SECTION III: RISK FACTORS

*An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 152, 104 and 198 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.*

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off.

INTERNAL RISK FACTORS

- 1. Substantial portion of our revenues has been dependent upon few customers, with which we do not have any firm commitments. The loss of any one or more of our major customers would have a material adverse effect on our business, cash flows, results of operations and financial condition.***

The substantial portion of our revenues has been dependent upon few customers. For instance, our top 10 customers for the period ended September 30, 2024 and for the financial year ended on March 31, 2024, March 31, 2023 and March 31, 2022 accounted for 57.93%, 53.93%, 64.63% and 60.77% of our revenue from operations for the respective year. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favorable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial

condition and cash flows. Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

2. *An increase in raw material prices and fluctuations may adversely impact our business, financial condition, and operational results.*

The raw material consumption contribution is 64.19%, 63.68%, 67.60% and 80.44% of revenue from manufacturing activities for the period ended September 30, 2024 and financial year ended March 31, 2024, 2023 and 2022 respectively. We are vulnerable to the risk of rising and fluctuating prices of raw materials which are determined by demand and supply conditions in the global and Indian markets. Any unexpected price fluctuations after placement of orders, shortage, delay in delivery, quality defects, or any factors beyond our control may result in an interruption in the supply of such materials and adversely affect our business, financial performance and cash flows.

Our manufacturing operations may face significant cost overruns or losses due to unforeseen cost increases arising from factors such as raw material shortages or price fluctuations, production costs, changes in taxation or regulatory requirements, delays in statutory approvals, supply chain disruptions beyond our control, unexpected design or engineering challenges, adverse weather conditions, or force majeure events. Any of these factors could impact our profitability and adversely affect our overall financial performance.

Additionally, we do not enter into long-term supply agreements with our suppliers and purchase all raw materials on a need basis, primarily through the spot market purchase mechanism. We aim to source these materials from a diverse range of suppliers. However, we may face risks associated with compensating for or passing on increased production costs due to fluctuations in raw material prices to our customers. Upward fluctuations in raw material prices can directly or indirectly affect our margins, which in turn may have a significant impact on our profitability, resulting in a material adverse effect on our business, financial condition, and results of operations. In recent years, the demand for industrial rubber products has been increasing, leading to the continued expansion of the industry. This growth may result in industry-wide fluctuations in the supply of raw materials due to the rising demand for rubber products. We may occasionally experience late deliveries from suppliers, forcing us to purchase raw materials at higher prices or with lower conversion efficiencies and specifications. Such issues could result in reduced revenues and adversely affect our business operations."

There can be no assurance that the current procurement efforts will be successful in ensuring an adequate supply of raw materials at viable prices to meet our production requirements. If we are unable to meet customer demand for our products or if our products are only available at a higher price because of a shortage of raw materials, we could lose customers, market share and revenue. Further, many of our competitors, that also purchase raw materials from our suppliers, may have stronger relationships as well as greater bargaining power with the suppliers. This may materially and adversely affect our business, financial condition, results of operations and cash flow.

In addition, any restrictions imposed by the Central or State governments, or any adverse changes in policies or regulations related to the supply of our raw materials, could negatively impact our business, prospects, financial condition, and results of operations. While we do not rely on imports for our raw materials, any unforeseen restrictions, changes in tariffs, or non-tariff barriers affecting domestic suppliers or supply chains could still lead to disruptions. Such changes could impact the availability, cost, and timely delivery of raw materials, potentially affecting our ability to meet production schedules and customer demands. Furthermore, there can be no assurance that we would be able to quickly identify alternate suppliers or secure favorable terms for raw materials in case of such disruptions. Any such challenges may adversely affect our operations and business performance. For further details, kindly refer section titled "***Financial Information of the Company***" beginning on Page 152 of this Draft Red Herring Prospectus.

3. *We are primarily dependent upon few key suppliers within limited geographical location for procurement of raw materials. Any disruption in the supply of raw materials from such selective suppliers and geographical location could have a material adverse effect on our business operations and financial conditions.*

We procure a large portion of our raw materials from a few key suppliers, with whom we do not have any long-term supply contracts and therefore, we cannot assure you that we shall always have a steady supply of raw materials at prices favourable to us. For the period ending September 30, 2024 and financial year ended March 31, 2024, 2023 and 2022, purchases from our top ten suppliers amounted to Rs. 2262.53 Lakhs, Rs. 4796.34 Lakhs, Rs. 4818.77 Lakhs and Rs. 4990.96 Lakhs respectively which represented 80.23%, 78.54%, 84.02% and 72.08% of our total raw material purchases.

Further, we source major portion of our raw materials requirement indigenously. Major portion of our purchases of raw materials for the period ending September 30, 2024 and financial year ended March 31, 2024, 2023 and 2022 is from the state of Telangana which is 68.25%, 75.78%, 76.69% and 63.82% of the total purchases of raw material, respectively, for the said period.

Inadequate supply of raw material caused either by a sudden loss of any of our existing major vendors for any reason could have a material adverse effect on our business operations and profitability. Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments of Telangana may affect continuing operations at our manufacturing unit and result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry.

Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers in may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms. Further, the Company engages with various MSME enterprises on mutually agreed terms and conditions. As per the MSMED Act, 2006, we do not make any interest provisions on delayed payments. Any future liability arising from interest payments under the Act may result in financial obligations, which could materially and adversely impact our business, prospects, financial condition, and operational results.

4. *We are subject to strict quality requirements, customer inspections and audits, and any failure to comply with quality standards may lead to cancellation of existing and future orders and could negatively impact our reputation and our business and results of operations and future prospects*

We specialize in the manufacturing and supply of industrial rubber products with a strong emphasis on Railway and Infrastructure applications. Given the critical nature of our products and the sectors we serve, we understand that our customers demand stringent adherence to product quality standards and delivery timelines. Compliance with these standards is paramount, as any defect in our products or failure to meet customer specifications may lead to operational inefficiencies, structural weaknesses, or safety hazards in end applications. Faults or defects in our products, such as Elastomeric Bridge Bearings, POT-PTFE Bearings, Spherical Bearings, or Expansion Joints, could result in design failures, compromised load-bearing capacity, safety risks, or structural instability. These defects, whether due to material, manufacturing, or design issues, may lead to project delays, regulatory penalties, or loss of customer confidence. In severe cases, it may also result in product recalls or legal liabilities, all of which could have a significant financial and reputational impact on our business.

Our manufacturing facilities, processes, and products are subject to frequent inspections and audits by regulatory bodies, third-party agencies, and our customers to ensure compliance with stringent quality and safety standards. Any non-compliance, whether real or perceived, discovered during these inspections could lead to order cancellations, financial penalties, or restrictions on future orders. Furthermore, adverse audit findings or negative publicity related to product quality, compliance failures, or safety concerns could damage our reputation, disrupt our operations, and adversely affect our financial performance and future growth prospects. We remain committed to maintaining the quality standards across all stages of production, from raw material procurement to final product delivery, to ensure the reliability and durability of our offerings in Railway and Infrastructure applications.

5. *We may not have adequate experience in manufacturing of products which are proposed to be manufactured by Machineries to be acquired from Object of the Issue.*

While we are venturing into the manufacturing of a new product, “conveyor rubber belts”, with the help of new machinery to be acquired from the issue proceeds, we acknowledge that this is a new area for us. We have been primarily engaged in the

manufacturing of specialized rubber solutions for railways, infrastructure, and commercial applications, and this expansion marks our entry into a new product line.

Since, we do not have prior experience of manufacturing of a new product, “conveyor rubber belts”, we may not assure you about future demand and quality of the products. Further, we may not assure that production of these products will be fully consumed. Non demand, quality issue, customer’s response may thereby affect our revenue directly or indirectly and thereby have a direct bearing on our profitability, resulting in a material adverse effect on our business. financial condition and results of operations.

6. *Our Company is yet to place orders for the machinery for the expansion of the proposed manufacturing unit. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.*

Our Company proposes to acquire plant and machinery for the modernization of existing equipment and the commencement of a new product line—Conveyor Belting Unit—at our existing manufacturing facility, at an estimated cost of ₹1,491.91 Lakhs. Our Company has received third party quotations for the machineries proposed to be installed at our existing Manufacturing unit in Kucharam Village, Manoharabad Mandal, Medak, Telangana. Although we have identified the type of machineries proposed to be purchased from the Net Proceeds, we are yet to place orders for all the proposed machineries. The cost of the proposed purchase of machinery is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure that we will be able to procure the machinery at the quoted prices. The actual cost of procurement may vary due to factors including but not limited to foreign exchange fluctuations, changes in taxes and duties, and availability of vendors. Such variations may affect our cost estimates. For comprehensive details regarding the machinery acquisition plan, including detailed breakdowns of machinery types, specifications, and vendor information, please refer to the chapter titled “*Objects of the Issue*” beginning on page 75 of this Draft Red Herring Prospectus.

We cannot assure that we will be able to procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the Machinery or in the event the vendors are not able to provide the machinery in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of the Manufacturing unit. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

Further, after procurement of new machineries, we may face a risk that our expected capacity expansion may not be absorbed by the market, if future sales are insufficient to break even the production from new unit. This could adversely impact the company’s existing profitability and the financial position.

7. *We generate our major portion of turnover from our operations in certain geographical regions and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations*

We generate our major turnover from the State of Telangana. For the period ended September 30, 2024 and for the financial year ended March 31, 2024, March 31, 2023 & March 31, 2022, we derived major portion of our revenue from the state of Telangana i.e. 32.38%, 45.23%, 36.35 and 10.57% of total revenue from operations, respectively. For details related to total revenue from operations, kindly refer section titled “*Financial Information of the Company*” beginning on Page 152 of this Draft Red Herring Prospectus.

We carry our entire manufacturing operations from our manufacturing unit located at Kucharam Village, Manoharabad Mandal, Medak, Telangana, due to the geographical concentration of our manufacturing operations at Telangana, our operations are prone to local, regional and environmental factors. Any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments, may require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing unit could result in significant loss due to an inability to meet customer orders and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. We also sell our products in the state of Tamil Nadu, Maharashtra, Rajasthan, Gujarat, West Bengal, Andhra Pradesh, Punjab, Chhattisgarh, Bihar, Assam, Karnataka, Uttar Pradesh, Odisha etc. Further, we plan to enter into new geographical location in India and exports to countries like: USA in order to capture future growth trends, thus we are likely to compete with new/existing players in said location, who might have an established presence in the particular region, and are more familiar with the business practices and have stronger relationships with customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive

advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations.

8. Our Company is involved in certain legal proceedings and potential litigations. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties/prosecutions and may adversely affect our business and results of operations.

Our Company is currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals, and government departments. The summary of outstanding litigation in relation to taxation matters, statutory or regulatory laws filed by or against our Company and Directors have been set out below.

Tax Proceedings (Direct Tax & TDS)^	13	53.18
Tax Proceedings (Indirect Tax)^	13	235.06
	26	288.24

*To the extent quantifiable

^The number of cases outstanding and the amount in dispute include matters pertaining to Cemcon Rubber Private Limited, which was amalgamated with our Company as per the order dated July 29, 2022.

For further details, see “**Outstanding Litigation and Material Developments**” beginning on page 207 of this Draft Red Herring Prospectus. Any adverse decisions in the aforesaid proceedings may have a material effect on our business, future financial performance and results of operations. If the courts or tribunals rule against our Company, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

9. Our Business is dependent on our manufacturing unit. Any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing unit, may have a material adverse effect on our business, results of operations, financial condition and cash flows.

We have a manufacturing unit at Kucharam Village, Manoharabad Mandal, Medak in Telangana which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe climate conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our facilities for cleaning and maintenance, statutory inspections and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Obsolescence, destruction, theft or breakdowns of our machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations.

Although we have not experienced any significant disruptions at our manufacturing unit in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations for limited time or under-utilization of our manufacturing unit, which in turn may have an adverse effect on our business, results of operations and financial condition.

10. Our main operations may be adversely affected in case of industrial accidents at our manufacturing unit and also rubber is a combustible commodity which may lead to any fire mishaps or accidents that could lead to property damages, property loss and accident claim.

Rubber being a combustible commodity, every stage from procurement, processing, storage and transportation to final dispatch is fraught with an imminent danger of an instant fire. Our Company has had no such incident of fire mishaps or accident at the Company's Manufacturing Facilities in the last three Fiscals. The risk of fire hazard is increased due to increased automation and use of large volume of air for material handling. Any spark generated can not only generate fire but also the same could propagate to other machines through spread of fire by rubber's flammability. Though we have taken insurance policy to cover damage caused by fire however, the cover may not be adequate to the loss suffered.

For further details of our Business, please refer to chapter titled "**Business Overview**" beginning on page 104 of this Draft Red Herring Prospectus.

11. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate and other law could impact the reputation and financial position of the Company to that extent

We manage regulatory compliance by monitoring and evaluating our internal controls to ensure adherence to all relevant statutory and regulatory requirements. However, we cannot guarantee that deficiencies in our filings will not arise in the future or that we will be able to effectively implement or maintain adequate measures to rectify or mitigate any deficiencies in our internal controls. Several discrepancies have been noted in our corporate records related to e-forms filed with the Registrar of Companies, for instance Our Company failed to file Form CRA-2 for the appointment of a Cost Auditor for the financial year 2021–22 and Form MSME-1, as required under the Companies Act, 2013.

The Company also failed to file Form CHG-1 for the creation of charges on certain vehicle loans and other loans, constituting non-compliance with Section 77 of the Companies Act, 2013. However, some of these vehicle loans have been repaid as of the date of this Draft Red Herring Prospectus (DRHP). Despite meeting the threshold for preparing cost records in FY 2021–22, the Company did not prepare the same for FY 2021–22 and subsequent years, as mandatory under Section 148 of the Companies Act, 2013. For the financial years 2014–15 and 2015–16, the Statutory Auditors were appointed for a single year instead of the required five-year term, in violation of Section 139 of the Companies Act, 2013. This discrepancy has since been rectified with the appointment of auditors for a five-year term from FY 2016–17 to FY 2021–22. Further, Our Company did not file the Cash Flow Statement in the Form AOC-4 filed by the Company for FY 2014–15 to FY 2022–23. Our Company had taken a loan from a person other than the directors, their relatives, or shareholders, which constituted non-compliance with Section 73 of the Companies Act, 2013. However, the loan has been fully repaid as of the date of this Draft Red Herring Prospectus (DRHP). Further, Our Company has inadvertently given to loan to director and its relative during 2022-23 which is the non –compliance under section 185 of the Companies Act, 2013, However the same loan has been repaid as on the date of DRHP.

Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business.

Further, in the past, our Company has made certain clerical errors in documents and forms filed with the Registrar of Companies. For instance, in the financial year 2005–06, our Company inadvertently filed two PAS-3 forms for the allotment of the same number of shares; however, only one of these filings was reflected in the financial statements and annual return. Additionally, the annual return filed for the financial year 2012 contained an incorrect list of shareholders. There was also a clerical error in Form ADT-1 filed for the appointment of auditors during 2014–15. Furthermore, the Company inadvertently omitted the details of its subsidiary in the Board Report filed for 2020–21.

The share transfer deed in respect to transfer of shares of our Company during 2010 are not traceable. Accordingly, we have relied on the other corporate records maintained by the Company such as statutory registers, Annual returns filed with RoC to ascertain the information for the missing corporate records. In the absence of share transfer deed, it would be difficult for us to withstand any legal action being initiated against us. Though, no legal proceedings or regulatory action has been initiated against us in relation to the unavailable filings and statutory lapses as of the date of this Draft Red Herring Prospectus, we cannot assure you that such proceedings or regulatory actions will not be initiated against us in the future in relation to the missing filings and corporate records.

Further, our Company has not complied with certain Accounting Standards, for instance AS-18, however the same have been duly complied by the company in the restated financial statements. For details regarding impact of such non-compliance on the financials, please refer to section titled "**Financial information of the company**" beginning on page 152 of this Draft Red Herring Prospectus. As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation

12. We derive a limited portion of our revenues from various countries outside India. Any adverse developments in these markets, along with fluctuations in exchange rates, may negatively impact our results of operations.

Our Company has diversified revenue from multiple geographical locations, including export sales to countries including Saudi Arabia, Tanzania, Malawi, Nepal, Iraq, Poland etc. Revenue from the sale of products outside India amounted to ₹ 508.23 Lakhs, ₹363.70 Lakhs, ₹560.97 Lakhs and ₹436.71 Lakhs for the period ending September 30, 2024 and financial year ended March 31, 2024, 2023 and 2022, respectively, representing 12.91%, 4.36%, 7.57% and 5.11% of our revenue from product sales in such periods, respectively.

Our revenues from the export of goods may decline due to increased competition, regulatory actions, pricing pressures, fluctuations in the demand for or supply of our products, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively respond to these situations or successfully introduce new products could adversely affect our business prospects, results of operations, and financial condition. Additionally, international operations are subject to risks specific to each country and region in which we operate, as well as risks associated with international business in general. These risks include complying with changes in foreign laws, regulations, and policies, such as restrictions on trade, import and export license requirements, tariffs and taxes, intellectual property enforcement issues, and changes in foreign trade and investment policies.

Further, due to such export transactions conducted in foreign currencies, including the US dollar, NPR, Saudi riyal and other foreign currencies, we are exposed to foreign exchange-related risks. While we make provisions for foreign exchange fluctuations, significant or frequent changes in the exchange rate between the Indian Rupee and other currencies may adversely affect our results of operations. The exchange rate between the Indian Rupee and foreign currencies, primarily the USD, has fluctuated in the past and has impacted our results of operations. For example, when the Indian Rupee strengthens, our revenue from overseas offerings is negatively impacted as foreign currency received translates into fewer Indian Rupees. However, the depreciation of the Indian Rupee may not consistently show a positive effect due to other variables impacting our business during the same period.

Our ability to foresee future foreign currency fluctuations is limited. Due to the time gap between the accounting of sales and actual receipts, the foreign exchange rate at which sales are recorded in our books may differ from the rate at which receipts are made. This can benefit or adversely affect us, depending on the appreciation or depreciation of the Rupee. We may be exposed to risks arising from exchange rate fluctuations and may not always be able to pass on losses due to foreign currency fluctuations to our clients, potentially resulting in losses. There is no guarantee that we will effectively manage foreign currency risks or mitigate exchange exposures at all times, which could harm our results of operations and cause fluctuations in our financial performance.

13. Our manufacturing activities require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.

Our manufacturing operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, there have been amendments in the labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may lead to increasing cost of compliance, wages, social security, Occupational Safety, Health and Working Conditions. We cannot assure you that we will continue to comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase.

We appoint contract labour for carrying out certain operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition. In the event any regulatory body or court passes orders which require us to regularize any of the casual or contract laborers as regular employees, it may have an adverse effect on our business, results of operations and financial condition due to the various factors including increase in wages.

14. Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.

Our revenue from operations declined from ₹8,550.77 lakhs in FY 2021-22 to ₹7,408.48 lakhs in FY 2022-23, followed by a recovery to ₹8,333.84 lakhs in FY 2023-24. While there was a temporary decline, our business has shown resilience, and we continue to focus on sustainable growth. However, we acknowledge the dynamic nature of our industry and the challenges that come with sustaining growth rates. While our past performance reflects our ability to capitalize on market opportunities, we cannot guarantee continuous revenue growth at the same pace.

In the rubber products manufacturing industry, we face competition from both organized and unorganized players across various regions in India. These competitors offer similar products and may gain an advantage in terms of pricing, durability, product quality, user experience, operational efficiency, timely delivery, and reliability. Adapting to the rapidly evolving technology landscape is crucial, and our ability to stay ahead will significantly impact our competitive standing.

Additionally, several of our strategic initiatives are still in their early stages. While we anticipate positive outcomes, long-term success is not assured. The uncertainties associated with new initiatives require a cautious approach, and we may face challenges and necessary adjustments along the way. We remain vigilant and adaptable, continuously refining our strategies to navigate market shifts and optimize our growth potential.

15. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products, and reduce our attractiveness to our customers.

As our operations grow in scope and size, whether through offering of new products or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced products, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. For further details regarding our business, please refer to chapter titled “***Business Overview***” beginning on Page 104 of this Draft Red Herring Prospectus.

16. Our Company operates under several statutory and regulatory approvals in respect of our operations. Failure to obtain or maintain licenses, registrations, permits and approvals may affect our business and results of operations.

Our business operations require various statutory and regulatory permits, licenses, and approvals. We believe we have obtained the necessary authorizations; however, we cannot guarantee full compliance with all statutory or regulatory requirements. Additionally, certain approvals are granted for fixed periods and require periodic renewal. We are in the process of renewing specific licenses, including a pending Trade License application and renewal applications for the Government Purchase Enlistment Certificate and Store Details Certificate. Moreover, We are yet to update the new Kucharam factory address in PF registration certificate which is currently have Nacharam Factory Address and yet to initiate the application process for the Shop and Establishment License for our Registered Office and godowns in Hyderabad. There is no assurance that the relevant authorities will grant or renew these approvals in a timely manner or at all. Any failure to obtain, renew, or maintain the necessary permits and licenses could disrupt our operations and have a material adverse impact on our business, financial condition, and results of operations.

Also, our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company’s former name. For details regarding pending approvals, please refer to section titled “***Government and Other Approvals***” beginning on page 212 of the Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

17. We do not own the registered office & godowns from which we carry out our business activities. In case of nonrenewal of rent agreements or dispute in relation to use of the said premise, our business and results of operations can be adversely affected.

Our registered office & godowns, from which we carry out our corporate business activities, are being taken by us on rent. In the event of termination/non-renewal of said agreements, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled “***Our Business***” beginning on page 104 of this Draft Red Herring Prospectus.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favourable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our corporate operations which could materially and adversely affect our business, financial condition and results of operations. Our Company had negative cash flow from operating, investing and financing activity in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business and financial condition

18. Our Company had negative operating cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of operating cash flows is summarized in below mentioned table and our Company has reported negative operating cash flow. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

(₹ in lakhs)

Particulars	For the period and financial year ended			
	September 30, 2024	F.Y. 2023-24	F.Y. 2022-23	F.Y. 2021-22
Net Cash flow from Operating Activities	361.59	(335.54)	215.64	1069.42
Net Cash flow from Financing Activities	83.65	930.95	208.31	(652.08)
Net Cash flow from Investing Activities	(433.82)	(709.60)	(303.93)	(711.89)

Cash flow of a company is a key indicator to show the extent of cash generated from operations. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

For further details of the cash flows of the company, kindly refer section titled “*Financial Information of the Company- Cash Flow Statements*” beginning on Page 158 of this Draft Red Herring Prospectus.

19. Certain of our operations are still being carried out under the name of Cemcon Rubber Private Limited, despite the amalgamation with Our Company.

We expanded inorganically through the amalgamation of Cemcon Rubber Private Limited into our Company, as per the NCLT order dated July 29, 2022. However, certain invoices are yet to be raised under the name of Cemcon Rubber Private Limited for pending payments from Indian Railways, particularly under the Price Variation Clause. As a result, we have not surrendered the PAN, GST registration, and bank account of Cemcon Rubber Private Limited. These payments remain associated with Cemcon Rubber Private Limited instead of being fully transitioned to our Company, creating several risks.

We may face potential regulatory non-compliance under Income Tax and GST, as Cemcon Rubber Private Limited no longer legally exists, which could lead to penalties or legal challenges. Stakeholders, including suppliers, customers, and business partners, may experience confusion regarding the entity they are transacting with, leading to inefficiencies or disputes. Additionally, enforcing legal rights or fulfilling contractual obligations signed under the name Cemcon Rubber Private Limited post-amalgamation may become complicated. Any work conducted under this name may expose us to legal risks, as liabilities arising from such contracts could be attributed to our company.

The continued use of the old name may also create the perception of incomplete integration, potentially affecting stakeholder confidence and damaging our reputation. While we are actively working to consolidate all operations, branding, and records under our company, we cannot guarantee a swift or seamless transition. Any delays or challenges in this process could adversely impact our business, operations, financial performance, and reputation.

20. We may face liabilities related to our previous factory location due to the absence of required government approvals and licenses.

Our Company has previously shifted its factory unit from Plot No. P9/18, Road No. 8, IDA Nacharam, Hyderabad, Telangana, 500076 to a new facility at Plot No. 3, Sy. No. 228/9, Kucharam Village, Manoharabad Mandal, Hyderabad, Telangana 502336. However, we have not yet surrendered the Factory License for the previous unit. Situated at Nacharam. Additionally, apart from the Factory License, the Company does not possess Pollution Clearance or other necessary regulatory approvals for the said premises. The facility is currently being used by the company as a Godown

In the past, our Company operated from this location without obtaining the required statutory approvals (except factory license). If the appropriate authorities take cognizance of this matter under the relevant labour, environmental, and industrial laws, the Company and its officers in default may be subject to penalties and prosecution under the applicable legal provisions. Any such action may have an adverse impact on our business operations, financial condition, and reputation.

21. We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on September 30, 2024, our total outstanding indebtedness was Rs. 3804.31 lakhs

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;

3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “*Statement of Financial Indebtedness*” on page 195 of this Draft Red Herring Prospectus.

22. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards

As we continue to grow our business and expand into newer markets, we may face several challenges, including as set forth below:

- i. acquiring new customers;
- ii. identifying customer requirements and preferences in such markets;
- iii. obtaining approvals and certifications for our products;
- iv. making accurate assessments of the resources we will require;
- v. preserving a uniform culture, values and work environment;
- vi. developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- vii. recruiting, training and retaining sufficient skilled management, technical and marketing personnel;
- viii. maintaining high levels of customer satisfaction; and
- ix. adhering to expected performance and quality standards.

In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

23. Rubber is an agro-commodity and a key raw material for our business. Any disruptions in production, price volatility, or regulatory challenges can impact our operations.

Our business relies on both natural and synthetic rubbers as essential raw materials, and any disruptions in their supply or fluctuations in price can significantly impact our operations. Natural rubber, being an agro-commodity, is highly vulnerable to factors such as adverse weather conditions, pests, and diseases, which can lead to production shortfalls and delays in the supply chain. Since rubber production is concentrated in a few countries, geopolitical tensions or trade disruptions in these regions can further exacerbate supply shortages, directly affecting our business.

Moreover, the price of rubber is subject to high volatility, driven by global supply and demand dynamics, fluctuations in crude oil prices (which influence synthetic rubber), and market speculation. Sudden increases in rubber prices can raise procurement costs, squeezing profit margins and forcing us to adjust our pricing or production schedules, which can disrupt our operations.

In addition, regulatory challenges, such as stricter environmental laws or sourcing restrictions, can hinder rubber production and trade. For example, stricter regulations in rubber-producing countries may limit supply or increase sourcing costs, leading to operational delays and higher expenses, which could significantly disrupt our business operations.

24. Some of the properties Used by our Company are not registered in our name

Our Company is currently using the following properties as godowns:

- a. Shop No. S4, 2nd Floor, S.A. Trade Center, Ranigunj, Secunderabad, Telangana, India
- b. Shop No. S3, 2nd Floor, S.A. Trade Center, Ranigunj, Secunderabad, Telangana, India
- c. Shop No. S2, 2nd Floor, S.A. Trade Center, Ranigunj, Secunderabad, Telangana, India

These properties are still registered in the name of Cemcon Rubber Private Limited, which has been amalgamated with our Company. Despite the amalgamation, the ownership records for these properties have not yet been updated to reflect our Company's name.

This discrepancy may expose us to potential risks, including disputes over ownership, administrative delays, and challenges in asserting our legal rights over these properties. Additionally, any legal or regulatory non-compliance related to this matter could lead to financial liabilities, penalties, or reputational harm. While we are actively working to resolve this issue, there can be no assurance that it will be addressed promptly or without adverse consequences.

25. *Changes in technology render our current fleet of equipment obsolete and require us to make substantial capital investments.*

Our fleet of equipment for production of rubber products for railway, infra and commercial uses are subject to continuous change and development. Our inventory of existing equipment becomes obsolete on introduction of newer and better technologies. We must continuously update our existing equipment in order to meet our clients' requirements and remain competitive in the market. In addition, rapid and frequent technological and market demand changes often render our equipment obsolete and result in requirements for additional and substantial capital expenditures and/ or significant write downs of our assets. The cost of upgrading our existing equipment could be significant. Our inability to successfully adopt new technologies in a cost effective and a timely manner could increase our costs and adversely affect our competitive position in terms of pricing or quality of service. Further, if we fail to anticipate or respond adequately to our clients' changing requirements or keep pace with the latest technological developments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

26. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customer's discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. In the ordinary course of business, we extend credit to our customers. Our results of operations and profitability depend on the creditworthiness of our customers. Certain of these customers may have weak credit histories and we cannot be assured that these counterparties will always be able to pay us in a timely fashion, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us. Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition.

27. *Our operating results could be materially harmed if we are unable to accurately forecast customer demand for our products or manage our inventory.*

We strive to keep optimum inventory to control our costs and working capital requirements. To maintain an optimal inventory, we monitor our inventory levels based on our projections of demand as well as on a real-time basis, hence the balance of the inventory can be maintained, but we need to keep a strict check on the requirement. However, unavailability of products, due to high demand or inaccurate forecast, may result in loss of sales and adversely affect our customer relationships. We manage our inventory by constantly monitoring and tracking our current inventory levels, while keeping a small portion of reserve stock, based on our forecast customer demand. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. Inventory levels in excess of customer demand may result in inventory write-offs and the sale of excess inventory at discounted prices, which may cause our gross margin to suffer and could impair the strength of our brand. On the other hand, in the case we experience shortage of products, we may be unable to meet the demand for our products, and our business and operating results could be adversely affected.

Therefore, an inaccurate forecast can also result in an over-supply of products, which may increase inventory costs, negatively impact cash flow, reduce the quality of inventory, shrinkages and ultimately lead to reduction in margins. Further, some of our products can become obsolete in terms of designs, and any inventory that we hold with respect to old designs may not get sold or replaced by our suppliers. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition. During the stub period ended on September 30, 2024 and Fiscal 2024, 2023 and 2022 our inventories were Rs 3869.08 lakhs, Rs. 3120.30 lakhs, Rs 2065.69 lakhs and Rs 1172.59 lakhs. For details regarding inventories, please refer to section titled "**Financial information of the company**" beginning on page 152 of the Draft Red Herring Prospectus.

28. *Our Company may not be successful in penetrating new export markets*

Expansion into new export markets subjects us to various challenges, including those relating to our lack of familiarity with the culture and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations and the lack of reputation in such regions. In addition, the risks involved in entering new geographic markets and expanding operations,

may be higher than expected, and we may face significant competition in such markets for instance we are exploring possibilities of entering into new International Markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including compliance with a wide range of laws, regulations and practices; exposure to other government actions; and political, economic and social instability

29. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

Our operations are subject to accidents which are inherent to any business such as risks of employee accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environment. We have taken New India Bharat Laghu Udyam Suraksha policy and New India Bharat Sookshma Udhya Suraksha Policy from The New India Assurance Co. Ltd. for our Registered office, manufacturing unit and other premises which provide insurance to building, Plant & Machinery, stock and furniture against loss from fire, theft, explosion, lighting, earthquake, terrorism etc. We have taken group accident guard policy for permanent total and partial disability, accidental death and also taken TATA AIG Medicare Policy for employees of the Company. Our Company has also taken vehicle insurance policy such as The Bundled Auto Secure Private Car Package Policy which covers own damage and third-party liability and Digit Private Car Stand-alone Own Damage Policy covers damage caused by fire, explosion, theft, riot, or strike. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as cash in transit, machinery breakdown insurance, key-men insurance policy for KMP and few Godown of the Company. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

30. The Logo used by our Company is currently under process of registration under Trade Marks Act, 1999. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.

Our Company is using a logo that is not currently registered. We have applied for its registration under eight different classes of the Trade Marks Act, 1999. The status of all such applications is "Formalities Check Pass." However, as of the date of this draft, the trademark has not been granted or approved, and we do not enjoy the statutory protections associated with a registered trademark.

The unauthorized use of our logo by third parties could harm our reputation, which, in turn, could adversely affect our business and operational results. There is no assurance that our trademark applications will be approved. Third parties may oppose these applications or otherwise challenge our use of the logo. If our logo or wordmark is successfully challenged, we may be required to rebrand, leading to the loss of existing brand recognition and necessitating substantial investments in advertising and marketing for a new brand. If our intellectual property rights are found to be inadequate or insufficiently protected, our business, financial condition, and results of operations could be adversely affected. An adverse decision by the Registrar of Trade Marks may impact our ability to use the applied-for trademarks. Additionally, unauthorized use of our trademarks or logos by third parties could harm our reputation and, consequently, our business and operational performance. For further details, please refer to “**Our Business – Details of Intellectual Property**” on page 115.

Despite our efforts to safeguard our intellectual property, there is no assurance that third parties will not infringe upon it. Such infringement could damage our business prospects, reputation, and goodwill. Inadequate measures to protect our intellectual property may erode our business value and adversely affect our operations.

31. Under-utilization of our manufacturing capacities may have an adverse effect on our business, future prospects and future financial performance. Moreover, information relating to capacity utilization of our production facility included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Our capacity utilization is affected by the availability of raw materials, industry and market conditions as well as by the product requirements of, and the procurement practice followed by, our customers. In the event that we are unable to achieve full capacity utilization of our current manufacturing facility, this would result in operational inefficiencies which may have an adverse effect on our business, financial condition, cash flows, future prospects and future financial performance. For further details in relation to our capacity utilization, see “**Our Business**” on page 104 of the Draft Red Herring Prospectus.

Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could adversely impact our business, growth prospects and future financial performance. In case of oversupply in the industry or lack of

demand, we may not be able to utilize our capacity efficiently. Further information relating to capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization of our facility. Undue reliance should therefore not be placed on our capacity utilization information for our existing facility included in this Draft Red Herring Prospectus. For further information, see the section titled **“Our Business”** on page 104 of this Draft Red Herring Prospectus.

32. Delay in Investment in Foreign Subsidiary may lead to Non-Compliance with FEMA Regulations

Our Company has a foreign subsidiary, Ameenji Rubber INC, incorporated in the State of North Carolina, United States of America, on March 19, 2024. Our Company subscribed to its shares on June 21, 2024; however, we have not yet made any investment in the subsidiary due to delay in opening of its bank account, which is a prerequisite for transferring funds as equity into the company. Despite this delay, Ameenji Rubber INC continues to be classified as a subsidiary of our Company.

Under the Foreign Exchange Management Act, 1999 (FEMA) and the Foreign Exchange Management (Transfer or Issue of any Foreign Security) Regulations, 2004, our company was required to comply with certain reporting obligations, such as filing Form ODI (Overseas Direct Investment), when subscribing or making investments by way of remittance of funds to a foreign entity effective from the date of subscription or remittance, whichever is earlier, for any subsidiary outside India. Any further delay in opening the requisite bank account of the subsidiary and remitting funds may result in non-compliance with FEMA regulations, which could lead to regulatory scrutiny and compounding penalties under Section 13 of FEMA, and reputational risks.

We are in the process of addressing the delay and ensuring compliance with all applicable regulations to regularize the investment in our foreign subsidiary.

Information relating to our installed capacities and the capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, actual product mix vis-à-vis the products mix envisaged for computation of our installed capacity and assumptions relating to potential utilization levels and operational efficiencies. While we have obtained a certificate dated January 28, 2025, from Mr. P. Kanaka Rao, Chartered Engineer, actual capacities and utilization rates may differ significantly from the estimated installed capacities or estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our installed capacity or estimated capacity utilization information for our existing facility included in this Draft Red Herring Prospectus.

For further details of our Business, please refer to chapter titled **“Business Overview”** beginning on page 104 of this Draft Red Herring Prospectus.

35. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.

Our Company has entered into various transactions with our directors, promoters and group companies. These transactions, inter-alia includes purchases, sales, loans and advances etc. For details, please refer to **“ANNEXURE-Y- Related Party Transactions”**

under Section titled “**Financial Information of the Company**” and Chapter titled “**Capital Structure**” beginning on page 188 and 63 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

36. *Activities involving our manufacturing process can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facility may adversely affect our production schedules, costs, sales and ability to meet customer demand.*

Although we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facility. An accident may result in personal injury to our employees, destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. While we have not experienced any interruption in our manufacturing activities in the past on account of any workplace accident, any future interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

37. *We operate in a competitive business environment. Failure to compete effectively against our competitors and new entrants in the industry in any of our business segments may adversely affect our business, financial condition and results of operations*

Due to our diversified product portfolio, we compete with various companies for each of our business segments. Our competitors range from small start-up companies to larger companies which have significantly greater resources and broader product offerings than us, and we anticipate that in the coming years, other large companies will enter certain markets in which we currently operate. The manufacturing of our products is competitive, and it experiences rapid technological developments and product up-gradation. Product introductions or enhancements by competitors which have advanced technology, better features or lower pricing may make our products or proposed products obsolete or less competitive. As a result, we will be required to devote continued efforts and financial resources to bring our products under development to market, enhance our existing products and develop new products for the marketplace. If we fail to develop new products, enhance existing products or compete effectively, our business, financial condition and results of operations will be adversely affected. For further details of our competitors, please see “**Our Business – Competition**” on page 104.

38. *Industry information included in this Draft Red Herring Prospectus has been derived from industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.*

Further, there can be no assurances that our Director will be able to trace the relevant documents pertaining to their qualifications and prior experience in future, or at all.

40. *We are dependent upon the experience of our management team and KMPs. If we are unable to attract or retain such team, this could adversely affect our business, results of operations and financial condition.*

We are dependent on the experienced management team for successful business operations. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled personnel. The loss of the services of our key personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects.

In the event that we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, results of operations and financial condition may be adversely affected. For further information, see “**Our Management**” on page 132 of this Draft Red Herring Prospectus.

41. *Our Company has taken unsecured loans that may be recalled by the lenders at any time.*

Our Company have availed unsecured loans which may be called by its lenders at any time. As on September 30, 2024 we had an outstanding unsecured loan amounting to Rs. 58.70 lakhs. In the event that lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing to the extent of outstanding balance. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer chapter titled “**Statement of Financial Indebtedness**” beginning on page 195 of this Draft Red Herring Prospectus.

42. *Adverse publicity regarding our products could negatively impact us.*

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

43. *Some of our agreements may be under stamped or inadequately stamped and if any financial or judicial implication arises out of the same it may have an adverse effect on the Company’s business and reputation.*

Some of our lease agreements may be inadequately stamped, unregistered, or executed with delays. For instance, the agreement pertaining to the property located at 5-5-65/1/A, F-14, S.A. Trade Centre, First Floor, Ranigunj, Secunderabad, Telangana, India, 500003, spans a period of 11 years. Since this rental agreement exceeds 11 months, it falls under the category of compulsorily registrable documents as per the provisions of Section 17 of the Registration Act, 1908. However, this agreement has not been registered.

Inadequately stamped documents are inadmissible as evidence before judicial forums. Such documents may be impounded if presented before a governmental or judicial authority, and a penalty of up to 10 times the value of the deficient stamp duty may be imposed. To date, we have not faced any penalties in this regard. However, should penalties be levied in the future, we would be liable to pay the applicable stamp duty along with any associated penalties. Furthermore, in the event of a dispute with the counterparty regarding the terms of such agreements, the agreements may be deemed inadmissible as evidence. This could potentially result in financial losses and adversely impact the reputation of our Company.

44. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lockouts, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, spoilage, and our inability to claim insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

45. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

46. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

47. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in its first year of operation, there is no guarantee that we can implement the same on time and within the estimated budget going forward or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Our Promoter and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, properties given by them on lease/rental basis or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoter will exercise his rights as shareholder to the benefit and best interest of our Company. Our

Promoter will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled **“Our Business”**, **“Our Promoter & Promoter Group”** and **“Annexure-Y - Related Party Transactions”**, beginning on pages 104, 146 and 188 respectively of this Draft Red Herring Prospectus.

51. Our lenders have charge over properties in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable properties of the company along with immovable properties of our directors, in respect of Working capital loan and term loan availed by us from Karnataka Bank, Punjab National Bank and Aditya Birla Finance Limited. In case of a default under our loan agreements, the personal guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer **“Statement of Financial Indebtedness”** on page 195 of this Draft Red Herring Prospectus.

53. None of our Directors possess experience of being on the board of any listed company.

None of our Directors possess experience of serving on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by a listed company. We cannot assure you that this lack of adequate experience will not have any adverse impact on the management and operations of our Company. Further, our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. Our Board is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances.

54. We are subject to restrictive covenants under our credit facilities that limit our operational flexibility.

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/ permission from the banks on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. Further, there can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see **“Statement of Financial Indebtedness”** on page 195 of this Draft Red Herring Prospectus.

55. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

56. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity

Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 151 of this Draft Red Herring Prospectus.

57. Any Penalty or demand raised by statutory authorities in future will affect financial position of the Company.

The proposed fund requirement for our Repayment of loans and Capital expenditure, as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 75 of this Draft Red Herring Prospectus.

59. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 75 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and will be subject to monitoring by an external independent agency appointed for the purpose. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

60. We are subject to the risk of failure of, or a material weakness in, our internal control systems.

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

61. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms,

in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

62. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE (BSE SME). Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

63. We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation.

In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

64. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

65. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual Bidders can revise their Bids

during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within three (3) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing. Individual Investors can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

66. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

67. A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations. Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

68. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity

crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

69. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

70. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter "**Government and Other Approvals**" on page 212 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

71. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

72. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

73. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

74. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “**Key Industrial Regulations and Policies**” beginning on page 118 of this Draft Red Herring Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

75. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

76. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

77. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

78. Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term “substantially” has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

Further, pursuant to SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 01, 2018, Individual Investors applying in public issue may use either Application Supported by Blocked Amount (ASBA) facility for making application or also can use UPI as a payment mechanism

with Application Supported by Blocked Amount for making application. For details in this regards, specific attention are invited to the chapter titled **“Issue Procedure”** beginning on page 247 of the Draft Red Herring Prospectus.

The process of Book Building under the SEBI (ICDR) Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.

For further details on the method and procedure for Bidding, please see section entitled **“Issue Procedure”** on page 247 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1000	23	1500	50.00%
1500	22	3000	100.00%
2000	21	5000	166.67%
2500	20	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled **“Issue Procedure”** on page 247 of this Draft Red Herring Prospectus);
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participant’s verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims.
- Ensure that the Bid cum Application Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid cum Application Form;

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT TAX BENEFITS TO THE COMPANY

The Company is not entitled to any special direct tax benefits under the Income Tax Act, 1961

B. SPECIAL INDIRECT TAX BENEFITS TO THE COMPANY

The Company is not entitled to any special indirect tax benefits under the GST Act

C. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS

The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2025-26. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
- ✓ Deduction under clause (iia) of sub- section (1) of Section 32 (additional depreciation).

- ✓ Deduction under section 35AD or Section 35CCC
- ✓ Deduction under section 80G

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax ('MAT') credit under section 115JAA of the Act which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act during the restatement period and accordingly current tax provisions has been calculated.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.

7. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. The views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. We do not assume responsibility to update the views consequent to such changes.

SECTION V- ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Investors should note that this is only a summary of the industry in which we operate and does not contain all information that should be considered before investing in the Equity Shares. Before deciding to invest in the Equity Shares, prospective investors should read this Draft Red Herring Prospectus, including the information in “***Our Business***” and “***Financial Information***” beginning on pages 104 and 152 respectively of this Draft Red Herring Prospectus. An investment in the Equity Shares involves a high degree of risk. For a discussion of certain risks in connection with an investment in the Equity Shares, see “***Risk Factors***” beginning on page no. 25 of this Draft Red Herring Prospectus.

WORLD ECONOMIC OUTLOOK

Global Growth: Divergent and Uncertain

Global growth is projected at 3.3 percent both in 2025 and 2026, below the historical (2000–19) average of 3.7 percent. The forecast for 2025 is broadly unchanged from that in the October 2024 World Economic Outlook (WEO), primarily on account of an upward revision in the United States offsetting downward revisions in other major economies. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies.

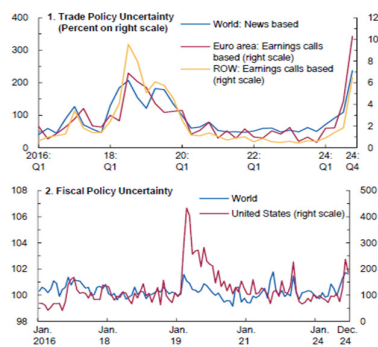

Medium-term risks to the baseline are tilted to the downside, while the near-term outlook is characterized by divergent risks. Upside risks could lift already-robust growth in the United States in the short run, whereas risks in other countries are on the downside amid elevated policy uncertainty. Policy-generated disruptions to the ongoing disinflation process could interrupt the pivot to easing monetary policy, with implications for fiscal sustainability and financial stability. Managing these risks requires a keen policy focus on balancing trade-offs between inflation and real activity, rebuilding buffers, and lifting medium-term growth prospects through stepped-up structural reforms as well as stronger multilateral rules and cooperation.

Forces Shaping the Outlook

The global economy is holding steady, although the degree of grip varies widely across countries. ***Global GDP growth*** in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany’s performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption.

Global disinflation continues, but there are signs that progress is stalling in some countries and that elevated inflation is persistent in a few cases. The global median of sequential core inflation has been just slightly above 2 percent for the past few months. Nominal wage growth is showing signs of moderation, alongside indications of continuing normalization in labor markets. Although core goods price inflation has fallen back to or below trend, services price inflation is still running above pre-COVID-19 averages in many economies, most notably the United States and the euro area. Pockets of elevated inflation, reflecting a range of idiosyncratic factors, also persist in some emerging market and developing economies in Europe and Latin America. Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Figure 1. Policy Uncertainty
(Index, unless noted otherwise)

Sources: Baker, Bloom, and Davis 2016; Caldara and others 2020; Refinitiv Eikon; and IMF staff calculations.
Note: The uncertainty measures are news-based indices that quantify media attention to news related to an issue, in which a value of 100 corresponds to 1 percent of news articles that reference the issue. In panel 1, the euro area and the rest of the world (ROW) are based on the earnings-calls-based indicators, representing the proportion of firms that mention trade policy uncertainty (TPU) in their earnings calls. This measure reflects companies' concerns regarding TPU, based on the dictionary developed by Caldara and others (2020), <https://doi.org/10.1016/j.jmoneco.2019.11.002>. The ROW encompasses 22 countries, including the US. In panel 2, US fiscal policy uncertainty is a subcomponent of the Economic Policy Uncertainty Index developed by Baker, Bloom, and Davis (2016), <https://doi.org/10.1093/qje/qw024>, whereas the indicator for the world is based on Hong, Ke, and Nguyen (2024), <https://doi.org/10.5089/97840028128.001>.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions (see Box 1). Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries (Figure 1). Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

The Outlook

IMF staff projections assume current policies in place at the time of publication. They incorporate recent market developments and the impact of heightened trade policy uncertainty, which is assumed to be temporary, with the effects unwinding after about a year, but refrain from making any assumptions about potential policy changes that are currently under public debate. Energy commodity prices are expected to decline by 2.6 percent in 2025, more than assumed in October. This reflects a decline in oil prices driven by weak Chinese demand and strong supply from countries outside of OPEC+ (Organization of the Petroleum Exporting Countries plus selected nonmember countries, including Russia), partly offset by increases in gas prices as a result of colder-than-expected weather and supply disruptions, including the ongoing conflict in the Middle East and outages in gas fields. Nonfuel commodity prices are expected to increase by 2.5 percent in 2025, on account of upward revisions to food and beverage prices relative to the October 2024 WEO, driven by bad weather affecting large producers. Monetary policy rates of major central banks are expected to continue to decline, though at different paces, reflecting variations in growth and inflation outlooks. The fiscal policy stance is expected to tighten during 2025–26 in advanced economies including the United States and, to a lesser extent, in emerging market and developing economies.

(Percent)

Note: The x-axis shows the months the World Economic Outlook is published. AEs = advanced economies; EMDEs = emerging market and developing economies.

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October (Table 1; see also Annex Table 1). The overall picture, however, hides divergent paths across economies and a precarious global growth profile (Figure 2).

Among advanced economies, growth forecast revisions go in different directions. In the *United States*, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

In the *euro area*, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened

political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.

In *other advanced economies*, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.

In *emerging market and developing economies*, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for *China* is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative

effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In *India*, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential.

In the *Middle East and Central Asia*, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in *Saudi Arabia*, mostly driven by the extension of OPEC+ production cuts. In *Latin America and the Caribbean*, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in *sub-Saharan Africa* is expected to pick up in 2025, while it is forecast to slow down in *emerging and developing Europe*.

World trade volume estimates are revised downward slightly for 2025 and 2026. The revision owes to the sharp increase in trade policy uncertainty, which is likely to hurt investment disproportionately among trade-intensive firms. That said, in the baseline, the impact of heightened uncertainty is expected to be transitory. Furthermore, the front-loading of some trade flows in view of elevated trade policy uncertainty, and in anticipation of tighter trade restrictions, provides some offset in the near term.

Progress on **disinflation** is expected to continue. Deviations from the October 2024 WEO forecasts are minimal. The gradual cooling of labor markets is expected to keep demand pressures at bay. Combined with the expected decline in energy prices, headline inflation is projected to continue its descent toward central bank targets. That said, inflation is projected to be close to, but above, the 2 percent target in 2025 in the United States, whereas inflationary dynamics are expected to be more subdued in the euro area. Low inflation is projected to persist in China. Consequently, the gap between anticipated policy rates in the United States and other countries becomes wider.

Risks to the Outlook

In the medium term, the balance of risks to the outlook is tilted to the downside, with global growth poised to be lower than its 2025–26 average and five-year-ahead forecasts at about 3 percent. Near-term risks, in contrast, could reinforce divergences across countries: they are tilted to the upside in the United States, whereas downside risks prevail in most other economies amid elevated policy uncertainty and headwinds from ongoing adjustments (in particular, energy in Europe and real estate in China).

An intensification of protectionist policies, for instance, in the form of a new wave of tariffs, could exacerbate trade tensions, lower investment, reduce market efficiency, distort trade flows, and again disrupt supply chains. Growth could suffer in both the near and medium term, but at varying degrees across economies.

Looser fiscal policy in the United States, driven by new expansionary measures such as tax cuts, could boost economic activity in the near term, with small positive spillovers onto global growth. Yet in the longer run, this may require a larger fiscal policy adjustment that could become disruptive to markets and the economy, by potentially weakening the role of US Treasuries as the global safe asset, among other things. Furthermore, higher borrowing to fund looser fiscal policy could increase demand for capital globally, leading to an increase in interest rates and possibly depressing economic activity elsewhere.

Confidence and positive sentiment in the United States, partly driven by deregulation, could boost both the demand and the supply side of the economy. While relaxation of unduly tight regulations and reduced red tape for businesses may spur near-term US growth through higher investment, dollar appreciation could fuel risks of capital outflows from emerging market and developing economies and drive risk premiums upward. Moreover, an excessive rollback of regulations designed to put limits on risk-taking and debt accumulation may generate boom-bust dynamics for the United States in the longer term, with repercussions for the rest of the world. Downside risks to macro-financial stability may be amplified if compounded by a weaker fiscal outlook or stalled progress on structural reforms. Other supply-side shocks, such as labor force disruptions driven by reductions in migration flows to the United States, may permanently reduce potential output and raise inflation during the adjustment period.

A near-term boost for the US economy emanating from these factors would further underscore the divergent growth patterns across economies. If the adverse effects of tariffs and reduction in the labor force dominate, global activity as well as activity in the United States might be affected negatively in the medium term. Uncertainties are high: the effects of each factor would unfold differently across countries, influenced by trade and financial linkages; policy responses to actions taken by other countries could play out in a variety of ways, including an escalation of retaliatory tariffs; and the impacts of different policy combinations or different magnitudes of policy changes could be quite different.

The whiskers show the maximum and minimum within a boundary of 1.5 times the interquartile range from the upper and lower quartiles, respectively. AEs = advanced economies; EMDEs = emerging market and developing economies.

Inflation dynamics could be shaped in opposite directions by these factors. The magnitude of the inflationary effect from tariffs is especially uncertain. While recent empirical studies find high pass-through to import prices, estimates of pass-through to consumer prices are lower and subject to significant uncertainty. Nevertheless, compared with what took place in earlier episodes of trade disputes, several factors suggest that upside risks to inflation from tariff hikes could be higher this time. First, the global economy is coming out of the most significant inflation surge in recent memory. Inflation expectations, especially in many advanced economies, are farther above the central bank target today than in 2017–21 (Figure 3). Second, the cyclical positions of many major economies are more conducive to higher inflation today than in 2016. Third, retaliation in the form of restrictions on specific, difficult-to-substitute materials or intermediate goods may have an outsized impact on aggregate inflation.

The risk of renewed inflationary pressures could prompt central banks to raise policy rates and intensify monetary policy divergence. Higher-for-even-longer interest rates could worsen fiscal, financial, and external risks. A stronger US dollar, arising from interest rate differentials and tariffs, among other factors, could alter capital flow patterns and global imbalances and complicate macroeconomic trade-offs.

In addition to risks from economic policy shifts, geopolitical tensions could intensify, leading to renewed spikes in commodity prices. The conflicts in the Middle East and Ukraine could worsen, directly affecting trade routes as well as food and energy prices. Commodity-importing countries may be particularly affected, with the stagflationary impact of higher commodity prices compounded by an appreciating dollar.

On the upside, global economic activity may enjoy a bounce if incoming governments can renegotiate existing trade agreements and forge new deals. This could relieve uncertainty faster and be much less disruptive to growth and inflation. By boosting confidence, such cooperative outcomes could even support investment and medium-term growth prospects.

Momentum on other policy fronts could also lift growth. Many countries may embrace structural reforms to prevent divergence from their better-performing peers from becoming entrenched. Efforts to increase labor supply, reduce misallocation, enhance competition, and support innovation could raise medium-term growth.

INDIAN ECONOMY OVERVIEW:

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices for Q1 2024-25 is estimated at Rs. 77.31 lakh crores (US\$ 928.9 billion) with growth rate of 9.7%, compared to the growth of 8.5% for Q1 2023-24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-September 2025, India's exports stood at US\$ 211.46 billion, with Engineering Goods (26.57%), Petroleum Products (16.51%) and electronic goods (7.39%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices for the period Q1 2024-25 is estimated at Rs. 43.64 lakh crore (US\$ 524 billion), against the First Revised Estimates (FRE) of GDP for the year Q1 2023-24 of Rs. 40.91 lakh crore (US\$ 491 million). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 9.7 billion for the Q1 2024-25 from US\$ 8.9 billion in Q1 2023-24 or 1.1% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.

- According to a report by the State Bank of India (SBI), domestic investment announcements in India have experienced a substantial increase, exceeding Rs. 37 lakh crore (US\$ 428.04 billion) in FY23 and FY24.
- According to data from the Directorate General of Civil Aviation (DGCA), India's domestic air passenger traffic increased by 6.12% in 2024, reaching a total of 161.3 million passengers. This growth follows a substantial YoY increase of 23.36% in 2023, attributed to the ongoing recovery from the pandemic.
- As of January 10, 2025, India's foreign exchange reserves stood at Rs. 53,80,402 crore (US\$ 625.871 billion).
- In 1H 2024, India saw a total of US\$ 31.5 billion in PE-VC investments.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.77 lakh crore (US\$ 20.45 billion) in December 2024.
- Between April 2000–June 2024, cumulative FDI equity inflows to India stood at US\$ 1,013.45 billion.
- In November 2024, the overall IIP (Index of Industrial Production) stood at 148.4. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 133.8, 147.4 and 184.1 respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI)- Combined inflation was 5.22% in December 2024 against 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January- (up to 15th July) 2024.
- The wheat procurement during Rabi Marketing Season (RMS) 2024-25 (till May) was estimated to be 266 lakh metric tonnes (LMT) and the rice procured in Kharif Marketing Season (KMS) 2024-25 was 400 LMT.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr. Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive

outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs.11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

RUBBER INDUSTRY

Global Scenario

Natural Rubber is a commercial plantation crop from the tree species, *Hevea brasiliensis* is grown in tropical humid climatic conditions. Thailand, Indonesia, Malaysia, Vietnam, China and India are the major Natural Rubber producers globally. The current world production and consumption of NR is around 12.40 million tonnes and 12.60 million tonnes respectively. The major Natural Rubber consumers are China, India, USA, Japan, Thailand, Indonesia and Malaysia. Rubber is largely perceived as a strategic industrial raw material and accorded special status globally for defence, national security and industrial development. Major consuming countries keep strategic reserves of Natural Rubber.

Rubber is an internationally traded commodity and price of rubber is influenced inter alia by trends in economic growth, production in major producing countries and demand in major consuming countries. Domestic Natural Rubber prices generally follow the trends in the international market and is therefore, subjected to fluctuations in price.

Indian Scenario

Indian rubber industry is characterized by the co-existence of a well-established rubber production sector and a fast growing rubber products manufacturing and consuming sector. The Rubber Industry value chain begins from Natural Rubber plantations and ends with a huge range of dry rubber and latex based products. Historically, Natural Rubber was a regulated commodity with strong tariff protection and domestic market regulations. The key factors which have contributed to the growth of Indian rubber industry are positive intervention of institutional agencies aiming at self-sufficiency and import substitution.

Finance Minister announcement in Budget of 2020 for Infrastructure development of Rs. 50,000 crore will be done for evacuation of enhanced Coal India Limited's (CIL) target of 1 billion tons coal production by 2023-24 plus coal production from private blocks. This will include Rs 18,000 crore worth of investment in mechanised transfer of coal (**Conveyor Belts**) from mines to railway sidings. This measure will also help reduce environmental impact.

Most of the rubber products including tyres require blends of Natural Rubber and Synthetic Rubber. Consumption of SR is mainly determined by end product composition, technological change and relative prices. Consumption of SR in India in rubber products manufacturing sector increased from 411,830 tonne in 2010-11 to 633,975 tonne in 2017-18. Currently, there are four companies producing SR and production increased from 110,340 tonne in 2010-11 to 331,221 tonne in 2017-18. Styrene Butadiene Rubber and Poly Butadiene Rubber accounted for 63% and 34% of SR production in the country. Import of SR amounted to 338,189 tonne in 2017-18. Consumption of SR in India is projected to reach 1.2 million tonne by 2025.

Production and Consumption

India is currently the sixth largest producer of Natural Rubber in the world with one of the highest productivity (694,000 tonnes in 2017-18). The production capacity in India is around 900,000 tonnes, of which around 75% is tapped. Out of the total area under rubber in India of around 822,000 ha, 614,500 ha is a mature yielding crop. Traditional rubber-growing states comprising Kerala and Tamil Nadu account for 81% of production. Major non-traditional rubber growing regions are the North Eastern states of Tripura, Assam and Meghalaya, Odisha, Karnataka, Maharashtra and West Bengal. Sheet rubber is the most preferred form of processing accounting for around 70% of processed rubber. Block rubber and latex comprise 17% and 12% respectively of rubber production in the country.

India is the 2nd largest consumer of Natural Rubber globally with current consumption of around 1.1 million tonnes. Sheet rubber, block rubber and latex account for 47%, 43% and 8% respectively in Natural Rubber consumption. Around 40% of the total Natural Rubber consumption in India is at present met from import of rubber. 68% of Natural Rubber consumption in India is in the automotive tyre sector.

Strengths and Challenges of Indian Rubber Sector

The major strengths of the sector include existence of a domestic rubber products manufacturing industry capable of consuming the entire Natural Rubber produced in the country, vast areas in non-traditional regions suitable for rubber cultivation, strong and systematic rubber research, well-knit extension network and grower forums comprising Rubber Producers Societies (RPS), Self Help Groups (SHGs), RPS companies and Cooperatives.

The sector also faces many challenges, some of which are sub-optimal agro-climatic conditions and adverse impact of climate change, saturation of area for new planting in traditional regions, agro-climatic, topographic, social, cultural, institutional and infrastructure constraints in non-traditional regions, global price volatility and low-price situations, and its repercussions on production, lack of competitiveness, stagnation in the growth of Non-Tyre Rubber manufacturing sector etc.

Sustainability in Production

Self-sufficiency had been the main focus of development plans in Natural Rubber sector till the last decade. Though importance of self-sufficiency cannot be reduced, competitiveness and sustainability have to be considered while setting up goals and formulating strategies pertaining to Rubber production in the country. Natural Rubber consumption in the country in 2030 is projected at around 2.00 million tonne. It is envisaged that the domestic production is able to meet at least 75% of the Natural Rubber requirement in 2030. In order to attain the projected production, average annual new planting and replanting would be to the tune of at least 8,000 ha and 10,000 ha respectively. Efforts would be made to get all the available mature area under rubber tapped.

Rubber consumption and Export of Rubber Products

Rubber consumption is the direct indicator of rubber-based industrialisation. Though India is the second largest consumer of NR in the world, per capita consumption of rubber as a whole is just around 1.2 kg as compared to 6.5 kg in China and the global average rubber consumption of 3.6 kg. End product range of rubber covers more than 50,000 items, which are used far and wide in various industries like transport, health, households, sports, entertainment etc. Consumption of rubber shall be promoted for the overall development of the rubber industry value chain.

Demand for tyres originates from the vehicle/automobile manufacturers for fitment on new vehicles (Original Equipment Manufacture supplies), vehicle population which is already on the road (replacement or aftermarket) as well as export. In some categories like passenger cars, motorcycle tyres, etc. the share of Original Equipment Manufacture's is more than 50% of total supplies. The future potential can be gauged from the present low automobile penetration in India. Growth in production and fitment of tyres is directly linked to the growth in GDP, particularly growth in infrastructure (for commercial tyres) and income levels (for passenger tyres). Tyre sector is poised to record notable growth in near future contributed by increase in GDP and export prospects.

General rubber goods sector is dominated by Micro Small and Medium Enterprises (MSME). However, the versatility of these products, their potential in terms of huge domestic and external markets and relatively high employment potential are to be considered in according high policy priorities to the sector. General rubber goods sector also requires special attention with regard to research and development activities, technology upgradation and transfer, machinery import, export promotion, branding, quality enhancement, skill development etc.

Promotional activities in rubber product manufacturing are mainly undertaken by Ministry of MSME, Department for Promotion of Industry and Internal Trade (DPIIT) and Industries Departments of state governments. There is no designated national level agency to assist rubber products manufacturing sector. A Rubber Industry Development Plan may be formulated in consultation with other relevant Ministries/Departments and Rubber Board. Initiatives of grower forums in manufacturing value added rubber products will be supported.

Rubber Parks are areas publicly procured, zoned and planned for the purpose of rubber based industrial development wherein infrastructure and common facilities are provided and single windows for clearances are established. Development of Rubber Parks as processing hubs would be promoted in the private sector or under PPP mode.

Several studies have highlighted significant advantages of rubberised roads over normal roads and it is inferred that though there is a marginal increase in the initial cost, periodic maintenance of these roads can be reduced by 35% compared to that of the bituminous roads. Natural Rubber latex and crumb powder made from end-of-life tyres can be used for modification of asphalt for road rubberisation. Promotion of Road Rubberisation would have twin advantages of boosting rubber consumption and infrastructure durability in the long run.

An independent Rubber Products Export Promotion Council could be considered to be constituted in order to address the export related issues of the Rubber Products Sector (both tyres and General rubber goods) and also to specifically handhold the manufacturers belonging to MSME sector which is highly essential in the present scenario. Further, export-oriented clusters would be identified and specific strategies would be framed for giving the focused boost in exports.

Our Manufacturing Facilities

Our Manufacturing Process

1. Material Selection:

The manufacturing process begins with the careful selection of raw materials. We utilize various types of rubber compounds, including natural rubber and synthetic rubber blends, tailored to meet the specific requirements of each product. The selection of materials is based on performance characteristics such as elasticity, durability, and resistance to environmental factors. Each material goes through a quality check before it can be selected for mixing. Further for products such as elastomeric bearings, POT PTFE Bearings, and expansion joints we use the best quality of steel and steel plates used in these products.

2. Mastication and Mixing:

Once the materials are selected, they are combined with essential additives, such as fillers, accelerators, and curing agents, in mixing mills, or kneaders. This step ensures that the rubber compound achieves the desired properties and consistency necessary for subsequent processing. The mixing process is termed as mastication, which is a process that involves breaking down the polymer chains to enhance the material's processability. This step is crucial for improving the rubber's elasticity and overall performance. The rubber compound is rolled into thin sheets and then transferred to the designated department for shaping as per product specification.

3. **Forming:**

The rubber is then formed into the desired shapes through various techniques:

- **Extrusion and continuous sheeting:** For products such as, strips, sheets, and profiles.
- **Moulding:** For complex shapes like bearings and expansion joints, utilizing the compression moulding process. This flexibility in forming techniques is done by various types of moulds made in our in-house fabrication unit, which allows us to cater to diverse product specifications.

4. **Curing**

In the forming process, the rubber products are subjected to curing, a heat-based process that cross-links the polymer chains. Curing is performed in specialized hydraulic presses, ensuring that the products attain optimal strength, flexibility, and durability. Each product has a unique curing time and needs to be monitored regularly to ensure that the finished product achieves the desired properties.

5. **Finishing**

Post-curing, the products undergo finishing processes, including trimming, polishing, and surface treatments. This step is essential to meet the precise dimensions and surface quality required for effective application.

6. **Quality Control:**

Quality control is a critical component of our manufacturing process. Each product batch undergoes rigorous testing to evaluate properties such as tensile strength, hardness, ageing, specific properties such as fire resistance and compression set. Our quality assurance team ensures that all products meet stringent industry standards and customer specifications.

7. **Packaging**

Upon successful quality verification, the finished products are carefully packaged for storage and distribution. Our packaging methods are designed to protect the products from damage during transport and handling.

8. **Distribution**

Finally, the packaged products are distributed to clients and end-users, ensuring timely delivery and satisfaction of customer requirements. We have established strong logistics partnerships to facilitate efficient distribution across various regions.

S. CORE BUSINESS LAWS

❖ The Rubber (Production and Marketing) Act, 1947

The Rubber Act, 1947 is an Indian legislation that provides for the development under the control of the Union of the rubber industry. The Act empowers the Central Government to regulate the quality, production, supply, and distribution of raw rubber. It also establishes the Rubber Board as the primary regulatory body responsible for implementing the provisions of the Act. The Rubber Board has various functions, including promoting the development of the rubber industry, granting general and special licenses, encouraging scientific research, and improving the marketing of rubber. The Act has been amended several times to address the changing needs of the industry. Every general license is published by the Rubber Board in the Official Gazette and in such newspapers as directed by the Rubber Board, while the special license is accorded for a limited period and is subject to extension by the Rubber Board. In the event of default of the provisions of the Rubber Act, there are provisions for imprisonment as well as fine or both.

❖ Jan Vishwas (Amendment of Provisions) Act, 2023

To support the “Make in India” initiative, the Government of India has enacted the Jan Vishwas (Amendment of Provisions) Act, 2023 (“**JV Act**”). The Bill was passed in both houses of the Parliament, with the Lok Sabha passing it on 27 June 2023 and the Rajya Sabha on 2 August 2023. Subsequently, the Bill, now referred to as the Jan Vishwas (Amendment of Provisions) Act, 2023 (“**JV Act**”) received assent from the President of India on 11 August 2023 and is set to come into force on the date and in the manner as prescribed by the Central Government vide notification in the Official Gazette. With the primary objective of decriminalising minor offences across 42 Central Acts, the Act eliminates 183 criminal provisions across 19 Ministries/ Departments. This act has led to amendment in the Rubber Act, 1947 which are as follows:-

- i. The imprisonment in Section 11 has been changed from imprisonment for a term which may extend to one year or with fine or with both to penalty which may extend to one lakh rupees or cancellation of license issued under section 14
- ii. In section penalty has been changed to Rs. 50,000
- iii. The said act added the procedure for adjudication of Penalties
 - a. For adjudging the penalties under sub-section (3) of section 11 and section 26, the Executive Director shall appoint the Secretary to the Board or any other officer authorized by the Central Government to act as an Adjudicating Authority for conducting inquiry.

- b. The aggrieved person to the order of Adjudicating Authority may appeal before Executive Director within a period of 60 days from date of receipt of order.
- c. Appeal can be admitted even after 60 days if it satisfies the Executive Director with sufficient cause.
- d. Appeal shall only be disposed with proper opportunity of being heard is given
- e. The appeal shall be disposed within 60 days of filing.
- f. The penalty imposed shall be recovered as an arrear of land revenue.

❖ **National Rubber policy, 2019**

The National Rubber Policy 2019 is aimed at offering financial assistance, consultatory and regulatory services. Due to the major spike in the rubber consumption and deficit in the Natural Rubber [herein after NR] production in India, around 40% of NR is imported from other major rubber producing countries such as Malaysia, Indonesia and China. The said policy was formed to promote overall sustainability of the Rubber Industry with respect to economic, social and environmental dimensions. To provide required focus towards development of the entire Rubber Industry value chain from upstream production to downstream manufacturing activities. The National Rubber Policy includes several provisions to support the Natural Rubber (NR) production sector and the entire rubber industry value chain. The Policy covers new planting and replanting of rubber, support for growers, processing and marketing of natural rubber, labour shortage, grower forums, external trade, Centre-State integrated strategies, research, training, rubber product manufacturing and export, climate change concerns and carbon market.

The policy functions with the below-listed objectives:

- To boost economic, social and environmental achievability of the rubber industry.
- To focus on the development of the entire rubber industry value-chain from production to other manufacturing activities.
- To expand the area under Natural Rubber by planting new trees and without causing any harmful impact on the natural ecosystem.
- To develop a strategy to increase the domestic production and meet with the demand of raw materials requirements.
- To promote activities to ensure the quality of the NR at par with international standards.
- To strengthen the manufacturing sector of the NR and encourage the export of rubber products.

❖ **Guidelines for Selection of Bridge Bearings for Railway Bridges & ROBs**

These are the broad guidelines for selection of bridge bearings for railway bridges & ROBs on Indian Railways from design and maintainability considerations. This guideline is prepared on the basis of literature survey from following codes, manuals, reports, papers, literature, etc.

As per the guidelines there are basically 4 types of bearing used on Indian Railways: -

- a) Steel Bearings- Sliding bearing and Rocker & roller bearings.
- b) Steel Reinforced Elastomeric bearing
- c) Pot-PTFE Bearing
- d) Spherical Bearings with high density polymer at sliding interface

These guidelines gives a detailed pros/cons list of these bearings, that way you can perusal the characteristics of a particular type of bearing which should be considered while selecting the bearings for a particular type of bridge span. In conclusion, these guidelines gives an exhaustive list of the various types of bearings and there suitability for a particular project.

❖ **The Bureau of Indian Standards Act, 1986**

The Bureau of Indian Standards Act, 1986 ("BIS Act") was established to provide for the establishment of a bureau ("Bureau") for the harmonious development of the activities of standardization, marking and quality certification of goods and for matters connected therewith. "Indian Standard" means the standard (including any tentative or provisional standard) established and published by the Bureau, in relation to any article or process indicative of the quality and specification of such article or process and includes – (i) any standard recognized by the Bureau under clause (b) of section 10 of the BIS Act; and (ii) any standard established and published, or recognized, by the Indian Standards Institution and which is in force immediately before the date of establishment of the Bureau.

❖ **IS 15652:2006- Insulating Mats for Electrical purposes.**

The standard is applicable to insulating mats made of Elastomer (a generic term that includes rubbers, latex and elastomeric compounds that may be natural or synthetic or a mixture or a combination of both) for use as floor covering for the protection of workers. It prescribes the requirements for the performance of the product, method of samplings, testing and acceptance.

The spread of the mat to be used for a certain work, the working methods, the care to be taken of the mat during use, periodic checks are some of the elements which will have influence on the final performance of the mat for the intended objective and shall be taken care of by the users.

❖ **RDSO, Functional Specification For Rubberized Surface At Level Crossings.**

Maintaining the road surface at level crossings is crucial to reduce accidents. The current method of using bituminous surfaces requires frequent maintenance. When major work like tamping is needed, the road surface must undergo repairs, causing traffic disruptions, especially on busy routes. Additionally, the installation of check rails at level crossings adds extra costs and maintenance. To address these challenges, using rubberized materials for level crossing surfaces is being considered as a solution.

❖ **IRC: 99-1988 Tentative Guidelines on the Provision of Speed Breakers for Control of Vehicular Speeds on Minor Roads.**

These guidelines extensively talk about the functions, need and use of a speed breaker. These guidelines give a proper process to understand how, when and where the speed breaker is to be placed.

❖ **The Legal Metrology Act, 2009 (the “Legal Metrology Act”) and (The Legal Metrology (Approval of Models) Rules, 2011)**

The Legal Metrology Act, along with the Legal Metrology Rules, establishes and enforces standards of weights and measures, regulates trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure or numbers. Any transaction relating to goods or a class of goods shall be as per the weight, measurements or numbers prescribed by the Legal Metrology Act. The Legal Metrology (Approval of Models) Rules, 2011, set forth the procedures for obtaining approval for models of weighing and measuring instruments. These rules require manufacturers or importers to submit models of their products to a designated authority for evaluation before they can be marketed or used commercially. The approval process ensures that the instruments meet specified standards of accuracy and performance. The rules outline the requirements for application, testing, and certification, including the submission of technical documentation and the payment of prescribed fees. Subsequently, for applications by Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“UPI Phase II”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars and the Previous UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public Issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. The time duration from public Issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public Issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public Issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all Issues opening on or after September 1, 2023 and on a mandatory basis for all Issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI

The Issue is being made under Phase III of the UPI (on a mandatory basis).

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DPIIT also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT till October 15, 2020. All the press notes, press releases, clarifications on FDI issued by DPIIT till October 15, 2020 stand rescinded as on October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. The RBI, in exercise of its power under the FEMA, has also notified Foreign Exchange Management (Non-debt Instruments) Rules, 2019 (“**Rules**”) and Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. The aggregate limit of 24% in case of FPIs may be increased up to the sectoral cap/statutory ceiling, as applicable, by the Company concerned by passing of resolution by the Board of the Company to that effect and by passing of a special resolution to that effect by its Shareholders. With effect from April 1, 2020, the aggregate limit of 24% has increased to the sectoral cap applicable to the Indian Company which in case of the Company is 100% provided that the Company complies with conditions provided under the FDI Policy. As per the Rules, the aggregate limit as provided above was permitted to be decreased by the Company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors through a resolution and also of its shareholders by means of a special resolution, before March 31, 2020. Further, eligible NRIs and OCIs investing on repatriation basis are subject to individual investment limit of 5% of the total paid-up equity capital on a fully diluted basis subject to the aggregate paid-value of the shares purchased by all NRIs and OCIs put together on repatriation basis not exceeding 10% of the total paid-up equity capital on a fully diluted basis of the Company. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the shareholders of the Company. The Company has not passed such resolutions as yet.
