional), CPI-C inflation was 4.81%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

The India Meetings, Incentives, Conferences and Exhibitions market is expected to witness significant growth in the near future. The business events industry in India is driven by favorable government policies that promote tourism and business travel. Several incentives like concessions on goods and services tax and infrastructure development programs are attracting both domestic and international event organizers to host events in India. Cities like Delhi, Mumbai, Bengaluru, and Chennai have emerged as top convention destinations in the country.

However, the market also faces challenges in terms of lack of international level convention infrastructure in several emerging city destinations. While tier-1 cities are well-equipped, the infrastructure in other cities needs further development. High taxes on events and accommodation continue to remain a restricting factor. The other concern is the shortage of qualified local manpower to cater to the increasing demand of international standard business events.

On the brighter side, India offers a diverse portfolio of destinations at affordable rates for organizers. The government's push towards developing cosmopolitan city hubs and regional air connectivity across India will bolster the meetings market.

Sectors like pharmaceuticals, healthcare and technology are fueling corporate meetings and conferences. Emerging city destinations like Pune, Ahmedabad, and Hyderabad are generating increasing interests. The southern region, led by Bengaluru and Chennai, has emerged as the fastest growing market riding on strong local industries and acceptable weather conditions throughout the year.

MICE - Market Drivers:

- Rising business travel and corporate events: Growth in domestic and international business travel as well as increasing number of corporate events and trade exhibitions has significantly driven the India Meetings, Incentives, Conferences and Exhibitions Market. Corporates are actively looking to host large seminars, meetings, and conferences to support their business expansion plans. There has been an increase in companies hosting annual general meetings, sales conferences, product launches, and others. This rising frequency of corporate events and business meets is a major driver for the market.
- The improving corporate profitability has also enabled companies to allocate more budgets for business events, conference travel, and employee incentives, thus creating more demand in the MICE space.
- Infrastructure development: The development of larger convention centers, premium hotels and venues with modern facilities has also facilitated the growth of MICE events in India. Cities like Hyderabad, Mumbai, and Bengaluru have large convention centers to host major global events.
- The government has been promoting infrastructure initiatives like the India International Convention and Expo Center. New airports and transportation systems have also made key cities more accessible for national and international attendees. Such investments have enabled India to emerge as an attractive MICE destination versus other Asia Pacific (APAC) countries.
- Government support: The government's active promotion of the MICE industry through flagship programs like 'Make in India', development of MICE clusters and easing of visa regulations have encouraged more international events to be hosted in India. Efforts are underway to position the country as a viable global MICE hub.
- Several states have drafted MICE policies with provision for financial incentives, subsidies, and single window systems to attract events. The government is also promoting India globally through its 'Incredible India' campaign and participation in international travel fairs. Such initiatives have created a favorable environment.
- Expanding digital events: Adoption of advanced event technology solutions and growing concept of hybrid events in the post pandemic period has favored the market growth. Digital platforms are enabling events to be more interactive, immersive, and convenient.

Market Opportunities:

- Rising destination weddings segment: India has witnessed a major increase in lavish destination weddings in recent years such as 2022, 2023, with higher budgets, longer guest lists and extravagant set-ups planned at exotic venues.
- Top hotels, event planners, and wedding planning firms are capitalizing on this growth to target high value NRI (Non-Resident Indian) and affluent families looking to host fairytale weddings. Firms are offering comprehensive wedding planning services from venue, décor, and logistics to entertainment, food, and guest management. The opportunity for the destination wedding segment is immense.
- Expanding to new geographical regions: While major cities have been the conventional MICE hubs, upcoming destinations like Jodhpur, Udaipur, Chandigarh, Guwahati, and others provide untapped potential. Investments to upgrade infrastructure and promotion by tourism boards have widened options.
- Hospitality majors are strategizing to expand presence into such cities, provided the lower costs and uncongested spaces are available. This will allow firms to target price conscious and first-time event organizers from emerging cities, cater to their regional needs better.
- Virtual event capabilities: The virtual events space promises huge scope for companies to leverage technology and expand their audience reach beyond physical limitations. Firms which are equipped with digital event solutions can offer tech-enabled events platform by covering attendee engagement, networking, analytics, and payment gateway capabilities.
- Virtual events allow firms to host out-of-town or international customers virtually at lower costs and gain incremental revenues. With virtual fatigue setting in, the potential for hybrid events is also significant.

- Customized event solutions: Companies can gain advantage by offering highly personalized and customized event management services tailored to client requirements - right from equipment, venue décor, F&B (Food & Beverage) entertainment and accommodations.

Market Trends:

- Sustainability: Sustainable practices have become a priority across MICE events whether it is minimizing waste, preventing food spoilage, neutralizing carbon impact or promoting energy efficiency. Venues are designing renewable energy infrastructure and harnessing solar power.
- Providing sustainable food options, recycling waste, and avoiding single-use plastic are the rising trends. Communication is also going paperless with digital event collaterals. Such measures help MICE companies boost brand image and appeal to eco-conscious attendees.
- Bleisure travel: Bleisure travel which means combining business events with leisure, is gaining popularity. Companies are curating extended programs blending business agenda with specially curated local experiences such as cultural tours, adventure activities, culinary experiences, and others.
- Destinations like Kerala, Andaman, or Northeast with varied landscapes, heritage sites, and activities complement such programs. Providing immersive experiences creates engagement and enhances attendee satisfaction.
- Hybrid events: Hybrid has become the new normal for the events landscape, thus enabling audiences across geographies to attend live and virtually. Planners need to design interactive formats that tightly integrate in-person and virtual experiences by using event-tech and high-end production.
- Providing streaming access and immersion beyond physical attendance provides inclusivity. Data analytics helps assess audience preferences and engagement levels across platforms.
- Health, safety, and hygiene: With the impact of the pandemic, health, hygiene, and safety have become crucial. Venues need to implement stringent protocols like frequent sanitization, social distancing norms, daily temperature/health checks and isolation rooms. Hybrid event solutions allow limiting on-ground presence.

Market Restraints:

- Geopolitical changes and economic uncertainty: Geopolitical tensions, trade conflicts, rising inflation, and signs of a global slowdown have created pockets of uncertainty. Business travel cuts and event budget reductions are visible during turbulent periods. Currency fluctuations also impact cross-border business.
- Sudden visa rule changes or travel restrictions due to closed borders, health hazards and security issues can disrupt international events participation. Planning risk mitigation strategies becomes important.
- Shortage of skilled human resources: Acute shortage of skilled human resources poses a key challenge. Talent scarcity exists for key roles like venue managers, production specialists, technical teams, chefs, mixologists, and service staff. High attrition levels further aggravate this issue.
- Training and retaining skilled staff equipped in hospitality, culinary skills and event technology is vital yet challenging presently. Staff scheduling complexity during major events also impacts execution.

Counterbalance: Skilled human resource should be made available to minimize the acute shortage of skilled staff, required at the time of organizing major events in the country.

- Increasing cost pressures: Rising operating costs due to inflation, supply chain disruptions, energy costs, and labor shortages have increased pressure on operating margins. Cost escalations across travel, F&B (Food & Beverages), technology, equipment, and others have limited the ability to absorb price hikes during competition.
- This necessitates value engineering and finding optimal cost structures. Venues also need to enhance operational productivity through process improvements to protect profitability.

Recent Developments & Key strategic initiatives

- In June 2021, the Ministry of Tourism earmarked six cities for strategic development as Meetings, Incentives, Conferences, and Exhibitions (MICE) destinations, aiming to enhance tourism throughout the year. The primary cities targeted for MICE development include Agra, Udaipur, Pune, Thiruvananthapuram, Varanasi, and Bhubaneswar.
- In March 2022, during the 2022-23 budget presentation, the State's Chief Minister unveiled a strategic initiative to transform Bangalore into India's premier hub for Meeting, Incentive, Conferences, and Exhibitions (MICE). This initiative aims to capitalize on Bangalore's unique strengths as the nation's business and IT (Information

Technology) capital, along with its advanced technology, transportation systems, and air connectivity infrastructure.

Trends across India

In India, MICE tourism has seen a considerable growth in recent years. The exhibition industry is rapidly growing at a rate of more than 8% over the past few years outpacing the GDP growth rate of the country. According to the Ministry of Tourism, India hosted over 6.9 million foreign tourists in 2019 for various events, conferences, and exhibitions. As per ICCA city and country rankings, India with 158 meetings (out of total 13,254 meetings) secured 28th rank. The MICE segment contributes significantly to the overall tourism industry, generating substantial revenue and boosting the local economy. Jio World Convention Center, Biswa Bangla Convention Center, Bharat Mandapam, Yashobhoomi, etc. in India are emerging as major MICE destinations, equipped with state-of-the-art infrastructure and world-class facilities.

The recent India G-20 Presidency recorded over 200 meetings across 56 cities, placing India on an international MICE landscape, showcasing robust infrastructure, cultural and national heritage internationally. The Ministry is working to take this momentum forward and place India as one of the leaders in MICE Tourism. The ‘National Strategy and Roadmap for MICE Industry’ is an appreciative enabling institutional framework that serves as a guiding document for the stakeholders. Additionally, State and city level MICE promotion Bureaus will facilitate the development of MICE industry in India. CII is actively engaging with the government and the industry fraternity to take this initiative forward through active stakeholder consultations and dialogues.

Current and Future Potential

The potential for MICE sector growth can be partially attributed to the pandemic that accelerated the adoption of virtual and hybrid events. Even as in-person gatherings resume, the integration of digital elements remains prevalent, allowing wider participation and enhancing the overall event experience. There is a growing emphasis on sustainable practices within the MICE tourism sector. Event organizers and venues are increasingly adopting eco-friendly initiatives, aligning with the global push towards responsible and green tourism. The integration of cutting-edge technologies, such as augmented reality (AR) and virtual reality (VR), has transformed the MICE landscape. These technologies offer immersive experiences, making events more engaging and interactive. Future MICE events will witness a greater focus on customization and personalization, catering to the specific needs and preferences of participants. This trend is expected to enhance attendee satisfaction and overall event success.

The future of MICE tourism in India looks promising, driven by several factors. The government’s focus on infrastructure development, coupled with the promotion of India as a preferred MICE destination, is expected to attract a larger share of the global business events market. The e-Tourist Visa (e-TV) scheme has streamlined the visa application process for foreign participants, recent PM’s call for ‘Wed in India’ has set the stage for influx of one lakh crore back in the country. Additionally, the emergence of tier-II cities as MICE hubs is diversifying the landscape and creating new opportunities for industry. With a strategic approach and collaborative efforts from stakeholders, MICE tourism is poised to become a driving force for economic growth, knowledge exchange, and cultural integration on a global scale.

BUSINESS AND/OR KEY INDUSTRY AND/OR TRADE RELATED LAWS AND REGULATIONS:

There are no specific key regulations applicable to our Business. General Corporate Laws apply to us as to any other company. However, some of the important ones, which need mention are as follows:

GENERAL CORPORATE LAWS:

Companies Act, 2013

The Companies Act, 2013, has replaced the Companies Act, 1956 in a phased manner. The Act received the assent of the President of India on 29th August 2013. The Companies Act 1956 is still applicable to the extent not repealed and the Companies Act, 2013 is applicable to the extent notified. The Companies Act deals with incorporation of companies and the procedure for incorporation and post incorporation. The conversion of private companies into public companies and vice versa is also laid down under the Companies Act, 2013. The procedure related to appointment of Directors, winding up, voluntary winding up, and appointment of liquidator also forms part of the Act. Further, Schedule V (read with sections 196 and 197), Part I lays down the conditions to be fulfilled for the appointment of a managing or whole-time director or manager. It provides the list of Acts under which if a person is prosecuted, he cannot be appointed as the director or Managing Director or Manager of a Company. The provisions relating to remuneration of the directors payable by the companies is under Part II of the said schedule.

The Indian Contract Act, 1872

The Contract Act is the legislation which lays down the general principles relating to formation, performance and enforceability of contracts. The rights and duties of parties and the specific terms of agreement are decided by the contracting parties themselves, under the general principles set forth in the Contract Act. The Contract Act also provides for circumstances under which contracts will be considered as ‘void’ or ‘voidable’. The Contract Act contains provisions governing certain special contracts, including indemnity, guarantee, bailment, pledge, and agency.

The Specific Relief Act, 1963

The Specific Relief Act is complementary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for the purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. Specific performance means the Court will order the party to perform his part of the agreement, instead of imposing on him any monetary liability to pay damages to another party.

Negotiable Instruments Act, 1881

In India, cheques are governed by the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. To ensure prompt remedy against defaulters and to ensure credibility of the holders of the negotiable instrument a criminal remedy of penalty was inserted in Negotiable Instruments Act, 1881 in form of the Banking, Public Financial Institutions and Negotiable Instruments Laws (Amendment), 1988 which were further modified by the Negotiable Instruments (Amendment and Miscellaneous Provisions) Act, 2002. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheques not being honored by their bankers and returned unpaid. Section 138 of the Act, creates statutory offense in the matter of dishonor of cheques on the ground of insufficiency of funds in the account maintained by

a person with the banker which is punishable with imprisonment for a term which may extend to two years, or with fine which may extend to twice the amount of the cheque, or with both.

Competition Act, 2002

The Act is to prevent practices having adverse effects on competition, to promote and sustain competition in markets, to protect interest of consumers and to ensure freedom of trade in India. The Act deals with prohibition of anti-competitive agreements. No enterprise or group shall abuse its dominant position in various circumstances as mentioned under the Act.

The Micro, Small and Medium Enterprises Development Act, 2006

In order to promote and enhance the competitiveness of Micro, Small and Medium Enterprise (MSME) the Act was enacted. With effect from July 01, 2020 the Manufacturing enterprises and enterprises rendering Services have been re-classified as Micro enterprise, where the investment in plant and machinery does not exceed Rs.1 Crore and annual turnover does not exceed Rs. 5 Crore; Small enterprise, where the investment in plant and machinery does not exceed Rs.10 crore and annual turnover does not exceed Rs. 50 Crore; a Medium enterprise, where the investment in plant and machinery does not exceed Rs. 50 crore and annual turnover does not exceed Rs. 250 Crore.

Consumer Protection Act, 2019(CPA)

The Consumer Protection Act, 2019 came into effect from 20th July, 2020 to empower consumers and help them in protecting their rights through its various notified rules and provisions like Consumer Protection Councils, Consumer Disputes Redressal Commissions, Mediation, Product Liability and punishment for manufacture or sale of products containing adulterant / spurious goods. It has been empowered to conduct investigations into violations of consumer rights and institute complaints / prosecution, order recall of unsafe goods and services, order discontinuance of unfair trade practices and misleading advertisements, impose penalties on manufacturers/endorsers/publishers of misleading advertisements. It introduces the concept of product liability and brings within its scope, the product manufacturer, product service provider and product seller, for any claim for compensation. The new Act provides for simplifying the consumer dispute adjudication process in the consumer commissions, which include, among others, empowerment of the State and District Commissions to review their own orders, enabling a consumer to file complaints electronically and file complaints in consumer Commissions that have jurisdiction over the place of his residence, videoconferencing for hearing and deemed admissibility of complaints if the question of admissibility is not decided within the specified period of 21 days.

TAX RELATED LEGISLATIONS:

Income Tax Act, 1961

The IT Act is applicable to every Company, whether domestic or foreign whose income is taxable under the provisions of the IT Act or Rules made thereunder depending upon its Residential Status and Type of Income involved. The IT Act provides for the taxation of persons resident in India on global income and persons not resident in India on income received, accruing or arising in India or deemed to have been received, accrued or arising in India. Every Company which is assessed for income tax under the IT Act is required to comply with the provisions thereof, including those relating to Tax Deduction at Source, Advance Tax, Minimum Alternative Tax and like. Every such Company is also required to file its returns by September 30 of each assessment year.

Goods and Services Tax Act, 2017

The GST Act levies indirect tax throughout India to replace many taxes levied by the Central and State Governments. The GST Act was applicable from July 1, 2017 and combined the Central Excise Duty, Commercial Tax, Value Added Tax (VAT), Food Tax, Central Sales Tax (CST), Introit, Octroi, Entertainment Tax, Entry Tax, Purchase Tax, Luxury Tax, Advertisement Tax, Service Tax, Customs Duty, Surcharges. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

EMPLOYMENT AND LABOUR LAWS:

The Code on Wages, 2019 (the “Code”)

The Code received the assent of the President of India on August 8, 2019. The provisions of the Code shall come into effect from the date notified in the Official Gazette by the Central Government. The Code will replace the four existing ancient laws namely (i) the Payment of Wages Act, 1936, (ii) the Minimum Wages Act, 1948, (iii) the Payment of Bonus Act, 1965, and (iv) the Equal Remuneration Act, 1976. The Code will apply to all employees and allow the Central Government to set a minimum statutory wage.

The four existing laws are as follows:

- **The Payment of Wages Act, 1936**

Payment of Wages Act, 1936, as amended by Payment of Wages (Amendment) Act, 2017 is aimed at regulating the payment of wages to certain classes of persons employed in certain specified industries and to ensure a speedy and effective remedy for them against illegal deductions or unjustified delay caused in paying wages to them. The Act confers on the person(s) responsible for payment of wages certain obligations with respect to the maintenance of registers and the display in such factory/establishment, of the abstracts of this Act and Rules made thereunder.

- **The Minimum Wages Act, 1948**

The Minimum Wages Act, 1948 came into force with an objective to provide for the fixation of a minimum wage payable by the employer to the employee. Every employer is mandated to pay the minimum wages to all employees engaged to do any work skilled, unskilled, and manual or clerical (including out-workers) in any employment listed in the schedule to this Act, in respect of which minimum rates of wages have been fixed or revised under the Act.

- **The Payment of Bonus Act, 1965**

The Act provides for payment of minimum bonus to factory employees and every other establishment in which 20 or more persons are employed and requires maintenance of certain books and registers and filing of monthly returns showing computation of allocable surplus, set on and set off of allocable surplus and bonus due.

- **The Equal Remuneration Act, 1976**

The Equal Remuneration Act, 1976 aims to provide for the payment of equal remuneration to men and women workers and for the prevention of discrimination, on the ground of sex, against women in the matter of employment and for matters connected therewith or incidental thereto. According to the Remuneration Act, no employer shall pay to any worker, employed by him/her in an establishment, a remuneration (whether payable in cash or in kind) at rates less favourable than those at which remuneration is paid by him to the workers of the opposite sex in such establishment for performing the same work or work of a similar nature. In addition, no employer shall for complying with the foregoing provisions of the Remuneration Act, reduce the rate of remuneration of any worker. No employer shall, while making recruitment for the same work or work of a similar nature, or in any condition of service subsequent to recruitment such as promotions, training or transfer, make any discrimination against women except where the employment of women in such work is prohibited or restricted by or under any law for the time being in force.

Occupational Safety, Health and Working Conditions Code, 2020

The Government of India enacted 'The Occupational Safety, Health and Working Conditions Code, 2019 which received the assent of the President of India on September 28, 2020. The provisions of this code will be brought into force on a date to be notified by the Central Government. It proposes to subsume 13 labour legislations, including the Factories Act, 1948, the Contract Labour (Regulation and Abolition) Act, 1970, the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979, that concern our business. Details of these existing Acts are as follows –

- **Contract Labour (Regulation and Abolition) Act, 1970**

The Contract Labour (Regulation and Abolition) Act, 1970 requires establishments that employ or have employed on any day in the preceding twelve months, 20 or more workers as contract labour to be registered. The Act requires the principal employer of an establishment to which the Contract Labour Act applies to make an application for registration of the establishment to employ contract labour in the establishment. Contractor to whom the Contract Labour Act applies is required to obtain a license and not to undertake or execute any work through contract labour except under and in accordance with the license issued. The Contract Labour Act imposes certain obligations on the contractor including the establishment of canteens, rest rooms, washing facilities, first aid facilities and provision of drinking water and payment of wages. In the event that the contractor fails to provide these amenities, the principal employer is under an obligation to provide these facilities within a prescribed time.

- **Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979**

This law is applicable to all the establishments employing 5 or more migrant workmen from other states. In addition to this, this law is also applicable to contractors who have employed 5 or more inter-State workmen. The establishment must be registered with the local authority while employing migrant workers. This means that an establishment is prohibited from employing migrant workers from other states if they do not have a certificate from the concerned authority. The same law applies to the contractors too who employ workers from one state and deploy them in other states. As per this law, the contractors deploying the migrant workers must provide terms and conditions of the recruitment to the workers. These are the remuneration payable, hours of work, fixation of wages and other essential amenities.

The Industrial Relations Code, 2020

The Government of India enacted 'The Industrial Relations Code, 2020' which received the assent of the President of India on September 28, 2020. It proposes to subsume three separate legislations, namely, the Industrial Disputes Act, 1947, the Trade Unions Act, 1926 and the Industrial Employment (Standing Orders) Act, 1946. Currently the laws are as follows –

- **Industrial Disputes Act, 1947**

The Industrial Disputes Act, 1947 provides the procedure for investigation and settlement of industrial disputes. When a dispute exists or is apprehended, the appropriate Government may refer the dispute to a labour court, tribunal, or arbitrator, to prevent the occurrence or continuance of the dispute, or a strike or lock-out while a proceeding is pending. The labour courts and tribunals may grant appropriate relief including ordering modification of contracts of employment or reinstatement of workers. This Act further provides for direct access for the workers to labour courts or tribunals in case of individual disputes and provides for the constitution of grievance settlement machineries in any establishment having 20 or more workers.

- **Trade Unions Act, 1926**

Provisions of the Trade Union Act, 1926 provide that any dispute between employers and workmen or between workmen and workmen, or between employers and employers which is connected with the employment, or non-employment, or the terms of employment or the conditions of labour, of any person shall be treated as trade dispute. For every trade dispute a trade union has to be formed. For the purpose of Trade Union Act, 1926, Trade Union means combination, whether temporary or permanent, formed primarily for the purpose of regulating the relations between workmen and employers or between workmen and workmen, or between employers and employers, or for imposing restrictive conditions on the conduct of any trade or business etc.

- **Industrial Employment (Standing Orders) Act, 1946 (the “Standing Orders”)**

The Standing Orders were passed by the Central Government to bring uniformity in the terms of employment in industrial establishments having 50 or more workmen employed, so as to minimize industrial conflicts. The Standing Orders play a key role in defining the terms and conditions of employment within an industrial establishment. The highlights of the Standing Orders are classification of workmen, manner of intimation to workers about work and wage related details, attendance and conditions for leaves, conditions of termination of employment and means of redressal for workmen in different matters.

The Code on Social Security, 2020

Our operations result in us being exposed to foreign currency risk on account of trade receivables, trade payables and borrowings. The foreign currency risk may affect our income and expenses, or our financial position and cash flows. The objective of our management of foreign currency risk is to maintain this risk within acceptable parameters, while optimizing returns.

Phased implementation of Unified Payments Interface

SEBI has Offer UPI Circulars in relation to streamlining the process of public offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.
- b) Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Offer is being made under Phase III of the UPI (on a mandatory basis).

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public offers shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Offer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The

Offer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
