2. ***Our success mainly depends on sectors specific to PET bottle industry in which we cater to and therefore as a result we may be affected by any disruptions in the industry. Any failure on our part to do so, may have an impact on the reputation of our products, which could have an adverse effect on our revenue, reputation, financial conditions, results of operations and cash flows.***

Our success mainly depends on sectors specific to PET bottle industry in which we cater to. The markets in which we and our customers operate is characterized by changing technology, evolving industry standards and demands for features, and continual product innovation. These conditions may also result in significant competition. If the end-user demand is low for our customers’ products, there may be significant changes in the orders from our customers and we may experience greater pricing pressures. Therefore, risks that could harm the customers of our industry could, as a result, adversely affect us as well. Our success is therefore dependent on the success achieved by our customers in developing and marketing their products. If our customers’ technologies become obsolete or fail to gain widespread commercial acceptance, our customers may experience a reduced demand for their products which may affect our sales to such customers, operating margins depending on the nature of the product, and all of these combined may gradually result in a loss of customers including key ones. However, there can be uncertainty regarding the development and production of these products as planned and failure to anticipate or respond rapidly to advances in technology can have a material adverse effect on our business, results of operations, financial condition and cash flows.

For further details, kindly refer to chapter titled “*Our Business*” beginning on Page 127 of Red Herring Prospectus.

3. ***Concerns over Plastic Ban and Environment for packaged water bottles.***

We use PET (Polyethylene Terephthalate) for producing ‘PET Preforms’ for producing ‘Bottle Caps’ as Raw Materials. Both of these materials are one of the safest plastics and can be recycled very easily. Therefore, not likely to be banned, however if in future any restriction on the use of recyclable PET products for packing may adversely affect our business.

For further details, kindly refer to chapter titled “*Our Business*” beginning on Page 127 of Red Herring Prospectus.

4. ***Our third-party suppliers, on whom we rely for the raw material, may fail to deliver raw material of sufficient quality or in a timely manner, which could adversely affect our reputation, net sales and profitability.***

Our products are procured from third party manufacturers in respect of raw material and we constantly evaluate new suppliers. We conduct substantial investigations into our potential third-party suppliers, including on-site visits, to ensure that they meet our quality, cost, lead time, capacity and social compliance requirements, and once we have enlisted the services of a particular supplier, through various levels of oversight we monitor the quality of such supplier’s work and aim to ensure not only that such supplier completes its project(s) on time but also that the finished products match the approved sample. However, there can be no assurance that our suppliers will be able to deliver, in a timely and cost-effective manner, products that meet our quality standards, which could result in damage to our customer relationships, lost sales and reduced market share and, consequently, could have an adverse effect on our net sales and profitability.

For further details, kindly refer to chapter titled “*Our Business*” beginning on Page 127 of Red Herring Prospectus.

5. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Our business is significantly dependent on the efficient and uninterrupted operation of our technological infrastructure installed in our manufacturing unit, that ensures smooth operations through various automated machines. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed latest technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

For further details, kindly refer to chapter titled "*Our Business*" beginning on Page 127 of Red Herring Prospectus.

6. *The industry in which we operate, requires labour/ manpower and our operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

The industry in which we operate being labour intensive depends on labour force for carrying out its activity. Although we have not experienced any labour unrest, as our manpower requirement is not more, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

For further details, kindly refer to chapter titled "*Our Business*" beginning on Page 127 of Red Herring Prospectus.

7. *We do not have any documents evidencing certain information included in the Director biographies for some of our Directors under the section "Our Management" of this Red Herring Prospectus.*

We do not have any documents evidencing certain information included in the Director biographies for some of our Directors, under the section "*Our Management-Brief Biographies*" on page 159. The Information included in the section are based on the details provided by our Directors and are supported by an affidavit executed by them certifying the authenticity of the information provided. Accordingly, the Book Running Lead Manager to the Issue and us have placed reliance on declarations, undertakings and affidavits furnished by them, to disclose the details of their experience and education in this Red Herring Prospectus and we have not been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to their experience and education details in the future, or at all. Therefore, we cannot assure you that all or any of the information relating to their Experience and Educational Qualification included in "*Our Management*" on page 159 is complete, true and accurate.

8. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. Our Competitiveness also depends on the existing & new supply of products and our inability to compete with this intense competition; will have material adverse impact on our Company's financial position.

9. *We are dependent on third party transportation providers for the delivery of our raw material and Finished products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.*

We use third party transportation providers for the delivery of our raw material and Finished products. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our

customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

10. *There have been some instances of delays in the past with certain statutory authorities and non-compliances with certain provision of statutory regulations applicable to us. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.*

In the past, there have been some instances of delays/ non-filing/ non-compliance with certain statutory authorities with certain provision of statutory regulations applicable to us such as:

- Delay in filing of Annual Returns and Financial Statements for the F.Y 2011-12, 2012-13, 2013-14, 2014-15, 2015-16, 2016-17, 2019-20, 2020-21 and 2021-22.
- Our Company has filed incorrect annual return for the year 2012-13 in respect of shareholding pattern of Company and designation of all the Director is wrongly filled in Annual Returns of the Company.
- Our Company has not complied for AS-15 in Audited Financial Statements with regard to gratuity provision but the same is complied in Restated Financial Statement of the Company.
- In the Annual Return of F.Y. 2015-16, 2016-17, 2017-18, 2018-19, 2019-20, 2020-21 and 2021-22 all directors were appointed as Non-Executive Directors and 1 was appointed as Executive Director. But in Form, all Directors were mentioned as Executive Directors.
- The Company has paid remuneration to Non-Executive Directors in the past years. While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance and instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Red Herring Prospectus.

We cannot assure you that legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

11. *Our existing manufacturing facility are concentrated in a single region i.e., Puducherry (Pondicherry) and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.*

Our manufacturing unit is located at Puducherry (Pondicherry) which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Although in the past we have not experienced instances of operating risks, however our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our

operations. Any such adverse development affecting continuing operations at our manufacturing facility could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, continuous addition of industries in and around our manufacturing facility without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business.

12. *Improper handling of our products, or spoilage and damage to our products, could damage our reputation and may have an adverse effect on our business, results of operations and financial condition.*

Our products are subject to risks during their transport or storage. Any shortcoming in the transport or storage of our products due to negligence, human error or otherwise, may damage our products and result in noncompliance with applicable quality standards. Any claim that our products do not match requisite quality standards could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis. We sell our products, directly to customers and if the products sold by those customers are found to be faulty on account of our products, our customers may return our goods, terminate their relationships with us and initiate legal proceedings against us. We cannot assure you that we will not be subject to such product liability claims in the future. Should any of our products be perceived or found to be faulty, we may be subject to regulatory action, product recalls and our reputation, business, results of operations and financial condition may be adversely affected. We may also be exposed to liability from consumers for defects in the quality of our products.

13. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

14. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

15. *Our Company if not able to manage our growth or to successfully implement our business plan could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and Increasing Operational efficiency. For further details, see the section titled “*Our Business*” on page 127 of this Red Herring Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our products;
- Changes in the Indian regulatory environment in field

If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

16. *The property used by the Company for the purpose of its operations is not owned by us. Any termination of the relevant rent agreement in connection with such property or our failure to renew the same could adversely affect our operations.*

Our registered office, factory and warehouse including our sales depot are not owned by us. We have obtained these properties on lease vide lease agreements. Also, our Lease Agreement are not registered. Further, lease agreement for warehouse is not yet renewed. Any termination of the lease in connection with these properties or our failure to renew the same, in a timely manner or at all could adversely affect our operations.

If we are required to vacate the current premises, we would be required to make alternative arrangements for our business activities and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

For details regarding properties taken on lease refer the Section titled - Properties – “Our Business” beginning on page 127 of this Red Herring Prospectus.

17. *We depend on the success of our relationships with our customers. We derive a significant part of our revenue from our top 10 customers and we do not have long term contracts with these customers. If one or more of such customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.*

Our top ten customers have contributed 38.75%, 34.8%, 40.63% and 41.43%, of our revenues for the period ended September 30, 2023 and for financial years ended March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Financial Statements

Given the nature of our business, there can be no assurance that we would be able to attract new customers or reduce our dependence on any of our top customers. We expect that we will continue to be reliant on our major customers for the foreseeable future. Accordingly, any failure to retain these customers or to remain suppliers to these customers and/or negotiate and execute contracts on terms that are commercially viable, with these select customers, could adversely affect our business, financial condition and results of operations. In addition, any defaults or delays in payments by a major customer or the insolvency or financial distress by a major customer may have an adverse effect on business, financial condition and results of operations.

Cancellation by customers or delay or reduction in their orders or instances where anticipated orders fail to materialize can result in mismatch between our expectant and existing inventory levels at our unit, thereby increasing our costs relating to maintaining our inventory and reduction of our margins, which may adversely affect our profitability and liquidity. Further, we may not find any customers or purchasers for the surplus or excess capacity, in which case we would be forced to incur a loss. Further, our inability to find customers for surplus products may result in excessive inventories which may become obsolete and may be required to be written off in the future.

Additionally, our customers have high and stringent standards for product quality and quantity as well as delivery schedules. Any failure to meet our customers’ expectations could result in the cancellation or non-renewal of contracts or purchase orders. There are also several factors, other than our performance that could cause the loss of a customer, which include those customers who may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, financial condition, results of operations and prospects.

18. *There is sudden increase in Net Profit of our Company from the financial year ended March 31, 2022 to March 31, 2023. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects.*

We have experienced significant growth in our limited operating history and there is sudden increase in Net Profit margins of our Company from the financial year ended March 31, 2022 to March 31, 2023 as our Company reported a net

profit of ₹ 302.19 lakhs in Fiscal 2023 as compared to a net profit of ₹ 13.01 lakhs in Fiscal 2022. The reason for increase is due changed its strategy of selling its products and the Price of the Raw Material which is used by our company for the production was also decreased.

Our business prospects must be considered in light of the risks and uncertainties encountered by companies undergoing rapid growth in competitive markets. The Company has placed substantial growth in financial year March 31, 2023, and will continue to place, demands on our management and other resources and there is no assurance that these demands will be met successfully. We may not be able to increase revenue or maintain profitability on a half year or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls.

For further details of our financial data, please refer to chapter titled “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on Page 177 and 183 of this Red Herring Prospectus.

19. *Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company have entered into certain related party transactions with our Promoters, members of the promoter group, Directors and our Group Companies in the past which are in compliance with applicable provisions of Companies Act, 2013 and all other applicable laws. The percentage of purchases from related parties for the period ended September 30, 2023 and fiscal year 2023, 2022 and 2021 is 17.87%, 11.82%, 7.72% and 4.75% respectively of total purchases. Further the percentage of sales to related parties for the period ended September 30, 2023 and fiscal year 2023, 2022 and 2021 is 2.96%, 13.24%, 13.38% and 7.80% respectively of total sales.

While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain party transactions and our undertakes that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

20. *Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.*

Our top ten suppliers contributed approximately 46.50%, 64.69%, 55.19% and 47.68% of our total purchases for the period ended September 30, 2023 and for financial years ended March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost-effective suppliers in normal course of business. Since our business is concentrate[d among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

While we believe we have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

21. *We require certain approvals and licenses in the ordinary course of business and the failure to successfully obtain such registrations would adversely affect our operations, results of operations and financial condition.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of private company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see “*Government and Other Approvals*” on page 209 of Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

22. *Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company have entered into certain related party transactions with our Promoters, members of the promoter group, Directors and our Group Companies in the past which are in compliance with applicable provisions of Companies Act, 2013 and all other applicable laws. For details, please see “*Note No.31 Restated Statement of Related Party Disclosures of Restated Consolidated & Standalone Financial Statements*” under the chapter titled “*Restated Financial Statements*” beginning on page 185 of this Red Herring Prospectus. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain party transactions and our undertakes that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

23. *We have a substantial amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As of September 30, 2023, our long-term borrowings were ₹ 683.22 Lakhs & short-term borrowings were ₹ 1006.29 Lakhs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company’s borrowings, see “*Restated Financial Statements*” on page 185 of this Red Herring Prospectus.

24. *Our Company logo “SWASTHIK Plaseon” is not registered with Registrar of Trademark; any infringement of our brand name or failure to get it registered may adversely affect our business. Further, any kind of negative publicity or misuse of our brand name could hamper our brand building efforts and our future growth strategy could be adversely affected.*

Our Company has made an application for registration with the Registrar of Trademark for registration of logo “SWASTHIK Plascon”. If we are unable to register the intellectual property in the future in our name or any objection on the same may require us to change our logo and hence may loose on the goodwill created so far. Further, the same may involve costly litigations and penal provisions if some legal consequences arise if someone from outside use our name and logo of the Company. We believe that our future growth and competitiveness would depend on our ability to establish and strengthen our brand. We cannot guarantee that we will be able to make a lasting brand image with our clients and other people in the absence of a logo. Although, we believe that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

25. *The unsecured loan availed by our Company from Director; Promoter group other parties may be recalled at any given point of time.*

Our Company has been availing unsecured loans from Directors, Promoter group and other parties from time to time. The total outstanding payable to them as on September 30, 2023 amounts to Rs. 674.14 Lakhs on basis of Restated standalone financial statement. Although there are no terms and condition prescribed for repayment of unsecured loan which can be recalled at any given point of time during ordinary course of business and thus may affect the business operations and financial performance of our Company.

For further details regarding loans availed by our Company, please refer “*Restated Financial Statements*” on page 185 of this Red Herring Prospectus.

26. *Any deficiency in our products could make our Company liable for client claims, which in turn could affect our Company’s results of operations.*

Our Company is bound by the terms and conditions as placed before its clients. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these clients for deficiency in our products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company’s results of operations.

27. *We do not have any long-term agreement or contract of supply of raw materials and consequently are exposed to price and supply fluctuations for our raw materials.*

Our Company is engaged in the business of manufacturing PET bottles and PET Preforms, and PET (Polyethylene terephthalate) in Granules form is used as the primary raw material during our manufacturing process. Therefore, we are highly dependent on PET, and it forms the most important and primary component of our manufacturing process.

We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacturing of our products, could have a material adverse effect on our business. Further, any discontinuation or a failure of these suppliers to adhere to the delivery schedule or failure to deliver the required quality and quantity could hamper our manufacturing schedule.

Further, we are also exposed to fluctuations in the prices of raw material. Thus, we may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our products becoming unaffordable if pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our margins. Upward fluctuation of price of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial conditions and results of operations.

28. *Certain relevant copies of educational qualification of one of our Promoters is not traceable.*

Relevant copies of education qualification of one promoter, P Umrao is not traceable. We can't assure you that back-ups for the relevant copies of educational qualifications will be available in a timely manner or at all. We have relied on personal affidavit provided by them.

29. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory of our raw material, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

30. *Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.*

As on September 30, 2023, our total secured borrowings amounted to Rs. 1015.37 Lakhs from Banks as per Restated Standalone Financial Statement. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and
- Our financing agreements require us to obtain the consent of, or to intimate, our lenders for certain actions including change in shareholding or directorship of our Company, remuneration to Directors, drawdown of further loans, issuance of guarantees, and for certain corporate actions, including alterations to our Memorandum and Articles of Association, Payment of Dividend and balance of unsecured loan of Director. Our failure to comply with financial or restrictive covenants or periodic reporting requirements or to obtain our lenders' consent to take certain actions in a timely manner or at all may result in declaration of an event of default by any current or future lenders, which may accelerate repayment or increase applicable interest rates or trigger cross-default or cross-acceleration under other financing agreements.

Although we have not experience any disruption in our loan facility in past, but termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, please refer chapter titled "*Restated Financial Statements*" beginning on Page 185 of this Red Herring Prospectus.

31. *There may be potential conflicts of interest if our Promoters or Directors are involved in any business activities that compete with or are in the same line of activity as our business operations.*

Our promoter group entities Swashtik Preforms Private Limited, Swashtik Poliemers, Swashtik Industries, Sri Baba Pet Bottles Private Limited, Srinivas Packaging and Swashtik Pet Packaging are involved in business of manufacturing PET Bottles and Preforms. Also, our Company has entered into various transaction such as purchase and sale in past with our Promoter Group Entities and will continue to do in future. For detailed information for our transaction with Promoter Group Entity please refer to *Note No. 31* of Restated Consolidated & Standalone Financial Statement under chapter titled "*Restated Financial Statements*" beginning on page 185 of this Red Herring Prospectus.

There can be no assurance that our Promoters or our Promoter Group Entity or members of the Promoter Group will not compete with our existing business or any future business that

we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. For further details, please refer to “Common Pursuits” under chapter titled “*Our Promoter and Promoter Group*” on Page 175 this Red Herring Prospectus.

35. *We have significant ongoing funding requirements and may not be able to raise additional capital in the future. As a result, we may not be able to respond to business opportunities, challenges or unforeseen circumstances.*

The Company is dependent on these banks for its Working Capital requirement and capital expenditure and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

56. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see “*Basis for Issue Price*” beginning on page 97 of this Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

57. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

58. *The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.*

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the Book Running Lead Manager through the Book Building Process. These will be based on numerous factors, including those described under “*Basis for Issue Price*” on page 95 of this Red Herring Prospectus, and may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange. The price of our Equity Shares upon listing on the Stock Exchange will be determined by the market and may be influenced by many factors outside of our control.

59. *The requirements of being a listed company may strain our resources and distract management.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to

hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

EXTERNAL RISK FACTORS

60. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India's principal export markets; and
- Other significant regulatory or economic developments in or affecting India or our industry.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

61. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

62. Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the "CCI"). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void.

Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition

Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

63. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE SME in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

64. *The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.*

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

65. *You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.*

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

66. *Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.*

We currently operate only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the Textile industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is

prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

67. Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.

The Ministry of Corporate Affairs ("MCA"), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 ("Ind AS") which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

68. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

69. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries,

including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

70. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any

amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

71. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well.

Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY OVERVIEW

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation are plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia’s war in Ukraine could escalate, and tighter global financing costs could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress.

In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

THE FORCES SHAPING THE OUTLOOK

The global fight against inflation, Russia’s war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

Despite these headwinds, real GDP was surprisingly strong in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and

greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia's invasion of Ukraine.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most—though not all—major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022–23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021-22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In FY22, India's service exports stood at US\$ 254.4 billion. Furthermore, India's overall exports (services and merchandise) was estimated at US\$ 770.18 billion in FY23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pentup demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at US\$ 3.31 trillion (Rs. 272.41 trillion) in FY22. Additionally, the Nominal GDP at current prices in Q3 of 2022-23 was US\$ 874.84 billion (Rs. 71.82 trillion), as against US\$ 792.3 billion (Rs. 65.05 trillion) in 2021-22, estimating a growth of 10.4%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and

Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. ROAD AHEAD

In the second quarter of FY23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In June 2023 (Provisional), CPI-C inflation was 4.81%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL MANUFACTURING INDUSTRY

Manufacturing is the use of labor, goods and machines to produce goods for use or for sale. Manufacturing sector covers work performed in electronics industry, mechanical industry, energy industries, food and beverage industries, plastic industry, metalworking industries, transport and telecommunications industries, chemical or physical transformation of materials, substances, or components into new products. The process of assembling of components or parts of manufactured products also falls into the bracket of manufacturing unless the activity is appropriately put into construction. Construction on the other hand primarily covers works encompassing construction of buildings or assembling of infrastructure (for e.g., highways and utility systems). All those companies performing work in the preparation of sites for new construction and those involved in subdividing land for sale as building sites also are included in construction.

Manufacturing uses raw materials that are products of agriculture, bakery, fishing, forestry, mining and other products of manufacturing operations. Plants, factories or mills that use power-driven machines and materials-handling equipment, transform the raw materials into new finished products and components requiring further manufacturing.

On the other hand construction market includes new work, maintenance or repairs. Production responsibilities are specified contractually with constructions owners (prime contractors) or contracts with subcontractors. Manufacturing industries are the chief wealth generating sectors of any economy. These industries adopt various technologies and methods widely known as manufacturing process management.

Manufacturing industries are important for an economy as they employ a huge share of the labor force and produce materials required by sectors of strategic importance such as national infrastructure and defense. Some of the industries we cover under manufacturing are aerospace, agriculture, defence, environmental services like air purification, glass, lighting, paper and forest products, machinery, metals (like aluminum, copper, exotic metals, iron and steel, non-ferrous metals and precious metals), mining, minerals, packaging and textiles.

The world manufacturing industries in a capitalist economy indulge in mass production and make them available as earning profits. Manufacturing in collectivist economy is guided by a state-run agency for making available the 93 manufactured goods depending on the requirement. Manufacturing industry in a modern economy operates under regulations framed by the Government.

The manufacturing industry accounts for a significant share of the industrial sector in developed countries. The final products can either serve as a finished good for sale to customers or as intermediate goods used in the production process.

Manufacturing industries are essential for an economy as they employ a huge share of the labor force and produce materials required by sectors of strategic importance such as national infrastructure and defense. However, not all manufacturing industries are beneficial to the nation as some of them generate negative externalities with huge social costs. The cost of letting such industries flourish may even exceed the benefits generated by them.

Global manufacturing industry growth reached 3.8% in 2022

Updated research by Interact Analysis shows that Asia Pacific (APAC), Europe and the US have performed very differently in terms of manufacturing output growth during 2022. Growth in Europe has been slow throughout the year, while it has been strong in the US and steady in APAC. Machinery sectors have performed better than the manufacturing sector overall, and despite current challenges the next global downturn for manufacturing is not expected until late 2025 or early 2026.

Regionally, the US manufacturing industry has performed strongly, and the Americas growth rate hit 6.9% in 2022, compared to 3.3% for Asia Pacific and 2.6% for Europe. However, due to economic weaknesses across the regions, the Americas region is only forecast growth of 3.1% in 2023. Despite ongoing supply chain issues and inflationary pressures, it is expected that overall global manufacturing industry output growth reached 3.8% in 2022.

The UK and Germany are suffering a particularly bad economic period due to Germany’s reliance on Russian energy and the UK’s current political turbulence. Germany also strongly relies on other countries for its exports that are experiencing similar difficulties. Despite this, some sectors are still performing well in Germany, including forming machinery, where order intake grew by 7% in 2022 due to strong export demand. Overall, German growth was slow, sitting at around 0.2% for 2022, while in the UK, the situation is similarly gloomy. For the second year in three, manufacturing production has shrunk by around 0.5%, forcing the UK into a negative forecast for 2022. Many smaller regions had propped up Europe in terms of the region’s overall performance.

In contrast, the outlook for China remains positive, with 2023 to 2025 anticipated to be a period of growth and recovery for the country. As a result of further COVID-19 lockdowns, manufacturing output weakened, with growth contracting to 2.9% in 2022. The predicted recessions across the US and Europe are expected to slow growth again in 2026, falling to similar rates to those seen in 2020 when the COVID-19 pandemic struck. In China, the highest growth rates in 2022 were

seen in the chemicals and pharmaceuticals industry, which grew by 4.9%. Conversely, wood products registered the lowest growth rate, declining by -1.7%.

INDIAN MANUFACTURING INDUSTRY

INTRODUCTION

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub.

With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship.

Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

Manufacturing has emerged as one of the high growth sectors in India. Prime Minister of India, Mr Narendra Modi, launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. Government aims to create 100 million new jobs in the sector by 2022.

MARKET SIZE

Manufacturing exports have registered highest ever annual exports of US\$ 447.46 billion with 6.03% growth during FY23 surpassing the previous year (FY22) record exports of US\$ 422 billion. By 2030, Indian middle class is expected to have the second-largest share in global consumption at 17%.

India's gross domestic product (GDP) at current prices stood at Rs. 51.23 lakh crore (US\$ 694.93 billion) in the first quarter of FY22, as per the provisional estimates of gross domestic product for the first quarter of 2021-22. The manufacturing GVA at current prices was estimated at US\$ 77.47 billion in the third quarter of FY22 and has contributed

around 16.3% to the nominal GVA of during the past ten years. India has potential to become a global manufacturing hub and by 2030, it can add more than US\$ 500 billion annually to the global economy. As per the economic survey reports, estimated employment in manufacturing sector in India was 5.7 crore in 2017-18, 6.12 crore in 2018-19 which was further increased to 6.24 crore in 2019-20. India's display panel market is estimated to grow from ~US\$ 7 billion in 2021 to US\$ 15 billion in 2025. As per the survey conducted by the Federation of Indian Chambers of Commerce and Industry (FICCI), capacity utilisation in India's manufacturing sector stood at 72.0% in the second quarter of FY22, indicating significant recovery in the sector.

In FY23 (until February 2023), EPFO added 131 lakh net subscribers. The Employees' Provident Fund Organisation (EPFO) added 1,396,185 in February 2023.

In October 2021, information technology major Zoho, announced that it will invest Rs. 50–100 crore (US\$ 6.7-13.4 million) and form a new company, that will focus on research and development (R&D) in the manufacturing sector.

In August 2021, Wistron Corp. collaborated with India's Optiemus Electronics to manufacture products such as laptops and smartphones, giving a major boost to the 'Make in India' initiative and electronics manufacturing in the country.

In April 2021, Samsung started manufacturing mobile display panels at its Noida plant and plans to ramp up manufacturing IT display panels soon.

❖ Samsung Display Noida, which has invested Rs. 4,825 crore (US\$ 650.42 million) to move its mobile and IT display manufacturing plant from China to Uttar Pradesh, has received special incentives from the state government.

In April 2021, Bharti Enterprises Ltd. and Dixon Technologies (India) Ltd., formed a joint venture to take advantage of the government's PLI scheme for the manufacturing of telecom and networking products.

GOVERNMENT INITIATIVES

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

- In the Union Budget 2023-24:
 - Startups incorporated within a time-period and meeting other conditions can deduct up to 100% of their profits; the end of this period has been extended from March 31, 2023 to March 31, 2024. In addition, the period within which losses of startups may be carried forward has been extended from seven to ten years.

This is a decrease of Rs. 50,120 crore (US\$ 6.09 billion) (22.3%) from the revised estimate of 2022-23. Fertilizer subsidy for 2022-23 was increased substantially in response to a sharp increase in international prices of raw materials used in the manufacturing of fertilizers.
 - The Centre will facilitate one crore farmers to adopt natural farming. For this, 10,000 Bio-Input Resource Centres will be set-up, creating a national-level distributed micro-fertilizer and pesticide manufacturing network.
 - To avoid cascading of taxes on blended compressed natural gas, excise duty on GST-paid compressed bio-gas contained in it has been exempted from excise duty. Customs duty exemption has been extended to import of capital goods and machinery required for manufacture of lithium-ion cells for batteries used in electric vehicles.
 - To further deepen domestic value addition in manufacture of mobile phones, the finance minister announced relief in customs duty on import of certain parts and inputs like camera lens. The concessional duty on lithium-ion cells for batteries will continue for another year. Basic customs duty on parts of open cells of TV panels has been reduced to 2.5%. The Budget also proposes changes in the basic customs duty to rectify inversion of duty structure and encourage manufacturing of electrical kitchen chimneys.
 - Basic customs duty on seeds used in the manufacture of Lab Grown Diamonds has also been reduced.
- Ministry of Defence has set a target of achieving a turnover of US\$ 25 million in aerospace and defence Manufacturing by 2025, which includes US\$ 5 billion exports. Till October 2022, a total of 595 Industrial Licences have been issued to 366 companies operating in Defence Sector.

These initiatives are expected to improve exports from the textiles and marine sectors.
- The 'Operation Green' scheme of the Ministry of the Food Processing Industry, which was limited to onions, potatoes and tomatoes, has been expanded to 22 perishable products to encourage exports from the agricultural sector. This will facilitate infrastructure projects for horticulture products.

ROAD AHEAD

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country. The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2.5 trillion along with a population of 1.32 billion people, which will be a big draw for investors. The Indian Cellular and Electronics Association (ICEA) predicts that India has the potential to scale up its cumulative laptop and tablet manufacturing capacity to US\$ 100 billion by 2025 through policy interventions.

One of the initiatives by the Government of India's Ministry for Heavy Industries & Public Enterprises is SAMARTH Udyog Bharat 4.0, or SAMARTH Advanced Manufacturing and Rapid Transformation Hubs. This is expected to increase competitiveness of the manufacturing sector in the capital goods market. With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

GLOBAL PACKAGING INDUSTRY

The Global Packaging Market size is expected to grow from USD 1.10 trillion in 2023 to USD 1.33 trillion by 2028, at a CAGR of 3.94% during the forecast period (2023-2028).

The global packaging business has experienced consistent growth over the last decade due to substrate choice changes, expansion of new markets, and changing ownership dynamics. Traditional packaging may continue to be replaced by flexible packaging, high-barrier films, and stand-up retort pouches may challenge rigid pack formats like metal tins and glass jars for a wide range of food products.

With the rising consumption of sweets and confectionery, several flexible plastic packaging providers are offering packaging solutions, specifically catering to this demand, and are further driving their sales and revenues. For instance, according to the US Census Bureau, confectionery manufacturing industry revenue in the United States is expected to reach USD 10.89 billion by FY 2023.

According to the Flexible Packaging Association, flexible packaging is mainly used for food, which accounts for more than 60% of the total market. Since it could incorporate new solutions for various packaging issues, the flexible packaging industry is experiencing robust growth. In addition, the Indian food and grocery market is the world's sixth-largest, according to IBEF, with retail accounting for 70% of sales. The Indian food processing industry, which contributes to 32% of the country's overall food market, ranks fifth in production, consumption, and export and is one of the country's most important industries.

The sustainability trends, including recycling and using bio-degradable forms of PET, are expected to rise over the forecast period. In some regards, it will always face sustainability issues due to the nature of its production. However, the recycling streams and development will help neutralize such sustainability issues. For instance, the Coca-Cola European partners pledged to collect 100% of the packaging and use 50% recycled plastic in plastic PET bottles in Western Europe by 2025. PepsiCo aims to use 50% of recycled plastic in its bottles across the European region by 2030, with an interim target of around 45% by 2025. Also, various large food manufacturers are under pressure from campaigners and

consumers and are currently on a mission to rethink their plastic packaging and move towards a circular economy. For instance, Nestle and Mondelez recently signed the European Plastics Pact. This initiative is committed to making 100% of packaging recyclable or reusable and reducing virgin plastic usage by 2025.

Various companies focus on product innovations to hold a significant position in the studied market. For instance, in February 2021, Constantia Flexibles announced its new product, Perpetua, a recyclable, high-barrier, polymeric mono-material packaging solution for pharmaceutical products. According to the company, the solution has a wide range of pharmaceutical packaging applications and is now available worldwide.

Various vendors have been focusing on expanding their market presence by constructing new production facilities for paper packaging. For instance, in December 2021, Promateris, a Romanian industrial packaging company, announced entering the paper packaging area in 2022 by building a production facility in the country. This project will be completed in 2023. Furthermore, in 2022, the firm expects to begin producing biodegradable and compostable raw materials based on corn starch, making it the first company to do so in Eastern Europe.

However, on the other hand, the overall usage of non-recyclable, non-biodegradable plastic packaging solutions is expanding, resulting in increased carbon emissions in the environment. This might be a factor that could restrain the market growth. As a result, numerous large firms such as Amazon, Google, and Tetrapak, among others, are aiming toward net-zero carbon emissions, which is predicted to be their capital expenditure.

During COVID-19, contactless delivery has also emerged as a new trend. Pioneers in sustainable packaging could adjust to these new standards, such as Garçon Wines, whose frictionless supply of letterbox- and climate-friendly flat wine bottles has witnessed a great demand. In addition, the rapid production of COVID-19 vaccines has also increased the need for glass containers or vials for storage purposes. By March 2021, Schott AG, a prominent German glass company, had produced enough vials for one billion COVID-19 vaccine doses, and it is on schedule to produce over two billion doses. According to the company, their borosilicate glass vials are used in roughly 90% of licensed vaccinations because they are resistant to shocks and temperature extremes.

INDIAN PACKAGING INDUSTRY

The paper and packaging sector in India is growing rapidly and has significant potential for future expansion. The industry was valued at \$50.5 billion in 2019 and is anticipated to reach \$204.81 billion by 2025, registering a CAGR of 26.7% from 2020 to 2025. The growth in the sector is being driven by a surge in e-commerce, food processing, pharmaceuticals, FMCG, manufacturing industry and healthcare sector. Additionally, numerous government initiatives including 'Make in India' had positive impact on the packaging industry. The paper and packaging industry is currently the fifth largest sector in the Indian economy and has the potential to achieve pricing levels that are about 40% cheaper compared to European regions.

The Indian packaging sector has distinguished itself with its exports of flattened cans, printed sheets and components, crown cork, lug caps, plastic film laminates, craft paper, paper board and packaging machinery. The packaging segment with the fastest growth include laminates and flexible packaging, particularly PET and weaved sacks.

India uses paper as a major source of packaging. The paper industry accounts for 5% of global production. Demand for paper continues to rise for the packaging of FMCG products and ready-to-eat food. Packaging-grade paper accounts for 55% of the main types of paper produced domestically in the paper and paperboard industry.

Growing Exports of Packaging Material

India is emerging as a key exporter of packaging materials in the global market. The export of packaging materials from India grew at a CAGR of 9.9% to US\$ 1,119 million in 2021-22 from US\$ 844 million in 2018-19. US remains the major export destination for the packaging industry, followed by the UK, the UAE, Netherlands, and Germany.

Sectors of Application:

The packaging has applications in multiple sectors, two of which key sectors are:

Pharmaceutical: India boasts of one of the world's largest pharmaceutical markets and therefore produces a huge quantity of plastic pharmaceutical packaging to cater to the needs of the fast-growing sector. In the pharmaceutical industry, blister packs are one of the most popular types of packaging. Blister packs are used for tablets, ampoules,

syringes and vials, and also used for individual packaging for medication doses while maintaining the integrity of other doses. Primary, secondary and tertiary packaging are the three tiers of packaging typically used in the pharmaceutical sector, and the type of application depends on the drug. The material that initially covers and holds the product is referred to as the primary packaging system. This includes all the package elements and sub-elements that come into contact with the product or that may have an impact on its duration of life, such as ampoules and vials, prefilled syringes, IV containers and blister packs. Key players in the pharmaceutical packaging include West Pharmaceuticals, Huhtamaki PPL Ltd and SGD Pharma India Ltd.

Food and Beverage Packaging: India has seen a rise in the paper and packaging of food and beverage with an increase in demand, along with new companies in the food and beverage space. The entry and meteoric rise of food delivery service companies such as Zomato and Swiggy have led to growth in the consumption of packaging used for food and beverage. Zomato had even introduced tamper-proof packaging to keep the food safe and fresh. Food packaging has seen significant innovations that focus on highlighting the brand while maintaining the quality and standard of the food product contained within. There is intense competition among local manufacturers to produce cutting-edge products and stand up to MNCs that have a dedicated R&D department to test and eventually deploy the latest technologies. The major players in this space are Evirocor, Tetra Pak and Vinayak Ultra Flex.

Government Initiative

The government has launched the National Packaging initiative which focuses on the following measures to promote the sector:

- Set up guidelines and certain requirements for design and material of packaging used
- Promote the process of moving in bulk quantities
- Focus on promotion of centralised industrial activity by encouraging application of necessary and sophisticated infrastructure such as specialised logistic parks with appropriate facilities as well as packaging labs to work on designs and carry out tests
- Encourage processes to reduce packaging waste by establishing material recovery facilities (MRFs)
- Support domestic business to manufacture sophisticated packaging materials
- Develop training facilities and certified programmes of the highest order to maintain availability of skilled labour.

Road Ahead

The Indian packaging sector is diverse and caters to a broad sector of industries and products. The government, through its positive promotion of the Make in India policy, has set the packaging sector to grow rapidly due to companies setting up their manufacturing units in the country and using these domestic facilities as a base to export to other countries. The government has implemented a strategy to lower tax rates for new manufacturing companies in order to turn India into a global manufacturing hub. Furthermore, given the need for domestic firms to compete with MNCs, the government is planning to further level the sector among players by launching various initiatives with the aim of promoting the development of packaging, along with technological advancements.

PET BOTTLE MARKET

AN OVERVIEW

PET bottles are more durable, transparent, lightweight, non-reactive, cost-effective and thermally stable. Moreover, they are environment-friendly and can be recycled repeatedly which further reduces their manufacturing cost. Primarily used in the packaging of drinking water and beverages, PET bottles are also gaining prominence as a packaging solution for salad dressings, household cleaners, medicines, dish detergents and mouthwashes.

Pet Bottles are among the most important and popular packaging types worldwide. Change in consumer preference from glass to plastic bottles is due to the numerous offerings of PET bottles. Lightweight, shatter resistance, and good

compatibility with module mode technology are among the factors of PET bottles that draw the attention of various end-use industries.

Today, PET bottles are widely used for packaging of food, beverages, cosmetics, and personal care products, pharmaceuticals, chemicals, nutritional supplements, and other consumer goods. PET bottles are free from BPA and meet many national as well as international legislation.

PET bottles can be filled via aseptic filling, cold filling, or hot filling which ensure the safety and improve the shelf life of products. Thus, the global outlook for the PET bottles market is expected to remain positive during the forecast period.

PET BOTTLE MARKET DYNAMICS

The advancement in the packaging industry and the introduction of customized PET bottles in current years have led to an increase in the demand for PET bottles worldwide. An exclusive bottle design, unique properties, versatile shapes, adjustable volume, and thermal stability combine to make PET bottles stand out on the shelves and appear as a key choice for various end-use industries.

These factors are expected to drive the growth of the global PET bottles market during the forecast period. The introduction of transparent PET bottles for various food and beverages has proven to increase the sales of products as customers get a clear insight into the products.

Hence, the market share for PET bottles is especially growing in beverage packaging. The rising popularity of carbonated drinks across the globe and the extensive use of PET bottles for their packaging are expected to propel the growth of the global PET bottles market during the forecast period.

The printing and lamination features on PET bottles offer an excellent opportunity for manufacturers and brand owners to promote their brand value. Also, the highly recyclable nature of PET bottles as compared to other plastic bottles is expected to create a positive outlook for the growth of the global PET bottles market during the forecast period.

INDIAN PET BOTTLE INDUSTRY

The India PET packaging market size reached US\$ 1.4 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 1.8 Billion by 2028, exhibiting a growth rate (CAGR) of 4.87% during 2023-2028.

Polyethylene terephthalate, or PET, is a polyester thermoplastic elastomer widely used for packaging applications. It becomes flexible on heating and can be easily molded into a wide variety of shapes. It is substantially more cost-effective than other packaging materials, such as glass, aluminum and copper. PET packaging is lightweight, which reduces transportation costs and offers an economical packaging solution to end users. It also provides high dimensional stability and resistance to moisture, solvents, and alcohols.

The emerging trend of on-the-go food consumption in India has increased the demand for single-serve and small-sized products packed in materials like PET and metal cans. Flexible packaging materials like PET remain popular across the country as consumers are price-conscious and seek products that offer value for money. Besides the food and beverage industry, PET packaging is also used for packaging beauty, personal care, and pet food products. The growing sales of these products are catalyzing the growth of the market. Furthermore, the increasing demand for customized and different sized packs for brand differentiation is also positively impacting the market growth.

OUR COMPANY PRODUCES PET PREFORMS WHICH INVOLVES A SERIES OF ACTIVITIES WHICH CONSTITUTES THE ENTIRE MANUFACTURING PROCESS.

The detailed machine flow chart is as under:

STEPS IN MANUFACTURING PROCESS

For Pet Bottles:

1. **Drying the PET:** PET absorbs moisture from the atmosphere. This must be removed before processing using a dehumidifying dryer.
2. **Plasticizing the PET:** Dried PET Pellets are compressed and melted by a rotating injection
3. **Injection moulding preform:** Molten PET is injected into an injection cavity and cooled rapidly to form a “preform”. (The original test-tube-like form from which bottles are blown is known as a preform).
4. **Optimizing the preform temperature:** The temperature of the preform is adjusted to the correct profile for blowing.
5. **Stretch Blow moulding the container:** The hot preform is simultaneously stretched and blown (thereby orienting the crystals of and strengthening the PET) into a shaped blow mould to form a tough, light weight container.
6. **Container ejection:** The finished container is ejected.

The ISBM Process for PET requires support of following ancillary Equipments for operation of ASB Machines for stable, efficient and trouble-free running of ASB Machines and production of consistent quality bottles/jars.

- **PET Resin Dehumidifying Dryer with Hopper and Auto Loader:** - This equipment is required to dry and dehumidifying PET Resin (Residual water should be less the 50PPM) to enable production of quality PET Containers at Dryer Temperature of 150 ~ 170°C with 4 hrs drying time and dew point less than -40°C
- **Mold Chiller:** - This equipment enables rapid cooling of preform after hot/molten resin is injected into molds, for production of crystallized and clear PET preforms. Typical Chiller Water Temperature: 10 ~ 15°C with Flow Rate: 120 ~ 140 LPM.

- **Mold Temperature Controller (Optional):** - Certain Molds requires warm water/oil to be supplied to the condition stage for preform temperature optimization.
- **Air Compressor:** - Low Pressure air at maximum 9.9 kg/cm² is required for certain pneumatic operation on the machine and High-Pressure Blow Air typically between 25 ~ 30 kg/cm² is required for blowing PET Containers
- **Cooling Tower:** - Cooling Tower is required for Cooling the main Heat Exchange of Machine and other parts in machine and ancillary.

For Pet Preforms:

A PET preform is an intermediate product that is subsequently blown into a polyethylene terephthalate (PET) container. Preforms vary in neck finish, weight, colour and shape, and are specifically designed to meet the needs of customers in different market segments. Preforms can be single-layer or multilayer.

The Injection Moulding Process:

Mold Cavity Creation: The process begins with the design of a mold cavity, which represents the desired shape of the PET preform. These cavities are typically made from high-grade steel to withstand the stress and high temperatures of the injection moulding process.

Plastic Resin Injection: Small pellets of PET resin are fed into the injection moulding machine's hopper. The pellets are heated and melted, forming a molten plastic material.

Injection into the Mold: The molten plastic is then injected into the mould cavity under high pressure. This ensures that the material flows into every nook and cranny of the cavity, creating a precise and uniform preform shape.

Cooling and Solidification: After injection, the mould with the molten plastic is allowed to cool and solidify. Cooling time is carefully controlled to achieve optimal results.

Ejection: Once the preform has solidified, the mould is opened, and ejector pins push the preform out of the cavity.

OUR CLIENT BASE

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days. For further details, refer to the General Information Document available on the website of the Stock Exchange and the Book Running Lead Manager.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023. SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing six working days to three working days and pursuant to SEBI circular SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, the reduce time period of three working days has been made voluntary for public issues opening on or after September 1, 2023, and mandatory for public issues opening on or after December 1, 2023.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 (the “UPI Streamlining Circular”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post- Issue BRLM will be required to compensate the concerned investor.

For further details, refer to the General Information Document available on the website of the Stock Exchange and the Book Running Lead Manager.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 and SEBI circular no.
