SECTION II: SUMMARY OF ISSUE DOCUMENT

OVERVIEW OF INDUSTRY

The reforms of the 1990s have been associated with the expansion of the service sector in India. Midway through the 1980s, the service sector began to expand, but it took off in the 1990s when India started a series of economic reforms in response to a serious balance of payments issue.

The services sector is not only the dominant sector in India's GDP but has also attracted significant foreign investment, has contributed significantly to exports and has provided large-scale employment. India's services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction. To enhance India's commercial services exports, share in the global services market from 3.3% and permit a multi-fold expansion in the GDP, the government is also making significant efforts in this direction.

Our business is dependent on the decisions and actions of our dealers which is determined by our ability to maintain and strengthen our relationships and arrangements with existing dealers as well as our ability to establish and maintain relationships with new dealers. Our relationship with our customers is dependent to a large extent on our ability to regularly meet their requirements, including by introducing differentiated products with greater marketability, price competitiveness, efficient and timely product deliveries, and consistent product quality. In the event if we are unable to meet such requirements in the future, it may result in decrease in orders or cessation of business from affected customers. Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business, we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification. While we believe we have maintained good and long-term relationships with our customers, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

Any litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to take appropriate and timely steps in this regard.

7. *There may be potential conflict of interests between our Company and other venture or enterprises promoted by our promoter.*

Our Promoter Mr. Jagjit Singh Dhillon runs a sole Proprietorship named Associated Fabricators. The main business object / activities of firm permit it to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company in circumstances where our respective interests diverge. Any delays in the completion of our projects may adversely affect our ability to generate expected returns as contracts awarded by governmental authorities or entities funded by government includes penal clause which include monetary liability. For further details of our Business, please refer chapter titled “**Our Business**” beginning on Page 93 of Draft Prospectus.

As on the date of this Draft Prospectus, we have Ongoing Projects that are under construction and development. The development of such projects is subject to substantial risks, including various planning and construction risks. Further we follow a detailed schedule, regularly monitoring progress, updating project status, and identifying changes, to ensure that the project stays on track. Any delays in the completion of our projects may adversely affect our ability to generate expected returns as contracts awarded by governmental authorities or entities funded by government includes penal clause which include monetary liability.

10. *Our company purchases raw materials from proprietorship firm of our promoter.*

Our company purchases raw materials from a supplier which is owned by our promoter. A proprietorship firm of our promoter named Associated Fabricators is engaged in the similar line of business like ours and most our raw material purchases is from the same entity. As per financials for the period ended on September 30, 2023 and for the financial year ended on March 31, 2023 and March 31, 2022 the purchases from the related part was Rs. 53.69 Lakh, Rs. 83.22 and Rs. 24.29 Lakhs respectively. Since large quantum of our Purchases is from our related party there can be instances

in future where if for any reason the supply of raw material is stopped or delayed, this would directly effect our sales and would result in financial loss to our company.

11. *There are no long-term supply agreements with our vendors / suppliers.*

Our Business may be adversely affected if there is any disruption in the trading material supply or due to non-availability of trading material. We do not have written agreements with our vendors / suppliers and we operate on a purchase order system. There are no long-term supply agreements for the trading material. In absence of any such formal contract with our vendors / suppliers, we are exposed to the risks of irregular supplies or no supplies at all or delayed supplies or price variation which would materially affect our results of operations. In the event of any disruption in the supply or the non-availability of material in the required quantity and of required quality from alternate source, the supply schedule to our clients may be adversely be affected impacting the sales and profitability of the Company.

12. *Our individual Promoters plays key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us.*

Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations. We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and Executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and Executive Directors have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and Executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, it may take reasonable time to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue, to manage and expand our business. Our Promoters and Executive Directors, along with the key managerial personnel, have over the years built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

13. *Our Company had not made any provision for payment of gratuity to our employees. As per provision of Payment of Gratuity Act, 1972 (Act) a scheme for the payment of gratuity to employees shall be made upon applicability of the Act.*

Our company failed to determine the applicability of the act although the number of employees of the company has crossed the threshold limit as mentioned in the Act. Since the company was not aware of the applicability, the company failed to maintain any provisions for gratuity in any of the past financials' years. Upon identification of this non-compliance the same was rectified in the restated financials by taking actuarial valuation and making appropriate provisions for gratuity. Although no complaint had been filed against our company for noncompliance under any section of Act, and also no show cause notice in respect of the above has been received by the Company till date. But if the company is found to be in default in complying with any of the provisions of this Payment of Gratuity Act, 1972 or any rule or order made thereunder the employer shall be punishable with imprisonment for a term which may extend to one year, or with fine which may extend to Twenty-Five thousand rupees, or with both. Upon any such action the financial position of the company may be impacted.

14. *We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by the Issuer Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of "**Associated Coaters Limited**" from "**Associated Coaters Private Limited**". Also, we are yet to receive and renew several approvals and licenses. The Issuer Company is in the process of obtaining the same. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or

approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. The Company with respect to Registration under Employees State Insurance Act, 1948 has not freshly applied for the Registration. The Registration under Employees State Insurance Act, 1948 was in the name of Associated Coaters, a sole proprietorship firm, which was later transferred to the Company. Since, the Registration is transferred to the Company, hence, the Company cannot apply for a new registration. For further details, please see chapters titled **“Government and Other Statutory Approvals”** at page 160 of this Draft Prospectus.

15. *Our revenues are dependent upon our meeting specific customer requirements largely on a case-to-case basis. Any failure or limitation on our ability to provide services may detrimentally affect our future growth.*

Our assignments for providing services largely involve us, in providing end-to-end solutions to the aluminum fabrication industry on a case to-case basis, depending upon the needs of each customer. Our inability to provide solutions could lead to erosion of our market image and brand value, which could lead to customers discontinuing their work with us and stagnation of our customer base, which in turn could harm our business and consolidated profitability. Our Company’s future growth will depend on our continued evolution of specific sets of services to deal with the rapidly evolving and diverse needs of our customers in a cost competitive and effective manner.

16. *Stringent environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. Our operations may generate significant amounts of pollutants and waste, some of which may be hazardous. We are accordingly subject to various national, state, municipal and local laws and regulations concerning environmental protection in India, including laws addressing the discharge of pollutants into the air and water, the management and disposal of any hazardous substances, and wastes and the clean-up of contaminated sites. Non-compliance with these laws and regulations, which among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations, could expose us to civil penalties, criminal sanctions and revocation of key business licenses. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations, financial condition, or cash flows. In addition, we could incur substantial costs, our products could be restricted from entering certain markets, and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

17. *Any slowdown or work stoppages at our project sites may have effect on our business, financial condition and results of operations.*

Our projects are subject to various operational risks including, among various factors, the breakdown or failure of equipment, delay in shutdown of existing lines or processes, labour disputes, natural disasters, accidents and the need to comply with applicable legal and regulatory requirements. The occurrence of any of these factors could significantly affect our results of operations and financial condition. Any disruption in our operations due to disputes or other issues with our employees or contract labour work force may adversely affect our business and results of operations. Long periods of business disruption could result in a loss of customers. Although we take precautions to minimize the risk of any significant operational problems at our operation sites, there can be no assurance that we will not face such disruptions in the future.

18. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant

customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. We have not entered in any agreement with our customers, we work on the basis of purchase order basis.

19. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customer's discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Further, we operate in highly competitive markets in relation to our products where it is difficult to predict whether and when we will receive such awards. As a result, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when such orders are awarded to us and the commencement and progress of work under the orders placed. For further details of our business, please refer chapter titled "***Our Business***" beginning on Page 93 of this Draft Prospectus.

20. *Our business is capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.*

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of working capital are required to finance the purchase or manufacturing of materials, mobilization of resources and other work on projects before payment is received from clients. Our working capital requirements may increase due to an increase in the size of our operations and the number and size of projects that are required to be executed within a similar timeframe.

Our capital expenditure requirements and growth strategy thus require continued access to significant amounts of capital on acceptable terms. We cannot assure you that market conditions and other factors will permit future project and acquisition financings, debt or equity, on terms acceptable to us. Our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence, the continued success of current projects and laws that are conducive to our raising capital in this manner.

21. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market in which our company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

22. *Improper storage, processing and handling of raw materials and finished products may cause damage to our inventory leading to an adverse effect on our business, results of operations and cash flows.*

Our inventory primarily consists of raw materials and finished products. Our raw materials are susceptible to moisture contamination if not appropriately stored, handled and processed, which may affect the quality of the finished product. In the event such a contamination is detected at the facility during quality checks, we may be required to take appropriate measures to decontaminate the raw materials to the extent possible, which could materially and adversely affect our business, financial condition, results of operations, or cash flows. Improper storage may also result in higher than usual spoilage of inventory due to adverse weather conditions or longer than usual storage periods, which may also require us

to incur additional expenses in replacing that portion of the inventory and/ or incur additional expenses in maintenance and improvement of our storage infrastructure, which may adversely affect our profit margins.

23. *Our business is manpower intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We are in services industry and our business is dependent on human resource for carrying out its operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain, flexible policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

24. *The shortage or non-availability of power facilities may adversely affect our business and have an adverse impact on our results of operations and financial condition.*

Our business processes require power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented / augmented by alternative / independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

25. *If we fail to cost-effectively turn existing customers into repeat customers or to acquire new customers, our business, financial condition, and results of operations would be harmed.*

The growth of our business is dependent upon our ability to continue to grow by cost-effectively turning existing customers into repeat customers and adding new customers. Although we believe that many of our customers originate from word-of-mouth and other non-paid referrals, we expect to continue to acquire additional customers, all of which could impact our overall profitability. If we are not able to continue to expand our customer base or fail to retain customers, our net sales may grow more slowly than expected or decline. Our ability to attract new customers and increase net sales from existing customers also depends in large part on our ability to enhance and improve our existing products and to introduce new products and services that appeal to the customers, in each case, in a timely manner. We also must be able to identify and originate trends, as well as anticipate and react to changing consumer demands in a timely manner. The success of new products and services depends on several factors, including their timely introduction and completion, sufficient demand, and cost effectiveness. While we expect improvements in the performance of our business and operations, any flaws or dissatisfaction with the quality, pricing of products, or changes we make to our products and services or our inability to provide high-quality support to customers or help resolve issues in a timely and acceptable manner, our ability to attract and retain customers could be adversely affected. If our number of customers declines or fluctuates for any of these or other reasons, our business would suffer and lead to negative publicity of our brand.

26. *There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.*

There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the E-forms filed by our Company with the ROC in past years, for instance, the company has attached wrong attachment in the form filed with ROC.

In addition, provisions of SS-1 and SS-2 of the Companies Act, 2013 were generally complied by the company at the time of preparation of the documents for filling of forms. Further, the Company is complying with the said regulation post identification of the same. Notices maybe issued upon our Company and fines or penalties may also be imposed

upon our Company, which may adversely affect our administration from compliance perspective. There can be no assurance that no penal action will be taken against us by the regulatory authorities with respect to the non-compliances. If any adverse actions are taken against us, our financial results could be affected.

In the event the Company fails to submit the requisite disclosures to the regulators in the future, then the Company may be penalised by the regulators and the same may affect our results of operations.

- 27. *We have applied for registration of the word mark “ASSOCIATED COATERS” but do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.***

We have applied for registration of the word mark “**ASSOCIATED COATERS**” under the provisions of the Trademarks Act, 1999 bearing reference number 9803020 but do not own the trademark as on date. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. We have made an application with the Trade Marks Registry, for registration of our logo and corporate name under the provisions of the Trade Marks Act, 1999. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

- 28. *We have applied for registration of our logo “” but do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.***

We have applied for registration of the logo “” under the provisions of the Trademarks Act, 1999 bearing reference number 9808802 but do not own the trademark as on date. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. We have made an application with the Trade Marks Registry, for registration of our logo and corporate name under the provisions of the Trade Marks Act, 1999. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

- 29. *Breakdown of machinery and / or equipment used for the purpose of manufacturing process.***

Any breakdown or defect in the machinery and / or the equipment used for the purpose of our manufacturing process may delay the production process as a whole and result in missing deadlines in delivery of product if we are able to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

- 30. *If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.***

Our industry is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological and regulatory changes. Our clients’ needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients’ demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients’ increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

31. Major fraud, lapses of internal control or system failures could adversely impact the company's business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

32. We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and / or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

33. General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

34. Any deficiency in our products could make our Company liable for customer claims, which in turn could affect our Company's results of operations.

Our Company is bound by the terms and conditions as placed before its customers. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these customers for deficiency in our products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations. For further details of our business, please refer chapter titled "**Our Business**" beginning on Page 93 of this Draft Prospectus.

35. Our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised.

Further, our management will have discretion in the application of the Net Proceeds, and there is no assurance that the Objects of the Issue will be achieved within the time frame expected or at all. We intend to use the Net Proceeds for the purposes described under "**Objects of the Issue**" on page 79 which includes, Funding capital expenditure towards installation of plant & machinery in our existing premises and Funding of working Capital Requirements of our company and balance shall be utilised for General Corporate Purposes. Our funding requirements and the deployment of the Net Proceeds are based on management estimates for which we have relied on internal assumptions and such assumptions have not been appraised by any independent agency. While we believe that utilization of Net Proceeds for repayment of loans would help us to reduce our cost of debt and enable the utilization of our internal accruals for further investment in business growth and expansion, the repayment of loans will not result in the creation of any tangible assets for our

Company. Given the nature of our business and due to various uncertainties involved, we may be unable to utilize the Net Proceeds within the time frame or as per the schedule of deployment that we currently estimate. In the case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by means available to us, including internal accruals and additional equity and/or debt arrangements.

36. *Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances.*

A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, revenue and ability to meet customer demand. Our business involves manufacturing processes that can be potentially dangerous to our employees. An accident may result in loss of life, destruction of property or equipment, manufacturing, or delivery delays, or may lead to suspension of our operations and / or imposition of liabilities. While we believe we may maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations and prospects. Any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

37. *We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other companies in Industry.*

We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

38. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and

investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

39. Our Company has a negative cash flow in its Investing activities of the Company in period ended on September 30, 2023 and the Financial year ended on March 31, 2023 and March 31, 2022 and Financing Activities in the Financial year ended on March 31, 2022. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakh)

Particulars	For The period Ended on	For The Financial Year Ended On		
	September 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Net Cash used in Operating Activities	20.74	62.81	51.56	0.0
Net Cash used in Investing Activities	(46.45)	(3.33)	(55.97)	0.0
Net Cash from Financing Activities	24.97	(0.74)	9.89	0.0

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

40. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

41. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

42. Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.

We may also face cyber threats such as: (i) Phishing and Trojans - targeting our customers, wherein fraudsters send unsolicited codes or mails to our customers seeking account sensitive information or to infect customer machines to search and attempt ex-filtration of account sensitive information; (ii) Hacking – wherein attackers seek to hack into our infrastructure with the primary intention of causing reputational damage to us by disrupting services; (iii) Data theft – This can be internal i.e. by someone who has access to data of our Company or external wherein unconnected cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) Advanced persistent threat – a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by our clients. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized

individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients' investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation.

43. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

44. *Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

45. *The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price as decided by the Company in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title "**Capital Structure**" beginning on page 56 of this Draft Prospectus.

46. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoters. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "**Related Party Transactions**" beginning on page 135 of the Draft Prospectus.

47. *Our Promoters and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.*

Upon completion of the Issue, our Promoters and Promoter Group will own 69.07%# of the Post-Issue Equity Share capital of the Company. As a result, the Promoters and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoters and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoters' shareholding, please refer chapter titled "**Capital Structure**" beginning on Page No. 56 of this Draft Prospectus.

48. *We are dependent on a number of Key Managerial Personnel and our senior management, and the loss of, or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

Our performance depends largely on the efforts, expertise and abilities of our Key Managerial Personnel, senior management, and our operational personnel who possess significant experience in the industry in which we operate. We believe that the inputs and experience of our KMP and senior management, in particular, and other key personnel are valuable for the development of our business, operations and the strategic directions taken by our Company. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. Moreover, we may be required to substantially increase the number of our qualified personnel in connection with any future growth plans, and we may face difficulty in doing so due to the intense competition in the technology industry for such personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past in order to remain competitive in retaining.

Further, the COVID -19 pandemic has dynamically altered the approach on workplace hygiene and safety and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees' contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the well-being of our employees.

49. *Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.*

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

50. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

51. *The shortage or non-availability of power facilities may adversely affect our business processes and have an adverse impact on our results of operations and financial condition.*

Our business processes require substantial amount of power facilities. We do not have arrangements for alternative / independent sources of power supply as of now. We are mainly dependent on local electricity service provider for meeting our electricity requirements, there may be factors beyond our control affecting the supply of power. Any power failure may lead to increased costs, thereby affecting the profitability.

52. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled "*Objects of the Issue*" on page 68 of this Draft Prospectus.

53. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "*Dividend Policy*" on page 136 of this Draft Prospectus.

54. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

55. *Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

56. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.*

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance. For further information, see the chapter titled "*Statement of Financial Indebtedness*" on page 153 of the Draft Prospectus.

57. *Some of the KMPs is associated with our company for less than one year.*

Our Key Management Personnel, Company Secretary is associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter "*Our Management*" beginning on page 117 of this Draft Prospectus.

58. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

59. *Excessive reliance on our information technology systems and their failure could harm our relationship with customers, expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of service to customers and our internal operation.*

As part of our business strategy, we use high quality of information technology system to deliver our services in the best possible way. We have an exemplary track record for completion of the projects within the stipulated time period but there may be the system interruptions, errors, or downtime which could result from a variety of causes including changes in technology, technology failure, changes in system, and power failure etc. these may affect our business adversely.

60. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.*

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

61. *Negative publicity could adversely affect our revenue model and profitability.*

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

62. *Industry information included in this Draft Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their depend ability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

63. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to

file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources band management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and / or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

64. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

65. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the agriculture Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

66. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

67. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.*

The Issue price of our equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled “**Basis for Issue Price**” beginning on the page 74 of this Draft Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

68. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

69. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

70. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers’ attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

71. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of

listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

72. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.*

As stated in the reports of the Auditor included in this Draft Prospectus under chapter "***Financial Statements as Restated***" beginning on page 137 the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

73. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

74. *Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

75. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in the Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “**Our Industry**” beginning on page 82 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

76. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

77. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

78. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

79. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

80. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares

1. Basic and diluted earnings/ (loss) per equity share: Basic and diluted earnings per equity share are computed in accordance with Accounting Standard 20 – “Earnings per Share” issued by the Institute of Chartered Accountants of India.

2. The ratios have been computed as below:
 - Basic EPS is calculated as Profit/(loss) for the year/period attributable to equity shareholders divided by the adjusted weighted average number basic equity shares outstanding during the year/period.
 - Diluted EPS is calculated as Profit/(loss) for the year/period attributable to equity shareholders divided by the adjusted weighted average number of adjusted diluted equity shares outstanding during the year/period.
3. Weighted average number of equity shares is the number of equity shares outstanding at the beginning of the year/period adjusted by the number of equity shares issued during the year/period multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year/period.
4. Weighted average is aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. $\{(EPS \times Weight) \text{ for each year} \} / \{Total \text{ of weights}\}$.

- Net asset value per equity share = net worth attributable to the owners of the parent as at the end of the year/period divided by adjusted number of equity shares outstanding as at the end of year/period.
- Net worth means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and debit or credit balance of statement of profit and loss, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off and non-controlling interest, as per the Restated Financial Information, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation.
- Net Worth and the number of equity shares as at the end of the year/period have been adjusted to give effect to the consequent increase in share capital on the assumption that options outstanding to subscribe for additional equity capital (i.e. outstanding share warrants and employee stock options), wherever applicable, were exercised in the respective financial year/period. The computation considering aforementioned effects has been carried out in accordance with the requirements of SEBI ICDR Regulations and therefore the net worth and the number of equity shares outstanding as at the end of the year/period has not been derived from Restated Financial Information.

GLOBAL ECONOMY AT LARGE

Navigating Global Divergences

The baseline forecast is for global growth to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024, well below the historical (2000–19) average of 3.8 percent. Advanced economies are expected to slow from 2.6 percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024 as policy tightening starts to bite. Emerging market and developing economies are projected to have a modest decline in growth from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024, due to tighter monetary policy aided by lower international commodity prices. Core inflation is generally projected to decline more gradually, and inflation is not expected to return to target until 2025 in most cases.

Global Prospects and Policies

Figure 1.2. The COVID-19 Shock: Returning to Normal

 Note: On right scale, numbers represent search interest relative to the highest point (100) during 2008–23 worldwide.

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia’s war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events.

Divergent growth prospects across the world’s regions pose a challenge to returning to prepandemic output trends. Despite signs of resilience earlier in 2023, the impact of policy tightening to reduce inflation is expected to cool economic activity going forward. While risks to the outlook are more balanced than earlier in the year, on

account of Swiss and US authorities’ having acted decisively to contain financial turbulence, they remain tilted to the downside, implying little margin for policy errors. Monetary policy should stay the course to bring inflation to target, while fiscal consolidation is needed to tackle soaring debts. Structural reforms are crucial to revive medium-term growth prospects amid constrained policy space. Accelerating the green transition, increasing resilience to climate shocks, and improving food security for millions of people require strengthened multilateral frameworks and adherence to rules-based platforms for international cooperation.

The latest projections confirm that the global economy is slowing as inflation declines from last year’s multidecade peak. A contraction in global per capita real GDP—which often happens in a global recession—is not part of the baseline scenario. Growth and employment in the first half of the year remained more resilient than forecast in the April 2023 WEO. Although there is little change in the forecast for the global average since the July 2023 WEO Update, several shifts in growth and inflation prospects are observed across countries. In addition, medium-term prospects for economic growth remain the lowest in decades, with middle- and lower-income countries facing a slower pace of convergence toward higher living standards.

Managing Expectations: Inflation and Monetary Policy

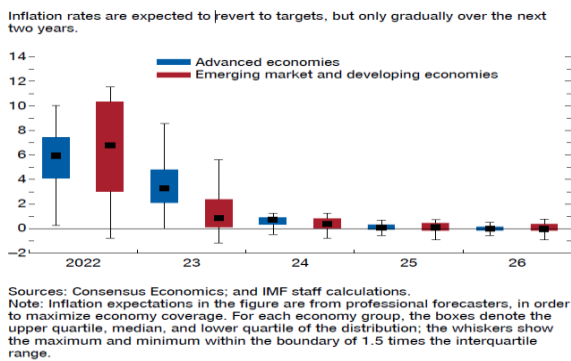

Inflation around the world reached multidecade highs in 2022. While headline inflation has since come down, core measures are proving stickier. The high inflation experience of the last two years could engender persistently high inflation

expectations, complicating central banks' paths to getting inflation back to their targets. It summarizes recent developments in inflation expectations across economies, agents, and horizons. Empirical analysis uncovers an increasing role of near-term inflation expectations for inflation dynamics. Using a model-based approach, the chapter finds that inflationary supply shocks are long-lasting and monetary policy is less effective when expectations are backward-looking. However, improvements in monetary policy frameworks, including communication strategies, can help to better inform agents' expectations and to bring inflation back to target more quickly and at a lower output cost, complementing standard cyclical policies.

In the wake of the shocks of the COVID-19 pandemic and Russia's invasion of Ukraine, inflation around the world reached multidecade highs in 2022. As policy tightening gradually rebalances aggregate demand toward potential output, supply chain disruptions have eased, and commodity prices have declined, headline inflation is coming down, but underlying price pressures (as captured by core inflation) remain elevated. Professional forecasters expect inflation rates will return closer to central banks' targets in 2024, with a shift in their median deviation toward zero and a sharp narrowing of the distribution (Figure 2.1)

However, they also expect that, given the current contractionary stance and anticipated policy action going forward, rates will be fully back at targets only by 2026, on average. Since consumption and investment decisions as well as price- and

Figure 2.1. Cross-Economy Deviations of Inflation Expectations from Targets
(Percentage points)

wage-setting processes partly reflect households' and firms' expectations about the future pace of price changes, inflation expectations play a critical role in shaping inflation dynamics. Amid the current higher inflation environment, some observers have expressed concerns that expectations could remain elevated or even rise further and long-term expectations could de-anchor from target inflation rates. In turn, expectations that future inflation will rise could feed into current inflation rates, keeping them high. If an expectations channel for inflation is important, it also means that policies that bring expectations down could help to lower inflation more quickly and easily. The idea is that the more effective monetary policymakers are in influencing inflation expectations, the lower the cost in forgone output involved in central banks achieving their inflation objectives (Sargent 1983; Ball 1994). In other words, the

expectations channel is critical to whether central banks can achieve

Fragmentation and Commodity Markets: Vulnerabilities and Risks

Figure 3.1. Fragmentation Keywords in Earnings Calls
(Indices, 2013–15 = 100)

Russia's invasion of Ukraine caused major commodity markets to fragment, and geopolitical tensions could make matters worse. Chapter 3 examines how further disruptions in commodity trade could affect commodity prices, economic activity, and the energy transition. The chapter reaches four conclusions. First, commodities are particularly vulnerable to fragmentation due to concentrated production, hard-to-substitute consumption, and their critical role for technologies. Second, further fragmentation would cause large swings in commodity prices and more volatility. Third, commodity trade disruptions would have highly uneven impacts across countries, though global losses appear moderate given offsetting effects across countries. Low-income countries would bear a disproportionate share of the economic cost,

due to their high reliance on agricultural imports. Fourth, fragmented minerals markets would make the energy transition more costly, reducing investment in renewables and electric vehicles by one-third by 2030 in an illustrative scenario. A green corridor agreement could guarantee the international flow of critical minerals. Similar agreements for essential food commodities could stabilize agricultural markets. Such agreements would safeguard the global goals of averting climate change and food insecurity

Since the end of the Cold War, primary commodity markets have become more integrated as a result of trade liberalization, technological innovation, and declines in transportation costs. Integrated commodity markets have provided cheap inputs that have supported global growth and so have helped raise living standards, especially in emerging markets. However, the war in Ukraine put this process in reverse. For the first time since the 1970s, commodities such as crude oil, natural gas, and wheat were broadly used to exert pressure in a major conflict. Exports were restricted and countersanctions imposed. These disruptions in commodity trade contributed to surging inflation in 2022 in many parts of the world, food insecurity in low-income countries, and slower global growth (IMF 2023). While most commodity prices have since normalized, geopolitical tensions signal that more severe fragmentation of commodity trade is a major risk. Many countries are trying

to reshore commodity supply chains for national security, geopolitical, or other reasons. Measures include those for critical minerals for clean energy technologies, semiconductors, and defense (examples of actions are the US Inflation Reduction Act, the European Chips Act, and China’s export restrictions on gallium and germanium).

As a result, concerns about fragmentation, deglobalization, and nearshoring have risen sharply, especially in the commodity sector (Figure 3.1). Text mining analysis of earnings calls reveals that prior to the COVID-19 pandemic, firms barely mentioned keywords related to fragmentation, but usage surged after Russia’s invasion of Ukraine.

INDIAN INDUSTRY OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices (2011-12) in the first quarter of 2023–24 is estimated at Rs. 40.37 trillion (US\$ 484.94 billion), showing a growth of 7.8% as compared to the first quarter of 2022-23 estimated at Rs. 37.44 trillion (US\$ 449.74 billion). Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In 2023-24 (April-September), India’s service exports stood at US\$ 164.89 billion. Furthermore, India’s overall exports (services and merchandise) in 2023-24 (April-September) were estimated at US\$ 376.29 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India’s nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 301.75 trillion (US\$ 3.62 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q1 of 2023-24 was Rs. 70.67 trillion (US\$ 848.92 billion), as against Rs. 65.42 trillion (US\$ 785.85 billion) in 2022-23, estimating a growth of 8%. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, ‘Panchamrit’. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- On August 6th, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28th, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1st, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'AtmaNirbhar Bharat' and 'Local goes Global'.

- India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23.
- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GOVERNMENT INITIATIVES

Government of India along with the governments of respective States has taken several initiatives to encourage development in the sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

- In the Union Budget 2023-24, the Finance Ministry announced a commitment of Rs. 79,000 crore (US\$ 9.64 billion) for PM Awas Yojana, which represents a 66% increase compared to the last year.
- In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan interest rates regime was expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.
- Under Union Budget 2021-22, tax deduction up to Rs. 1.5 lakh (US\$ 2069.89) on interest on housing loan, and tax holiday for affordable housing projects have been extended until the end of fiscal 2021-22.
- The Atmanirbhar Bharat 3.0 package announced by Finance Minister Mrs. Nirmala Sitharaman in November 2020 included income tax relief measures for real estate developers and homebuyers for primary purchase/sale of residential units of value (up to Rs. 2 crore (US\$ 271,450.60) from November 12, 2020 to June 30, 2021).
- In order to revive around 1,600 stalled housing projects across top cities in the country, the Union Cabinet approved the setting up of Rs. 25,000 crore (US\$ 3.58 billion) alternative investment fund (AIF).
- Government created an Affordable Housing Fund (AHF) in the National Housing Bank (NHB) with an initial corpus of Rs. 10,000 crore (US\$ 1.43 billion) using priority sector lending short fall of banks/financial institutions for micro financing of the HFCs.
- As of December 31, 2022, India had formally approved 425 SEZs, and as of January, 2023, 270 SEZs are operational. Most special economic zones (SEZs) are in the IT/ BPM sector.

ROAD AHEAD

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth Rs. 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family-owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The residential sector was expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

The current shortage of housing in urban areas was estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

The growing flow of FDI in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. Indian real estate was expected to attract a substantial amount of FDI with US\$ 8 billion capital infusion by FY22.

OVERVIEW OF OUR BUSINESS

Our Core business is as follows:

Our Company is engaged in the business of providing services by way of pre-treatment and powder coating of aluminium extrusions in Architect and Real Estate Industry. The process begins with a comprehensive cleaning, where the targeted surface of aluminium extrusions is thoroughly cleansed of any dirt, grease, or contaminants that might impede the subsequent coating process. Following this, a strategic chemical solution is applied to enhance the adhesion of the powder coating. This involves the application of an acidic solution for surface etching or the use of a specialized pretreatment agent to optimize surface wettability.

The application of powder coating itself is a precision art. Executed with an electrostatic spray gun, this method involves imparting a negative charge to the powder particles. These charged particles are then irresistibly drawn to the positively charged surface, creating a magnetic-like adhesion. The subsequent step involves the melting and fusion of these particles, resulting in a flawlessly even coating.

To fortify the durability of the coating, a carefully calibrated heating process follows. This involves subjecting the coated surface to elevated temperatures, the specifics of which depend on the unique characteristics of the powder coating employed. This curing process not only enhances durability but also ensures a lasting finish.

Post-curing, a meticulous inspection is conducted to guarantee uniform application and adherence to specified thickness standards. Any detected defects or imperfections are rectified at this stage, showcasing our unwavering commitment to delivering a flawless product. Only after passing our stringent quality checks does the coated item move to the final stages of packaging and shipment. Our dedication to precision and quality underscores every step of our process, ensuring that our customers receive nothing short of excellence in every coated aluminium extrusion.

Located in Vivekanandapur, 24 Paraganas (south), Kolkata, our company takes pride in providing timely and efficient deliveries of powder-coated aluminium sections across Kolkata, Orissa, Siliguri, Bihar, and Jharkhand.

Over our six-year journey, we have evolved into the Approved Applicator of Akozonobel, Jotun, and Asian Paints in Architectural coating. Our yearly capacity is 1,200 metric tons which includes Automatic Coating Plant and Manual Coating Plant, making us a growing player in eastern India in terms of aluminium extrusion coaters. Our Continuous investments in cutting-edge equipment have positioned us at the forefront of technology. Our commitment to innovation is evident in the installation of a Decoral wood finish line in September 2017 and a PVDF Coating Line in 2023. Striving for quality improvement is at the core of our mission. Our full immersion pre-treatment process, closely monitored by our chemical supplier, plays a crucial role in maintaining high standards. OUR SERVICES

- **POWDER COATING:**

Our company boasts substantial expertise in the realm of powder coating, a technique involving the application of dry powder onto a charged surface. This method results in a more robust coating in a single application compared to traditional paint. The electrostatic charge effectively adheres the coating to the surface, creating a lasting finish after curing. Given the intricate preparation and coating process, powder coating proves particularly advantageous for sizable orders.

Two primary types of powder coating exist – thermoplastic and thermoset – each distinguished by its curing methods and properties.

Firstly, thermoplastic coating undergoes melting and flowing when heated, retaining the same chemical composition upon solidification. This type offers superior impact resistance in the final product. Achieving an even flow over the surface demands time and elevated temperatures. Thermoplastic applications typically require a thicker application than thermoset coatings and may not exhibit as visually pleasing results. Our company provides this relatively new process, boasting the necessary infrastructure to extend this service nationwide.

Secondly, thermoset powder coatings undergo an irreversible chemical change during curing, producing a durable, hardened coating. While these coatings still melt and flow when heated, their chemical structure cross-links permanently, forming a composition distinct from the base resin. This results in a coating that does not remelt under high temperatures and offers enhanced scratch resistance compared to thermoplastics. Although thermoset coatings create thinner films, they can be more visually appealing, especially when applied in moderate thicknesses. It's noteworthy that over 90% of our revenue is derived from this service.

Over our Six years journey, our company has consistently evolved, earning the distinction of being the first Approved Applicator of AkzoNobel, Jotun, and Asian Paints in eastern India for architectural coating.

- **PVDF COATING**

In addition to our prowess in Powder Coating, our company is at the forefront of Polyvinylidene Fluoride (PVDF) coatings. These coatings represent a factory-applied, resin-based system, typically enriched with embedded color pigment particles that offer a diverse array of matte-finish colors. Renowned for their exceptional resistance to the deleterious effects of sunlight, moisture, and temperature variations, PVDF coatings find prominent use in architectural applications. Commonly applied to aluminium wall cladding, curtain walls, and roofing sheets, PVDF coatings are a testament to our commitment to delivering top-tier solutions.

Our company stands out with a robust infrastructure, equipped with the latest PVDF coating guns, cutting-edge PVDF booths, and more. This comprehensive setup ensures that we consistently deliver the highest quality to our discerning customers. With a focus on precision and excellence, we continue to set industry standards in the realm of PVDF coatings.

- **WOOD FILM COATING**

Our Wood Film Coating services are meticulously crafted to serve as an ideal base coat for sublimation decoration techniques. This intricate process involves a physical reaction between specialized inks and polyurethane powder coating. Through carefully controlled conditions of heat and pressure, photographic images seamlessly permeate into the powder coating, resulting in a stunning and durable finish.

Our commitment to precision and innovation shines through in this specialized service, where we blend artistry with cutting-edge technology to achieve remarkable outcomes. By seamlessly merging form and function, our wood film coating not only enhances aesthetics but also ensures longevity. As a testament to our dedication to excellence, we continue to cater to the unique needs of our clients, setting new benchmarks in the realm of wood film coating.

- **INDUSTRIAL FABRICATION**

In addition to our diverse portfolio of services, we extend our expertise to Industrial Fabrication for select customers and clients. While this sector contributes less than 5% to our total turnover, it remains an integral aspect of our comprehensive offerings. Our strategic approach involves focusing on other segments while engaging in Industrial Fabrication on a need basis.

Our commitment to excellence and customer satisfaction is reflected in the tailored solutions we provide within the realm of industrial fabrication. By prioritizing specific segments, we ensure a concentrated and specialized approach that aligns with the evolving needs of our clients. This strategic balance allows us to optimize our resources and deliver exceptional results in both our core areas and industrial fabrication when required.

Central Goods and Services Tax Act, 2017 (the "GST Act")

The GST Act levies indirect tax throughout India to replace many taxes levied by the Central and State Governments. The GST Act was applicable from July 1, 2017 and combined the Central Excise Duty, Commercial Tax, Value Added Tax (VAT), Food Tax, Central Sales Tax (CST), Introit, Octroi, Entertainment Tax, Entry Tax, Purchase Tax, Luxury Tax, Advertisement Tax, Service Tax, Customs Duty, Surcharges. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and / or services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state is levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

Our Company is engaged in the business of providing services by way of pre-treatment and powder coating of aluminium extrusions in Architect and Real Estate Industry. The process begins with a comprehensive cleaning, where the targeted surface of aluminium extrusions is thoroughly cleansed of any dirt, grease, or contaminants that might impede the subsequent coating process. Following this, a strategic chemical solution is applied to enhance the adhesion of the powder coating. This involves the application of an acidic solution for surface etching or the use of a specialized pretreatment agent to optimize surface wettability.

The application of powder coating itself is a precision art. Executed with an electrostatic spray gun, this method involves imparting a negative charge to the powder particles. These charged particles are then irresistibly drawn to the positively charged surface, creating a magnetic-like adhesion. The subsequent step involves the melting and fusion of these particles, resulting in a flawlessly even coating.

Our Company is promoted by Mr. Jagjit Singh Dhillon and Mrs. Navneet Kaur.

Phased implementation of Unified Payments Interface

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. The Offer will be made under UPI Phase III of the UPI Circular.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2) / 2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment , as updated from time to time by RBI and Master Direction– Foreign Investment in India (updated up to March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Section 4 of the FDI Policy 2020 has to be obtained. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. - (d) For the purpose of enforcing such lien, the Board may sell the shares, subject thereto in such manner as they shall think fit, and for that purpose may cause to be issued a duplicate certificate in respect of such shares and may authorise one of their Shareholders to execute and register the transfer thereof on behalf of and in the name of any purchaser. The fully paid-up Debentures shall be free from all lien and that in case of partly paid Debentures, the Company's lien shall be restricted to money called or payable at a fixed time in respect of such Debentures.
- (c) For the purpose of enforcing such lien, the Board may sell the Debentures, subject thereto in such manner as they shall think fit, and for that purpose may cause to be issued a duplicate certificate in respect of such Debentures and may authorize the debenture trustee acting as trustee for the holders of Debentures or one of the holder of Debentures to execute and register the transfer thereof on behalf of and in the name of any purchaser. The purchaser shall not be bound to see to the application of the purchase money, nor shall his title to the Debentures be affected by any irregularity or invalidity in the proceedings in reference to the sale.

The net proceeds of any such sale shall be received by the Company and applied in payment of such part of the amount in respect of which the lien exists as is presently payable. The residue, if any, shall (subject to a like lien for sums not presently payable as existed upon the Debentures before the sale) be paid to the Person entitled to the Debentures at the date of the sale.

Where the application is made by the transferor and relates to partly paid shares, the transfer shall not be registered unless the Company gives notice of the application to the transferee in a prescribed manner and the transferee communicates no objection to the transfer within 2 (two) weeks from the receipt of the notice.
